

Meridian Fire Department's training tower

Waste Water Treatment Plant at Ten Mile Road

Meridian's Finest

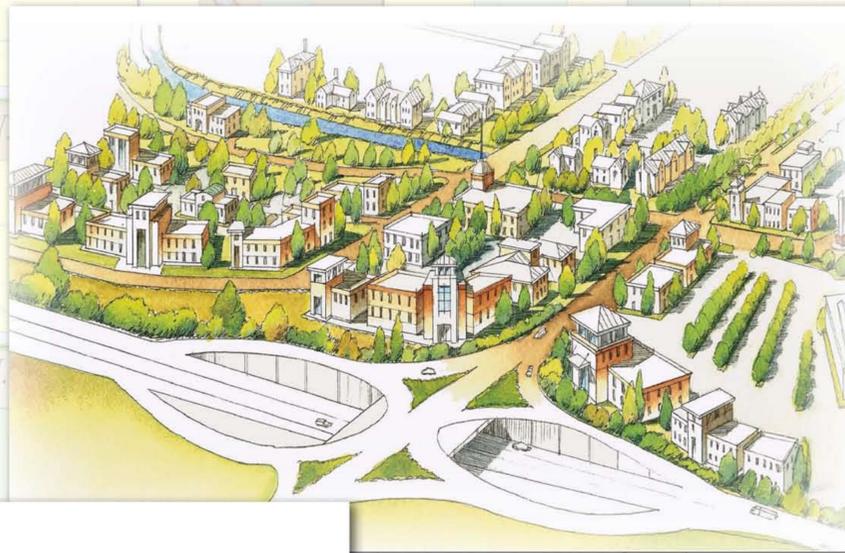

**Present**

The four panels throughout the plaza describe our history. This panel reflects the quality services that the City provides our citizens today. Providing for a safe community through our Police and Fire departments is our City's number-one priority. Our parks offer places for individuals, young people, and families to create life-long memories. Top-of-the-line utilities provide our homes and businesses with the highest quality water, which is then treated to assure we are protecting our environment for future generations. Our Boys & Girls Club member, Isaac, offers a glimpse of what the youth see for the future. The Ten Mile Interchange Specific Area plan reflects our vision for future growth along the key I-84 corridor.

**Design Elements**

The City Hall building elevation recognizes the past through design elements using the warmth of the red brick on the wings and the barreled center roof line, an agricultural icon in storage design. The present and future are reflected through the use of the white stone face, the aluminum and steel accents, and the green-tinted windows that offer a clean, bright view of the unlimited possibilities that lie ahead for the Meridian community.

Amenities incorporated into the City Hall campus are meant to reflect the heart of our beloved community, to be a cornerstone of the health and economic prosperity of our downtown, and to offer a place where people want to be and experience the importance of what we have become and realize the unlimited potential of what we can achieve TOGETHER!

Ten Mile Interchange Specific Area Plan

# City of Meridian Future Land Use Map
