

INDUSTRIAL

FUTURE LAND USE MAP DESIGNATION CUT SHEET

GENERAL CRITERIA

MAP COLOR

SAMPLE ZONING

I-L and I-H

DESCRIPTION

This designation allows a range of uses that support industrial and commercial activities. Industrial uses may include warehouses, storage units, light manufacturing, flex, and incidental retail and offices uses. In some cases uses may include processing, manufacturing, warehouses, storage units, and industrial support activities.

SAMPLE POLICY

- ❑ Preserve the industrial base within designated industrial land use areas by discouraging non-industrial uses and focusing on light manufacturing, distribution, flex-space, and base-employment.
- ❑ Require all new development to create a site design compatible with surrounding uses through buffering, screening, transitional densities, and other best site design practices.
- ❑ Promote area beautification and community identity through context sensitive building and site design principles, appropriate signage, and attractive landscaping.
- ❑ Require attractive landscaping and pedestrian friendly design within new developments.
- ❑ Require the improvement and maintenance of landscaping along public rights-of-way and landscaping of dedicated but unimproved rights-of-way strips.
- ❑ Reduce the number of existing access points onto arterial streets by using methods such as cross-access agreements, access management, and frontage/backage roads, and promoting local and collector street connectivity.
- ❑ Require industrial uses to conform to disposal, spill, and storage measures as outlined by the Environmental Protection Agency.

VIBRANT COMMUNITY

CHARACTER, DESIGN, AND IDENTITY (EXCERPTS FROM COMPREHENSIVE PLAN)

Introduction ¹

From residential areas to retail centers, business parks to open space, the community should look and feel intentional. Neighborhoods, neighborhood centers, and commercial developments should be both grounded and unique, incorporating features of their surroundings while offering residents, visitors, and employees distinctive, safe, and inviting environments.

Gathering places should be convenient and integrated, encourage social activity and engagement through generous and intentional amenities and activation, and be a cornerstone of community pride and timeless neighborhood value.

Background ¹

The inherent goal of community design is to prioritize and improve livability and quality of life for current and future generations of Meridian residents. Community design refers to both residential and non-residential layout and building design, transition, and buffers. Moreover, community design is inextricably linked to sustainability, livability, healthy initiatives, as well as other elements of this Plan.

Community design also involves preserving and enhancing unique and extraordinarily valuable areas or attributes of the City; community design provides a means to maintain the unique characteristics of the City and to improve the built environment.

Subdivision Design

The foundation of ensuring good Community Design principles is largely accomplished through the City's subdivision review and approval process. This process involves the entitlement of land for division through a public hearing process. While land use is an integral component of the development process, equally if not more important is the role of the Subdivision Design and Improvement Standards, Common Open Space and Amenity Requirements, and other supporting development standards contained in Title 11 of Meridian City Code.

Subdivision review and approval establishes future road configurations, access locations, lot layouts, areas and amounts of open space, and serves as a prelude to subsequent administrative design review.

Building and Site Design

The City requires Certificate of Zoning Compliance and Administrative Design Review approval prior to construction of any new building (except single-family). This process typically occurs after subdivision approval. The Architectural Standards Manual (ASM) ³ and Title 11 of City Code ² are the primary tools used in this process. The ASM provides the City with a standards based tool to guide the creation of attractive, lasting, and quality-built environments that contribute to the progression of Meridian as a livable community. Thoughtful design of commercial and residential developments can have a positive or negative effect on community pride, city character, and economic vitality.

Entryway Corridors and Gateways

Meridian welcomes residents and visitors into the community through designated entryway corridors and gateways. It is the community's intent to require additional landscaping and entryway features at these locations. This includes elevated building façades, parking lot layout, and public space design. Artistic features and public art can also enhance the overall character of a gateway.

DIFFERENT USES, DIFFERENT CODES

Single-family, multi-family, and non-residential uses follow different codes and standards. For example, single-family uses do not typically undergo building design review, where multi-family and non-residential uses do. See the Unified Development Code ² for specific application and process information.

COMMUNITY DESIGN, PARTNERSHIP

If you feel like your area of the City could benefit from neighborhood specific architectural and/or landscape standards, historic preservation efforts, or other study, contact the Planning Division to discuss your idea further.
