EXECUTIVE SUMMARY

ES-05 EXECUTIVE SUMMARY - 24 CFR 91.200(C), 91.220(B)

1. Introduction

Meridian, Idaho receives an annual entitlement allocation from the U.S. Department of Housing and Urban Development’s (HUD) Community Development Block Grant (CDBG) program. The Consolidated Plan provides direction on the investment of CDBG dollars over the next five years, from 2022 – 2026. Additionally, each year the City will produce an Annual Action Plan that details how the City will carry out the goals and objectives identified in this Plan.

HUD provides a broad range of eligible activities that can be utilized with CDBG funding. A key feature of these grants is the City’s ability to choose how to use the funds. The City must determine which eligible activities will best serve the community’s needs. HUD requires grantees to develop a Five-Year Consolidated Plan to determine the most pressing needs and develop effective, place-based, market-driven strategies to meet those needs.

When developing a Consolidated Plan, the City must first analyze the needs within Meridian and then propose strategies to meet those needs. The Consolidated Plan and first-year Action Plan (2022) format is highly prescriptive, with many data points already populated into the HUD-provided template.

The Consolidated Plan and First Year Action Plan have the following parts:

- ES - Executive Summary
- PR – The Process
- NA - Needs Assessment
- MA - Market Analysis
- SP - Strategic Plan
- AP – 2022 Annual Action Plan

The Housing Needs Assessment (NA) and Housing Market Analysis (MA) outline levels of relative need in affordable housing, homelessness, special needs, and community development. This information is gathered through several methods, including consultation with local agencies, public outreach, a review of demographic and economic data sets, and a housing market analysis.

The Strategic Plan (SP) details how the City will address its priority needs and utilize funding over the next five years. The strategies must reflect the current condition of the market, expected availability of funds, and local capacity to administer the plan. The Annual Action Plan (AAP) describes funding and projects in 2021 and gives a more specific look into how the program will operate.

Consistent with HUD’s mission, the City works to increase homeownership, support community development, and increase access to affordable housing free from discrimination. The City will embrace a high standard of ethics, management, and accountability in undertaking this work. The City will continue
to form new partnerships that leverage resources and improve HUD’s effectiveness at the community
level.

2. **Summary of the objectives and outcomes identified in the Plan Needs Assessment**
   **Overview**

Meridian's 2022-2026 Consolidated Plan is a five-year strategic plan that provides an outline of actions for
the community as it works toward meeting the housing and community development needs of its low
and moderate-income and special needs households. The plan's development includes a profile of the
community and its economy, an assessment of housing and community development needs, and the
development of long-range strategies to meet those needs.

The Consolidated Plan serves the following functions:

- A planning document for the City, which builds on a participatory process among citizens,
  organizations, businesses, and other stakeholders;
- A submission for federal funds under HUD's formula grant program for jurisdictions;
- A strategy to be followed in carrying out HUD programs; and
- A management tool for assessing performance, tracking success, and determining the course of
  future Consolidated Plans.

The Consolidated Plan for fiscal years 2022-2026 was prepared in accordance with Sections 91.100
through 91.230 of HUD's Consolidated Plan Final Rule.

Below are the HUD objectives and the City's projected outcomes over the 5-year Consolidated Plan:

1. **Provide decent housing** by preserving the affordable housing stock, increasing the availability of
   affordable housing, reducing discriminatory barriers, increasing the supply of supportive housing
   for those with special needs, and transitioning homeless persons and families into housing.
2. **Provide a suitable living environment** through safer, more livable neighborhoods, greater
   integration of LMI residents throughout Meridian, increased housing opportunities, and
   reinvestment in deteriorating neighborhoods.
3. **Expand economic opportunities** through homeownership opportunities, development activities
   that promote long-term community viability, and the empowerment of low- and moderate-
   income persons to achieve self-sufficiency.

3. **Evaluation of past performance**

At the end of its program year, Meridian is required to provide an annual report to HUD that summarizes
its performance for the program year. This report is called the **Consolidated Annual Performance**
**Evaluation Report (CAPER).**

The performance report (CAPER) must include a description of the resources made available, the
investment of available resources, the geographic distribution and location of investments, the families
and persons assisted (including the racial and ethnic distribution of persons assisted), the actions taken to affirmatively further fair housing, and other actions indicated in the Strategic Plan and the Action Plan.

Performance reporting meets three basic purposes:

1. Provides HUD with the necessary information to meet its statutory requirement to assess each grantee’s ability to carry out relevant CPD programs in compliance with all applicable rules and regulations;
2. Provides information necessary for HUD’s Annual Report to Congress, also statutorily mandated; and,
3. Provides grantees an opportunity to describe to citizens their successes in meeting objectives stipulated in their Consolidated Plan.

4. **Summary of citizen participation process and consultation process**

Citizen participation includes actively encouraging citizens, particularly the low and moderate-income population, to participate in the planning process for the five-year Consolidated Plan, the Annual Action Plan, the submission of Substantial Amendments, and the development of the Consolidated Annual Performance Report (CAPER).

The City encouraged and sought broad participation but especially encouraged participation from low- and moderate-income persons, residents of predominantly low- and moderate-income neighborhoods, minorities, non-English speaking persons, persons with disabilities, public housing residents, local and regional institutions, businesses, developers, and nonprofit organizations.

All public meetings were held in a location convenient to residents, particularly potential or actual beneficiaries.

Citizen participation played a vital role in the needs assessment, market analysis, and the construction of the goals and priorities featured in the Consolidated Plan.

5. **Summary of public comments**

Meridian accepts and records all comments. All comments and results from the online survey were recorded and utilized in helping to form the priorities, goals, and activities for the Consolidated Plan.

6. **Summary of comments or views not accepted and the reasons for not accepting them**

Meridian accepts and records all comments. All comments and results from the online survey were recorded and utilized in helping to form the priorities, goals, and activities for the Consolidated Plan.

7. **Summary**

Meridian has a revised Citizen Participation Plan (CPP) implemented and adopted in conjunction with the 2022-2026 Consolidated Plan. The CPP provides the framework for public input into the allotment of...
CDBG funds granted to the City. Meridian’s CPP is used to guide how it gives notice and outreach to residents for public hearings regarding all aspects of the CDBG process.
1. Describe agency/entity responsible for preparing the Consolidated Plan and those responsible for administration of each grant program and funding source

The following are the agencies/entities responsible for preparing the Consolidated Plan and those responsible for administration of each grant program and funding source.

1. **Introduction**

The City encourages a high level of agency consultation to best identify and address priority needs. This process ensures the participation of non-profit organizations and private citizens along with public agencies in a collaborative effort. In consultation with local partners, the City prioritized the community’s needs.

The City of Meridian conducted outreach and consultation efforts with citizens, local municipal officials, non-profit agencies, public housing agencies, governmental agencies, private organizations, and the Continuum of Care in preparing this Plan.

Provide a concise summary of the jurisdiction’s activities to enhance coordination between public and assisted housing providers and private and governmental health, mental health and service agencies (91.215(I)).

While there are no public housing units in Meridian, an estimated 10 percent of the housing authority's total voucher supply are used within Meridian City limits. The City collaborated with the Ada County Housing Authority (ACHA), the local public housing authority, to assist the City in better understanding ACHA’s resources and needs. ACHA and the City are both involved with the CoC. The CoC meetings provide an opportunity to collaborate with regional and local housing providers (public, non-profit, and private) and health and social service agencies (including private and non-profit mental health, emergency, and healthcare providers).

Additionally, the City has developed a socioeconomic profile of Meridian that will identify gaps in service, likely partnerships, and needs of the community. The City is dedicated to extending further support to organizations that help meet the community's identified needs.

One need that is readily apparent is the need for housing affordability and rental support. Meridian is dedicated to increasing its affordable housing inventory to ensure residents of all income levels can find housing in Meridian and provide necessary supportive services. City staff will continue to stay engaged with the housing affordability and supportive service community so the City can better provide important tools and resources to affordable housing developers and supportive service providers.

Describe coordination with the Continuum of Care and efforts to address the needs of homeless persons (particularly chronically homeless individuals and families, families with children, veterans, and unaccompanied youth) and persons at risk of homelessness

The City participates in the CoC, locally branded as **Our Path Home Connect**, which includes staff members from neighboring communities along with healthcare, foster care and other youth programs, mental health providers, Ada County, law enforcement, nonprofit providers, state departments, and school districts among other entities.
In 2017, **Our Path Home Connect** launched coordinated entry, which provides a single point of entry for households experiencing homelessness. Due to the data collected through coordinated entry, Our Path Home Connect has identified four strategic initiatives:

1. End family homelessness,
2. Prevent first-time homelessness,
3. Expand supportive housing opportunities, and
4. Evolve the partnership.

The involvement of foster care and other youth programs has encouraged the City to further evaluate the non-traditional homelessness experienced by youth and their families in Meridian.

The City has also updated internal policies to include a representative from the CoC to provide feedback on the current needs to the CDBG Scoring Committee, which reviews applications for CDBG funding and recommends projects to be funded. This collaboration provides an opportunity to involve the CoC in the planning process and identify projects that will address the needs of those who are currently or at risk of homelessness.

Additionally, the City acts as a liaison between the Behavioral Health Board (BHB) and the CoC. The BHB is facilitated by Central District Health (CDH) and is comprised of 23 stakeholders, advocates, and professionals including the Idaho Department of Corrections for adults, Boise Police Department, and Adult Mental Health staff that are responsible for discharging participants from state-run psychiatric facilities, and Children's Mental Health staff that work with families in crisis. Involvement with this group allows the City to understand the broader needs of the community as related to behavioral health in general and specifically for those who are being discharged from institutional settings such as mental health facilities and corrections program.

**Describe consultation with the Continuum(s) of Care that serves the jurisdiction's area in determining how to allocate ESG funds, develop performance standards and evaluate outcomes, and develop funding, policies and procedures for the administration of HMIS**

The City of Meridian does not receive ESG funds; the state is the only recipient.

Allocation of ESG is discussed at the CoC meetings, which Meridian staff attend. The City leverages the CoC’s strategy for use of ESG funds by funding homeless prevention activities. The City does not have any emergency shelters and the Rapid Rehousing (RRH) program serves countywide. The City continues its work with the Executive and Data and Performance Management Committees of the CoC to provide feedback on changes to the HMIS and data management process of the CoC.
2. Describe Agencies, groups, organizations and others who participated in the process and describe the jurisdictions consultations with housing, social service agencies and other entities.

|   | **How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?** | Access Behavioral Health is an outpatient behavioral health clinic that provides many behavioral health services both in their home and on-site. The organization serves everyone struggling with mental and behavioral health, including counseling, medication management, and home-based services. There are two locations in Boise and one in Nampa.  
A statewide shortage of behavioral health workers affects the capacity to facilitate necessary services. Additionally, a mental health stigma prevents people from getting treatment and making needed changes. |

Anti-poverty Strategy |
The Ada County Sheriff’s Office provides law enforcement services for unincorporated ADA County and fulfills a contract with three cities within the County. It also manages the largest jail in Idaho and dispatch services for the fire and police departments in the County. Boise and Meridian are both one of the top 5 largest cities in Idaho. The last decade of growth has been astronomical. People are relocating and drawn to the area for improved quality of life, low crime, and opportunity. This growth stresses the resources and infrastructure of the City.

Currently, mass transit does not exist, traffic is a huge issue, roads cannot accommodate the crowds, schools are bursting at the seams, and housing prices are insanely high. Agencies are doing their best to accommodate the growth personally within the Office of the Sheriff.

It has been challenging to hire good, qualified people. It takes a particular person to get into law enforcement, and finding housing for those who want to move here is challenging. The Department is fortunate because the community accepts its presence, and there is a tangible level of respect from the public and agencies. From this, the Department has fostered an excellent connection with the community where it is heavily involved in being a part of the solutions.

Advocates Against Family Violence

5

How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?

Advocates Against Family Violence works to eliminate violence and abuse from the lives of all individuals regardless of identity or situation. Serving all the Treasure Valley, the organization provides advocacy, support, emergency shelter, housing, education, and community awareness to those in need.

Additionally, the organization endeavors to build a strong community that promotes hope, healing, and strength to all seeking services for abuse. The housing program has recently expanded to 110 housing units on the Caldwell
campus, with 14 units existing around the community. All units provide housing for low to moderate-income persons. Approximately 97% of those receiving services and assistance through the shelter or housing program fall at or below 50% area-median income.

The public needs to know that AAFV is more than a shelter; other inclusive services are offered, including holistic healing (from start to finish) for all seeking a life free from violence. The organization provides the highest volume of services in Idaho, valuing personal agency and health guidelines. All services and programs are offered without restrictions, regardless of identity or situation. Currently, throughout the State of Idaho, affordable housing is the most significant need for those with low- to moderate-income.

</table>
| How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination? | The Area 3 Agency provides support and services to the community through two unique branches. The first is geared towards citizens ages 60 & over and provides resources for those who are disabled, experiencing abuse, or food insecurity. The Meals on Wheels program supports the latter and serves the SW Idaho region with subsidies for the cost of meals.

The Agency also provides in-home services, education, and workshop seminars that help seniors age in place through caregiver support, diabetes management, pain management, and support groups.

The second branch provides adult protective services for vulnerable adults 18 and over to care for individuals where child protection services stop. While the organization does not focus on housing, it is undoubtedly a top issue for clients. Many clients need help with heavy household chores, yard work, groceries, and maintaining an independent living. There is an ever-increasing need for homemakers and those providing chore assistance. |

<tr>
<td>How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?</td>
<td>The Boise Rescue Mission is the leading provider of homelessness services in Idaho. The organization supports five shelter facilities in the Treasure Valley for men, women, and children with free meals available every day at 4 of the shelters. There are 54 apartments between Nampa and Boise for those transitioning from homelessness. Additional services include showers, a clean and safe place to sleep, a job search program, an academic program, and mental health program. Housing, food, and other costs increase due to the vast amount of people migrating to Idaho. Many are drawn to Idaho by affordable living and the liberty of leaving behind states with more restrictions and higher taxes. While many organizations, like the Idaho food bank, helping with food scarcity, this continues to be a significant need in the Treasure Valley. Many are also unaware of the scope of the ministry; transitional housing and programs for integrating the homeless back into the community, academics for children, college scholarship funds, college road trip funds to help students find the right school for them, etc.</td>

| What section of the Plan was addressed by Consultation? | Homelessness Needs - Veterans |
| How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination? | The Boise VA Medical Center provides health and housing services for veterans in the Treasure Valley. These include wrap-around services to support stable housing for basic needs, health care (including mental health and substance abuse treatment), transportation/access to services, and direct supportive therapy. Helping veterans through the housing programs also include support with the housing |
search and assistance with HUD-VASH vouchers from BCAC Housing Authority or SICHA.

About HUD-VASH: A permanent supported housing partnership between HUD and VA. The VA provides the support services with wrap-around case management for veterans who qualify for VA health care and meet the HUD definition of homeless. Additionally, veterans who demonstrate the need for ongoing supportive case management, veterans with limited time served, or those with an honorable discharge may qualify for homeless services for permanent supportive housing or temporary transitional housing.

Finding and accessing affordable housing often takes months and is one of the most significant challenges the homeless face, especially with the lack of available, affordable housing in the City. Receiving the HUD-VASH voucher is often just the first step. HUD-VASH differs from Section 8 vouchers and is only available if VAMC provides case management services. The organization is working with agencies that can provide case management services.

</table>
| | How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination? | The Boys & Girls Club serves all youth and families in the community but focuses primarily on youth who need the most support. Generally, the organization sees many working-class families that need affordable care, lots of very-low-income families who need a helping hand, and most kids would simply be at home without supervision if they were not at the Club.

The Club provides safe and affordable childcare for families from 7 am-6 pm on non-school days and serves kids before school, 7 am-9 am, and after school, 3 pm-7 pm, during the school year. All youth are provided meals during our services and free counseling services that all Club families can access.

Youth have access to targeted programming in Academic Success, Good Character and Citizenship, and Healthy Lifestyles. |
While the things mentioned above are year-round, holiday help, referring to other agencies, providing workforce development opportunities, and generally looking to fill gaps for the people in the community who need these services. Affordable housing, followed closely by stagnant wages, is the single-most pressing issue for families.

|    | How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination? | Central District Health upholds regulatory health standards and policies through food education, septic system inspection, landfill operation, transfer station operation, health promotion and policy work, school zone, disease investigation and control, supplemental nutrition program, restaurant inspections, and grocery store and home inspections.  
The biggest challenge for the communities the organization serves is behavioral health; many people have mental health and substance use issues.  
Transportation and health insurance are direct barriers for those needing support for these issues.  
The cost of living in Meridian, in relation to wages, is also a barrier that affects public health. The price of homes and rent has gone up significantly, making it unaffordable for lower to middle-wage earners.  
The community needs to establish a more robust workforce. Lastly, food security; there are a lot of families who struggle to put food on the table. |

One of the most significant challenges in the community is that businesses are struggling to maintain the labor force. From the service sector to the healthcare industry, companies are experiencing labor shortages because many can no longer afford to live here.

The minimum wage was a big issue 3 years ago, but today minimum wage does not cover the cost of living. There needs to either be workforce housing or incentives for developers.

meal reimbursement, and other supplemental grants and funds like the Jan Williams Foundation.

In Ada and Elmore Counties, the cities served by FOCAF are Boise, Star, Meridian, Eagle, Kuna, Garden City, Mountain Home, and Glenns Ferry. FOCAF serves low-income families at 130% of the poverty rate, experiencing homelessness, and foster care children. Head Start and Early Head Start services include part-day preschool programming for children 3-5 years old with wrap-around services, including health and family support services. Currently, the biggest need for the community is affordable housing, transportation, and food accessibility.

| **How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?** | IDOC operates nine prisons in the State of Idaho. The organization releases inmates regularly with the Treasure Valley releasing the highest number of inmates in the State. Most are unemployed and without family, this results in many individuals relying on transitional and recovery housing. The Department of Corrections provides funding for a month to give them a chance at finding a job and affordable housing. Housing is critical; if
individuals have a safe place to live, the chances of being incarcerated again are severely reduced.

Throughout the State of Idaho, there are 195 houses of this nature that the organization is responsible for. Provider services vary by entity, some offer a safe place to sleep, and others provide services for jobs, living, social support, AA, NA, and a positive community. Safe housing out of the gate is paramount.

Typically transitional housing is meant to be just that, however, in light of the housing market, individuals stay in transitional housing for more extended periods. Many of the facilities have a waitlist causing some inmates to request a delayed-release.

Many felons are misunderstood and end up at the back of the line for employment and housing opportunities; if this narrative could be shifted, we could keep people out of the system and get them back on their feet.

More public involvement from landlords and property managers would be a great starting point so they can better understand the barriers many inmates face upon release. It is helpful to open up the conversation, ask inmates why they have a felony and hear their story.

<tr>
<td>How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?</td>
<td>The Idaho Department of Labor provides services to job seekers for local, statewide, national, and government job listings. Additionally, the organization provides job seekers with job search assistance, registered apprenticeship opportunities, job search workshops and networking opportunities, career guidance and assessments, assistance applying for unemployment insurance benefits, and specialized services for veterans, youth, adults, dislocated, migrant and seasonal farmworkers and senior workers. The Department also provides services to support local businesses through employee recruitment and retention, labor market information, assistance complying with labor laws, business seminars and workshops, employee training, and business expansion. The Department serves a broad spectrum of the population, ranging from low-income populations such as public assistance recipients to migrant and seasonal farmworkers and other low-wage earners to white-collar job seekers looking for a career change. The services are suitable for the entire population of the state. Like most locations around the State of Idaho, housing and transportation are critical issues for residents in the Valley. Improved access to public transportation could ease much of the concern that many low-to-moderate income residents encounter daily. The housing shortage significantly impacts low-to-moderate income households and minimum wage earners.</td>

|     | **How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?** | The Idaho Housing & Finance Association is a financial institution and administrator of affordable housing resources. The Association provides feasible housing solutions for renters and buyers through financial guidance, tenant support, and financing options.  
IHFA strives to reduce homelessness for youth, veterans, and people who are experiencing chronic homelessness. Most of the homeless population is 30% AMI and below.  
In the homeownership area, much of the market is comprised of earners who are 120% AMI and below and renters who are 60% AMI and below. The general public does not have a well-rounded awareness of the many facets of IHFA. Most think IFHA provides 1st time home buyer loans, which is correct, but the number of other areas served is unknown to the average resident.  
It is worth mentioning that the current wages and lack of available housing are a serious problem in the Treasure Valley; there simply is not enough affordable housing. |

How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?

Idaho Nonprofit is the Idaho state association of nonprofits, and there are currently 800 members/organizations, with a bulk of these residing in the Treasure Valley. The Idaho Nonprofit provides training support and resources to nonprofits in leadership development, financial literacy, board training, and training webinars to help increase effectiveness.

The organization also supports the advocacy side of things through the lobbyist arm of the organization by tracking state legislation that affects nonprofits and ensuring jurisdictions are informed at the state and local levels. The Idaho nonprofit also facilitates educating policy members of the sector by analyzing macro-level indicators.

Idaho Nonprofit is a big advocate for educating cities and funders on grant funding best practices. It is vital to ensure these financial resources are turned on within the community and not diverted improperly. Idaho Nonprofit wants to facilitate the admin side of grant funding that assists each nonprofit with capacity and direction for project completion so each nonprofit can purely focus on fulfilling its mission. Idaho Nonprofit is connecting the dots on what nonprofits need to function.

It is important to know that the organization has all the resources to be successful in connecting nonprofits with bookkeeping services, reporting, financial management, government best practices, and any other support needed along the way. It would be most beneficial to the parties involved that one day there exists an element of federal and/or state dollars set aside within the contract that provides admin in the grant funding process.

| How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination? | The Meridian Police Department provides law enforcement and assistance with the rights service of victims within the criminal justice umbrella. The Department supervises 27 investigators and professional staff, and the caseload is split between Persons Crimes, Property Crimes, and Narcotics investigations.  
Safe and affordable housing is the most crucial need at the moment. Specifically, with victims of crimes and intimate partner violence, there is a need for a safe, secure, and stable home environment.  
It is essential that the economic element that victims must overcome to break free from their abuser. Often, the money and ability to find affordable housing and assistance are unavailable, so the victim cannot afford to leave and provide for themselves. This traps them in an abusive or unsafe environment. |

<th>How was the Agency/Group/Organization consulted and what are the anticipated outcomes of the consultation or areas for improved coordination?</th>
<th>CATCH operates Our Path Home. Our Path Home is the local public-private partnership working to end homelessness in Ada County. This partnership embraces service models and philosophies that embody that permanent housing is the solution to homelessness and that housing is healthcare. The organization is working to end homelessness for children and families in Ada County by providing pathways toward permanent housing. This is done through collaboration with local partners to offer warming shelters, supportive housing plans, resolution assistance, and prevention efforts. The public knows that the organization helps with homelessness but is unaware of the breadth of offered services. Assistance from homelessness through to securing housing with help throughout the process. Available and affordable housing is easily the missing piece in Meridian. With rent increasing, more and more people need housing solutions or have difficulty maintaining secure housing. This results in a backup with temporary housing and the warming shelters because people must stay in them longer to avoid sleeping on the streets.</th>

<td>SHIP provides transitional housing for individuals and veterans with substance abuse, mental health issues, and who are experiencing homelessness. To provide well-rounded support, clients receive help with employment opportunities, transportation, enhanced safety, sober programs, and more. SHIP facilities include 13 houses, four vans, and many retail stores, all run by a team of 60 employees. Traditional safe and sober housing should be a revolving door, but people are staying in transitional housing with rent becoming unaffordable within the Treasure Valley. A daily waitlist of 30-40 people a day is now standard. If people do not get the help they need, they fall back into old habits. Rent in transitional housing with SHIP is $425/month. Addiction can be seen as a disease of choice that acts as a barrier for donors. It would be great if the public could see SHIP as an organization providing a much-needed service and continue giving people a chance no matter how many times they relapse. SHIP also allows for all medications for pain and recovery and Medicaid-assisted treatment.</td>

<td>WCA provides services to individuals who have suffered the trauma of domestic abuse, domestic violence, and/or sexual assault. The organization serves anyone who needs support, no matter where they live or how they come to the center. The services provided are free and available regardless of the ability to pay; women, children, men, and individuals who are gender non-conforming. The menu of services includes the shelter, hotline support, court advocacy at the Ada County Courthouse, counseling, case management, and financial empowerment classes. Affordable housing is the most critical need for the clients the agency serves. This directly impacts the ability to leave an abusive or violent household. The public needs to understand that domestic abuse is not always violent - in fact, most abuse is not visible. Instead, it consists of the systematic erosion of a feeling of self-worth through nonphysical means - like belittling, gaslighting, financial control, and threats to beloved people or pets.</td>

</tbody>
</table>
Identify any Agency Types not consulted and provide rationale for not consulting

The City continues to consult with all required organizations in helping to formulate a strategy for the efficient use of HUD Community Development Block Grant (CDBG) funds. Every agency identified was offered an opportunity to participate in the development of the plan. While no agencies were left out, the City does not have a citizen’s advisory group to consult with.

TABLE 3 – OTHER LOCAL / REGIONAL / FEDERAL PLANNING EFFORTS

Describe cooperation and coordination with other public entities, including the State and any adjacent units of general local government, in the implementation of the Consolidated Plan (91.215(l))

Meridian coordinated and sought feedback on community needs from local and State level partners. The City consulted with Central Health District, Idaho Department of Corrections, Idaho Department of Health and Welfare, Idaho Department of Labor, Idaho Division of Vocational Rehabilitation, Idaho Housing and Finance (IHFA), and Idaho Commerce about their rural broadband initiatives.

The City consistently consults with the neighboring HUD entitlement communities of Boise, Nampa, and Caldwell.

Narrative (optional):

Meridian is focused on providing a wide opportunity for residents to participate in the Consolidated Planning process. The City consulted with a variety of stakeholders including broadband service providers and emergency management departments. It will continue to do so on an annual basis during the development of subsequent Annual Action Plans (AAP) in the future.
1. **Summary of citizen participation process/Efforts made to broaden citizen participation**

   Summarize citizen participation process and how it impacted goal-setting

   Citizen participation includes actively encouraging citizens, particularly the low and moderate-income population, to participate in the planning process for the five-year Consolidated Plan, the Annual Action Plan, the submission of Substantial Amendments, and the development of the Consolidated Annual Performance Report (CAPER). All notices of public meetings relating to this process are published in the local newspaper before the public meeting. According to HUD guidelines, the Consolidated Plan and First-Year Action Plan draft was posted on the City's website, made known to grant subrecipients, and noticed in the local newspaper.

   The City encouraged and sought broad participation but especially encouraged participation from low- and moderate-income persons, residents of slum and blighted areas, residents of predominantly low- and moderate-income neighborhoods, minorities, non-English speaking persons, persons with disabilities, public housing residents, local and regional institutions, businesses, developers, nonprofit organizations, philanthropic organizations, and community or faith-based organizations.

   All public meetings are held in a location convenient to residents, particularly potential or actual beneficiaries. Meetings are held at times to provide maximum flexibility for an array of citizen schedules. Attention is given to ensure meeting times increase the probability of full citizen participation.

   Additionally, the Consolidated Plan and Action Plan can be made available in Spanish upon request. All Public Hearings and Comment Periods are advertised in the local newspaper of general circulation.

A public meeting was held on July 26, 2022, during a Meridian City Council meeting. A public meeting was held on July 26, 2022, during a Meridian City Council meeting. City Council adopted the Consolidated Plan, Citizen Participation Plan, and Analysis of Impediments to Fair Housing Choice on August 9, 2022.

Three residents offered their public comments. The first resident who spoke said the City should not take the funding because we were creating debt for our children and grandchildren. The second resident described the CDBG funded home rehabilitation of her house had substantially improved her health. And, the final resident asked questions about the CDBG program and how the money was allocated. City Council decided to extend the public comment period until August 9th in order to allow the maximum level of public engagement. On August 9th, 2022, the Meridian Senior Center board members gave a joint public comment in support of the Consolidated Plan. Board members were appreciative that the Plan would help support transportation for seniors. The City Council accepted and recorded all comments.

**TABLE 4 – CITIZEN PARTICIPATION OUTREACH**
NEEDS ASSESSMENT

NA-05 OVERVIEW

Needs Assessment Overview

The Needs Assessment (NA) of the Consolidated Plan provides a profile of the City's population, median income, household demographics, housing problems, cost burden, and crowding. HUD Comprehensive Housing Affordability Strategy (CHAS), American Community Survey (ACS), and Census data were used to help assess the City's priority needs, which will form the basis for the Strategic Plan and the activities that will be supported with CDBG funding.

Key data from the 2016—2020 ACS 5-Year Narrative Profile

- In 2016-2020, there were 38,049 households in Meridian, Idaho. The average household size was 2.82 people.
- In Meridian, Idaho, 36.7% of all households have one or more people under the age of 18; 24.3% of all households have one or more people 65 years and over.
- There are 1,422 grandparents lived with their grandchildren under 18 years old. Of those grandparents, 47.2% were responsible for the basic needs of their grandchildren.

Poverty

- In 2016-2020, 6.5% of people were in poverty. An estimated 6.8% of children under 18 were below the poverty level, compared with 4.9% of people 65 years old and over. An estimated 6.7% of people 18 to 64 years were below the poverty level.
- 5.1% of households received SNAP (the Supplemental Nutrition Assistance Program).
- 60.2% of households that received SNAP had children under 18
- 24.5% of households that received SNAP had one or more people 60 years and over.
- 25.9% of all households receiving SNAP were families with a female householder and no spouse present.
- 48.1% of households receiving SNAP had two or more workers in the past 12 months.

Income

- The median income of households in Meridian city, Idaho was $76,403.
- An estimated 3.7% of households had income below $10,000 a year and 9.0% had an income of $200,000 or more.

Earnings

- An estimated 82% of households received earnings. An estimated 26.3% of households received Social Security and an estimated 20.4% of households received retirement income other than
Social Security. **The average income from Social Security was $22,488.** These income sources are not mutually exclusive; that is, some households received income from more than one source.

**Meridian**

**Hispanic origin and Race**

For people reporting one race alone,

- 89.5% were White;
- 1.0% were Black or African American;
- 0.4% were American Indian and Alaska Native;
- 2.5% were Asian;
- 0.1% were Native Hawaiian and Other Pacific Islander;
- 1.0% were some other race.

An estimated 5.5% reported Two or more races.

- An estimated 8.0% of the people in Meridian were Hispanic or Latino. People of Hispanic origin may be of any race.
- 84.9 percent of the people in Meridian were White alone, non-Hispanic.

**Nativity and Foreign Born**

- In 2016-2020, an estimated 95.5% of the people living in Meridian, Idaho were U.S. natives. 44.8% of the Meridian population were living in the state where they were born.
- Approximately **4.5% of Meridian residents in 2016-2020 were foreign-born.**
- 69.5% of foreign-born were naturalized U.S. citizens and an estimated **87% entered the country before the year 2010.**

**Language**

- Among people at least five years old living in Meridian in 2016-2020, **6.3% spoke a language other than English at home.** Spanish was spoken by 2.4% of people at least five years old; 1.8% reported that they did not speak English "very well."
- 2.4% spoke other Indo-European languages.

**Disability**

- In Meridian, among the civilian noninstitutionalized population, **8.2% reported a disability.** The likelihood of having a disability varied by age - from 2.5% of people under 18 years old, to 7.2% of people 18 to 64 years old, and to 26.2% of those 65 and over.

Summary of Housing Needs

In 1990, Congress passed the National Affordable Housing Act, which required that State and local governments participating in selected HUD grant programs prepare a Comprehensive Housing Affordability Strategy (CHAS). The CHAS was meant to serve as the strategic guide for housing and community development activities, particularly activities funded by HUD grants and targeted to low- and moderate-income households.

To support this analysis, HUD and the Census Bureau produced custom tabulations of the 1990 Census that provided grantees with information about low- and moderate-income households’ housing needs. As a planning document, the CHAS was superseded in 1995 by the Consolidated Plan, but the Census data's custom tabulations continue to be known as the "CHAS data." The CHAS data were updated following the Census 2000, and in 2009 they were updated to rely on the American Community Survey (ACS), the Census Bureau's new annual survey that replaced the long form of the decennial Census. The CHAS data combine ACS microdata with HUD-adjusted median family incomes (HAMFI) to estimate the number of households that qualify for HUD assistance. The CHAS data also incorporate household characteristics (race/ethnicity, age, family size, disability status) and housing unit characteristics (such as the number of bedrooms and rent/owner costs).

View Data in Table Format ↓
If the terms "area median income" (AMI) or "median family income" (MFI) are used in the CHAS, assume it refers to HAMFI. This is the median family income calculated by HUD for each jurisdiction to determine Fair Market Rents (FMRs) and HUD programs' income limits. HAMFI will not necessarily be the same as other calculations of median incomes (such as a simple Census number) due to a series of adjustments that are made.

The Community Housing Affordability Strategy (CHAS) evaluates the conditions of families in the lower 80% of the Housing Affordability Median Income for the area.

**Income Category**

- **Extremely low-income** 30% HAMFI
- **Very low-income** >30% - 50% HAMFI
- **Low income** >50% - 80% HAMFI
- **Low- and middle-income** <100% HAMFI
- **Upper income** >100% HAMFI

The most relevant income category is 80% of HAMFI because most HUD programs base eligibility on this threshold generally referred to as **low- to moderate-income**.

It is critical to understand how the US Department of Housing and Urban Development (HUD) evaluates income within a community. HUD sets income limits that determine eligibility for assisted housing programs including the Public Housing, Section 8 project-based, Section 8 Housing Choice Voucher, Section 202 housing for the elderly, and Section 811 housing for persons with disabilities programs.

In 2021 a family in Meridian is considered low- to moderate-income (80% HAMFI) if they make:

- $47,150 as a single person household
- $53,900 as a two person household
- $60,650 as a three person household
- $67,350 as a four person household
- $72,750 as a five person household
- $78,150 as a six person household

NOTE: Ada County is part of the Boise City, ID HUD Metro FMR Area, so all information presented here applies to all of the Boise City, ID HUD Metro FMR Area. HUD generally uses the Office of Management and Budget (OMB) area definitions in the calculation of income limit program parameters. However, to ensure that program parameters do not vary significantly due to area definition changes, HUD has used custom geographic definitions for the Boise City, ID HUD Metro FMR Area.

The Boise City, ID HUD Metro FMR Area contains the following areas: Ada County, ID; Boise County, ID; Canyon County, ID; and Owyhee County, ID.

Key Definitions

Small Family Households (2 persons, neither person 62 years or over, or 3 or 4 persons)

Large Family Households (5 or more persons)
**Elderly** – People aged 62 and up. "Elderly" refers to individuals 62-74, while those 75 and up may be referred to as "extra elderly" or "frail elderly." Individuals aged 75 and up are generally recognized as a population with different needs than those 62-74, so the CHAS data separates these groups.

**Other Family Households** - After considering families with children and older adult households, other households can be divided into those that include multiple members of a given family and those that do not. Other family households include those such as married couples who are childless, one or more parents with adult children at home, adult siblings sharing an apartment, and householders boarding an older adult parent.

**Data Source:** 2013-2017 CHAS
Describe the number and type of single person households in need of housing assistance.

Single persons experience a disproportionate housing cost burden across all income categories as renters. They are much more likely to be in a lower-income bracket and likely to have a cost burden.

- 190 single family household renters who are low- to moderate-income are experiencing crowding.
- 25 single family household homeowners who are low- to moderate-income are experiencing crowding.

Households and Families

In 2015-2019 ACS, there were 36,616 households in Meridian. The average household size was 2.78 people. In Meridian, single persons living alone are largely comprised of women. Single persons who are renting have a substantially higher cost burden and the single person who are homeowners.

Single-person households comprise 24.5 percent of the total households in Meridian

- Male householders comprise 8.1 percent of all Meridian residents
- Female householders comprise 18.3 percent of Meridian residents

Single household key data points from the tables above (2009-2013 ACS)

- Single-person households comprise 25% of extremely low-income renters (0-30% HAMFI)
- Single-person households comprise 40% of low-income renters with a cost burden of >50% (0 - 80% HAMFI)
- Single-person households comprise 18% of low-income homeowners with a cost burden of >50% (0 - 80% HAMFI)

Estimate the number and type of families in need of housing assistance who are disabled or victims of domestic violence, dating violence, sexual assault and stalking.

Disability

In an attempt to capture a variety of characteristics that encompass the definition of disability, the ACS identifies serious difficulty with four basic areas of functioning:

1. Hearing,
2. Vision,
3. Cognition
4. Ambulation

Overall, the ACS attempts to capture six aspects of disability: (hearing, vision, cognitive, ambulatory, self-care, and independent living); which can be used together to create an overall disability measure, or independently to identify populations with specific disability types.
In Meridian, among the civilian noninstitutionalized population in 2016-2020, **8.2% reported a disability.** The likelihood of having a disability varied by age - from 2.5 percent of people under 18 years old, to 7.2% of people 18 to 64 years old, and to **26.2% of those 65 and over.**

**Domestic Violence**

**Women's and Children's Alliance (WCA)** provides safe housing for women in the Boise Metropolitan Area. WCA focuses on providing shelter and supportive services to individuals impacted by domestic violence and/or sexual assault. These services are provided at no-cost, and span a four-county service area representing 30% of the population of the state of Idaho. The WCA has been at the forefront of providing services to women, men and their children healing from domestic abuse and sexual assault.

The City of Meridian's CBDG program helps to support a secure outreach program at the Meridian Library.

**WCA in 2020**

- WCA experienced a **57% increase in the total number of calls to our 24-hour hotlines** and **84% increase in the number of calls related to domestic abuse.**
- Client Advocates attended 1,374 full hearings—a **7% increase over 2019** and the majority of those were done virtually from the WCA.
- 19 emergency intakes into shelter—**more than four times the number of that in 2019** and of similar years prior. This illustrates clearly that homes are not safe for all.

WCA provides services to residents in Meridian but does not have shelter space within the City. Meridian Police Department and the school district both work to connect families and individuals who are experiencing domestic violence with the support and services provided by WCA and Faces of Hope.

WCA also is a recipient of grant funding through VAWA. The **S.T.O.P. (Services * Training * Officers * Prosecutors) VAWA program** supports communities in their efforts to develop and strengthen effective criminal justice strategies to address violent crimes of domestic violence, sexual assault, stalking, and dating violence, and the development and enhancement of victim services in cases involving these crimes.

**Faces of Hope** provides services to survivors of domestic violence, sexual assault, child abuse, elder abuse, and stalking. Their facility, located in Boise, is designed so that people affected by abuse can access all relevant services and help through a single door.

**What are the most common housing problems?**

According to the 2013-2017 ACS data tables, there are 33,200 households in Meridian. 6,464 households comprised of renters and homeowners have a housing cost burden of over 30% and account for 55% of total households. The challenges with cost burden fall most severely upon low-income households.

Most common housing problems for renters:
- 3,075 LMI homeowners with housing cost burden greater than 30%
- 1,220 LMI households who are renters with housing cost burden greater than 50%
- 205 LMI renters with substandard housing
- 185 LMI renters with overcrowding
- 45 LMI renters with severe overcrowding

Most common housing problems for homeowners:

- 3,389 LMI homeowners with housing cost burden greater than 30%
- 1,525 LMI homeowners with housing cost burden greater than 50% (and none of the other problems)
- 50 LMI homeowners with substandard housing
- 0 LMI homeowners with overcrowding
- 0 LMI homeowners with severely overcrowding

Housing affordability is the biggest challenge that low- and moderate-income residents face in Meridian.

Are any populations/household types more affected than others by these problems?

Renter households with worst-case housing needs are those with very low incomes that do not receive government housing assistance and pay more than one-half of their incomes toward rent, those that live in severely inadequate conditions, or both.

Priority problems trigger worst-case needs.

Two types of priority problems determine whether households have worst-case needs:

1. **Severe rent burden** means that a renter household pays more than one-half of its income for gross rent (rent and utilities).
2. **Severely inadequate housing**, which refers to units having one or more serious physical problems related to heating, plumbing, and electrical systems or maintenance

Describe the characteristics and needs of Low-income individuals and families with children (especially extremely low-income) who are currently housed but are at imminent risk of either residing in shelters or becoming unsheltered 91.205(c)/91.305(c)). Also discuss the needs of formerly homeless families and individuals who are receiving rapid re-housing assistance and are nearing the termination of that assistance

The major causes of homelessness for children in the U.S. involve both structural and individual factors, including:

1. The nation’s persistently high rates of poverty for families;
2. A lack of affordable housing across the nation;
3. Continuing impacts of the Great Recession;
4. Racial disparities in homelessness;
5. The challenges of single parenting; and
6. The ways in which traumatic experiences, especially domestic violence, precede and prolong homelessness for families.

Homelessness can have a tremendous impact on children – their education, health, sense of safety, and overall development. Fortunately, researchers found that children are also highly resilient. Differences between children who have experienced homelessness and low-income children who have not experienced homelessness typically diminish in the years following a homeless episode.

When compared to low-income and homeless families, children experiencing homelessness have been shown to:

- Have higher levels of emotional and behavioral problems;
- Have increased risk of serious health problems;
- Are more likely to experience separations from their families; and
- Experience more school mobility, repeat a grade, are more likely to be expelled or drop out of school, and have lower academic performance.

"National Alliance to End Homelessness"

The McKinney-Vento Act, which later became part of the No Child Left Behind Act (NCLB), mandates protections and services for homeless children and youth, including those with disabilities. The 2004 reauthorization of Individuals with Disabilities Education Act (IDEA) also includes amendments that reinforce timely assessment, inclusion, and continuity of services for homeless children and youth with disabilities.

McKinney-Vento Definition of Homelessness

Anyone who lacks a fixed, regular, and adequate nighttime residence including:

- Sharing the housing of others due to lack of housing, economic hardship, or similar reason
- Living in motels, hotels, trailer parks, camping grounds, due to lack of adequate alternative accommodations
- Living in emergency or transitional shelters
- Abandoned in hospitals
- Awaiting foster care placement
- Living in a public or private place not designed for humans to live
- Living in cars, parks, abandoned buildings, public train stations, etc.
- A migrant child who qualifies under any of the above
If a jurisdiction provides estimates of the at-risk population(s), it should also include a description of the operational definition of the at-risk group and the methodology used to generate the estimates:

Estimates of the at-risk population were made based on various information sources. Census, ACS, CHAS, and Point-in-Time Homeless data are used when available. If raw data is not available, information from agencies dealing with each type of client was requested based on current program usage.

Specify particular housing characteristics that have been linked with instability and an increased risk of homelessness

Housing cost burden continues to be a primary risk for low-income individuals and families with children at risk of experiencing homelessness.

The National Alliance to End Homelessness states that "low-income households are typically unemployed or underemployed due to many factors, such as a challenging labor market, limited education, a gap in work history, a criminal record, unreliable transportation or unstable housing, poor health, or a disability. For those who are low-income but employed, **wages have been stagnant and have not kept pace with expensive housing costs**. The typical American worker has seen little to no growth in his/her weekly wages over the past three decades. Too little income combined with the dwindling availability of low-cost housing leaves many people at risk for becoming homeless."

In addition to income, other characteristics can also predispose an individual or household to homelessness, including:

- Persons leaving institutions (detox, mental hospitals, prisons, etc.)
- Households paying more than 50% of income for housing costs
- Victims of domestic violence
- Special needs populations (persons with AIDS, disabilities, drug or alcohol addiction, etc.)
- Single parent head of households who are unemployed
- People who are doubling up in unstable living arrangements (and cannot be counted as homeless)
- Families living below the poverty level

Households that exhibit one or more of these characteristics constitute a population that is "at-risk" of becoming homeless. These individuals and families are at risk of becoming homeless because they have a lesser chance of making economic improvements in their lives.

**Discussion**

**Definition for “standard condition” and “substandard condition but suitable for rehabilitation”:** The City of Meridian uses a Habitability Checklist developed in coordination by City of Meridian CDBG and Building staff for all Homeowner Repair projects. This checklist addresses basic living requirements identified in Meridian’s Code of Ordinances. Selected conditions include structure and materials, access, space and security, interior air quality, water supply, sanitary facilities, thermal environment, natural or artificial lighting, food preparation areas, cleanliness, and carbon monoxide/smoke detectors.
Data on households is from the 2013-2017 ACS tables in this section.

**Extremely low-income families:**
- Meridian has **825 extremely low-income (0-30% HAMFI) families**. This group includes both small and large family households.
- 410 extremely low-income families who are renters have a housing cost burden over 30%.
- 280 extremely low-income families who are homeowners have a housing cost burden over 30%.
- 315 extremely low-income families who are renters have a housing cost burden over 50%.
- 265 extremely low-income families who are homeowners have a housing cost burden over 50%.

**Low-income families:**
- Meridian has **1,085 low-income (>30-50% HAMFI) families**. This group includes both small and large family households.
- 580 low-income families who are renters have a housing cost burden over 30%.
- 290 low-income families who are homeowners have a housing cost burden over 30%.
- 145 low-income families who are renters have a housing cost burden over 50%.

**Moderate-income families:**
- Meridian has **2,850 moderate-income (>50-80% HAMFI) families**. This group includes both small and large households.
- 545 moderate-income families who are renters have a housing cost burden over 30%.
- 930 moderate-income families who are homeowners have a housing cost burden over 30%.
- 0 of moderate-income families who are renters have a housing cost burden over 50%.
- 130 moderate-income families who are homeowners have a housing cost burden over 50%.

**Middle-income families:**
- Meridian has **11,915 middle-income (>80-100%HAMFI) families**. This group includes both small and large households.
- 0 of moderate-income households who are homeowners have crowding.
- 40 moderate-income renter single family households have crowding.

Housing affordability is a challenge for low- and moderate-income families in Meridian. Over 25% of all low- to moderate-income families have a housing cost burden over 30%. This challenge is most acute for families who are extremely low-income and renters.

**Renters**
Housing cost burden is the most significant housing problem for renters. Due to the newer housing stock in Meridian, substandard housing and overcrowding are not primary challenges for most renters.
- 3,075 low- to moderate-income homeowners with housing cost burden greater than 30%.
- 1,220 low- to moderate-income households who are renters with housing cost burden greater than 50%.
- 205 low- to moderate-income renters with substandard housing.
- 185 low- to moderate-income renters with overcrowding.
- 45 low- to moderate-income renters with severe overcrowding.
Owners

Homeowners in Meridian struggle with housing cost burden. Due to the newer housing stock in Meridian, substandard housing and overcrowding are not primary challenges for most homeowners.

- 3,389 low- to moderate-income homeowners with housing cost burden greater than 30%.
- 1,525 low- to moderate-income homeowners with housing cost burden greater than 50% (and none of the other problems).
- 50 low- to moderate-income homeowners with substandard housing.
- 0 low- to moderate-income homeowners with overcrowding.
- 0 low- to moderate-income homeowners with severely overcrowding.

Elderly persons:

- Meridian has 6,450 households with a household that contains at least one person 62-74 years of age.
- 12% of households with a person 62-74 are extremely low-income.
- 10% of households with a person 62-74 are low-income.
- 20% of households with a person 62-74 are moderate-income.
- 56% of households with a person 62-74 are middle to upper income.

Frail Elderly

- Meridian has 2,745 households with a person age 75 or greater.
- 17% of households with a person age 75 or greater are extremely low-income.
- 15% of households with a person 75 or greater are low-income.
- 20% of households with a person 75 or greater are moderate income.
- 48% of households with a person 75 or greater are middle to upper income.

Both elderly and frail elderly households have housing needs centered on maintaining affordable housing options. Many residents in this category also benefit from accessibility upgrades in their homes.

Single persons:

Single persons experience a disproportionate housing cost burden across all income categories as renters. They are much more likely to be in a lower-income bracket and likely to have a cost burden.

- 190 single-family household renters who are low- to moderate-income are experiencing crowding.
- 25 single-family household homeowners who are low- to moderate-income are experiencing crowding.
- In 2015-2019 ACS, there were 36,616 households in Meridian. The average household size was 2.78 people. In Meridian, single persons living alone are largely comprised of women. Single persons who are renting have a substantially higher cost burden and the single person who are homeowners.
- Single-person households comprise 25% of extremely low-income renters (0-30% HAMFI).
- Single-person households comprise 40% of low-income renters with a cost burden of >50% (0 - 80% HAMFI).
- Single-person households comprise 18% of low-income homeowners with a cost burden of >50% (0 - 80% HAMFI).

Single persons would benefit from additional single occupancy housing units and a lower cost burden.
Large families:

Large families are defined as households with 5 or more persons. In Meridian, there are a total of 3,820 large family households.

- 6% of large family households are extremely low income and 6% are low income.
- 15% of large family households are moderate-income.
- 14% are of large family households are middle income and 58% are upper income.
- A total of 205 large family households who are renters have a housing cost burden over 30%. This group accounts for 5% of all large family households.
- A total of 400 large family households who are homeowners have a housing cost burden over 30%. This group account for 10% of all large family households.

Large families’ unique housing needs include having enough bedrooms and space for all members and ensuring that the housing does not have a housing cost burden.

Public Housing residents:

There are no public housing units in Meridian.

Families on the public housing and Section 8 tenant-based wait list:

As of March 2022, there were a total of 2,500 applicants on ACHA’s Housing Choice Voucher waiting list. This includes 20% elderly households, 49% disabled households, and 48% families with minor children. For families on the waiting list, the most immediate need is access to affordable rental housing.

According to staff at BCACHA, the greatest need of voucher holders is the ability to find vacant and affordable rental units. Voucher holders who are successful in finding a rental still have to qualify for the unit by meeting the landlord’s screening criteria and voucher program requirements. As rents continue to increase across our community, it becomes even more difficult for voucher holders to locate housing options that will work with the voucher. The most common needs for applicants, other than a safe and affordable housing unit, are self-sufficiency programs that promote financial responsibility, employment opportunities, and healthy lifestyle concepts. ACHA partners with local agencies to address other immediate needs of residents.

Section 8 Voucher Holders:

The Section 8 Housing Choice Voucher Program serves approximately 2,230 low-income households throughout Ada County (156 Meridian households). Finding and maintaining housing is a primary housing challenge for Housing Choice Voucher Holders.

BCACHA launched a Landlord Incentive Program aimed at increasing affordable housing options for voucher holders. The program resulted in housing an additional 56 households within 6 months. Staff also conducted outreach to local landlords to develop and enhance relationships in order to increase the number of participating landlords.

Persons with HIV/AIDS and their families:

Idaho’s report on STIs only provides information on the age of the person at the time of diagnosis. Public Health District 4, which includes Ada, Boise, Elmore, and Valley County reported a total of 11 new HIV cases in 2019. Meridian residents with HIV have a wide range of service needs, including transitional housing, supportive housing, accessible housing, counseling, case management, transportation to healthcare facilities, and employment. All special needs populations require special consideration.

Victims of domestic violence, dating violence, sexual assault and stalking:

It is difficult to precisely estimate the number of Meridian residents who are victims of domestic violence, dating violence, sexual assault, and stalking. Victims often do not report the crimes to local law enforcement or seek services through the area domestic violence shelter.
Women’s and Children’s Alliance (WCA) provides safe housing for women in the Boise Metropolitan Area. WCA focuses on providing shelter and supportive services to individuals impacted by domestic violence and/or sexual assault.

In 2020, WCA reported that they provided services to 13,260 patients in Ada County. Some of these households entered the WCA program as Meridian residents or transitioned to being Meridian residents as they found housing.

- 74% of those receiving services was 20-64 years old.
- 4% were children 4 and under.
- 12% were children 5 – 19 years old.
- 10% were adults 65 years and older.
- 46% of patients were at or below the federal poverty level.

**WCA in 2020**

- WCA experienced a 57% increase in the total number of calls to our 24-hour hotlines and 84% increase in the number of calls related to domestic abuse.
- Client Advocates attended 1,374 full hearings—a 7% increase over 2019 and the majority of those were done virtually from the WCA.
- 19 emergency intakes into shelter—more than four times the number of that in 2019 and of similar years prior. This illustrates clearly that home is not safe for all.

WCA provides services to residents in Meridian but does not have shelter space within the City. The City of Meridian worked with the WCA and the Meridian Library District to secure an outreach space at the main branch of the Meridian Library to help residents connect with WCA services.

These clients need affordable housing to help them transition to a safer and more stable living environment. It can be challenging for clients to stay in their community when housing prices are high or the availability of housing stock is limited.

**Persons with disabilities:**

Meridian has a relatively small population of individuals under 65 with a disability. The national average for persons under 65 with a disability is 8.7%, 5.7% in Meridian. Individuals who have a disability have a wide range of needs depending upon their circumstances. Home accessibility improvements are often a high priority for individuals who have mobility challenges.

**Formerly homeless families and individuals who are receiving rapid-rehousing assistance and are nearing the termination of that assistance:**

Over the past couple of years, it has become increasingly difficult to track the outcome of persons who were formerly homeless or received rapid-rehousing assistance. A variety of community partners provided assistance during COVID to help households remain housed or to transition back to stable and permanent housing.

All local emergency homeless shelters refer families to CATCH of Ada County, including the Salvation Army Family Shelter, WCA, Interfaith Sanctuary, Boise Rescue Mission, and the City Light Home for Women and Children.

CATCH offers housing placement, rental assistance, case management, financial independence education, and CATCH Match through Rapid Rehousing programs in Ada and Canyon Counties.

In 2021, CATCH offered services under the Rapid Rehousing program to 150 families in Ada County.

Of those 150 families:

- 47 signed a lease and moved into new housing,
- 47 successfully graduated from the program and remain stably housed,
- 8 were unable to sustain their housing beyond the support of CATCH of Ada County.
Households that are transitioning back to stable and permanent housing often have challenges that limit their choices. Criminal records, bankruptcy and credit history, lack of employment, and lack of rental history all can make finding housing extraordinarily difficult. As households near the end of their rapid-rehousing assistance, housing affordability becomes an acute concern as rental assistance payments end.

Housing affordability, for all types of households, is the biggest challenge that low- and moderate-income residents face in Meridian.

**NA-15 DISPROPORTIONATELY GREATER NEED: HOUSING PROBLEMS – 91.205 (B)(2)**

Assess the need of any racial or ethnic group that has disproportionately greater need in comparison to the needs of that category of need as a whole.

**Introduction**

CDBG entitlement communities are to provide an assessment for each of the disproportionately greater needs identified. Although the purpose of these tables is to analyze the relative level of need for each race and ethnic category, the data also provides information for Meridian as a whole that can be useful in describing the overall need.

**Income Category**

- **Extremely low-income** 30% HAMFI
- **Very low-income** >30% - 50% HAMFI
- **Low income** >50% - 80% HAMFI
- **Low- and middle-income** <100% HAMFI
- **Upper income** >100% HAMFI

The most relevant thresholds are 50% and 80% of HAMFI because most HUD programs base eligibility on these thresholds (which are generally referred to as "very low-income" and "low-income," respectively).

**Housing Problems**

There are four housing problems in the CHAS data:

1. The housing unit lacks complete kitchen facilities;
2. The housing unit lacks complete plumbing facilities;
3. Household is overcrowded; and
4. Household is cost-burdened.

A household is said to have a housing problem if they have one or more of these four problems. Overcrowding is one of the four housing problems evaluated by HUD.

**HUD defines overcrowding as:**
- Overcrowding - More than one person per room.
- Severe overcrowding - More than 1.5 persons per room.

HUD defines cost burden as:

- Cost burden - Monthly housing costs (including utilities) exceeds 30% of monthly income.
- Severe cost burden - Monthly housing costs (including utilities) exceeds 50% of monthly income.

*The four housing problems are:
1. Lacks complete kitchen facilities, 2. Lacks complete plumbing facilities, 3. More than one person per room, 4. Cost Burden greater than 30%

**Housing Cost Burden**

With the cost of housing on the rise, researchers are reexamining the 30-percent rule of thumb for measuring rental burden. HUD defines cost-burdened families as those “who pay more than 30 percent of their income for housing” and “may have difficulty affording necessities such as food, clothing, transportation, and medical care.” Severe rent burden is defined as paying more than 50 percent of one’s income on rent.

The 30-percent rule — that a household should spend no more than 30 percent of its income on housing costs — has long been accepted in academic circles and is often included in blogs and websites on family budgeting. A recent Business Week article, however, argues that the 30-percent rule is “nearly useless.” The authors suggest that calculating housing cost burden using only income ratios oversimplifies the issue of housing affordability. Frank Nothaft, chief economist at Freddie Mac, is quoted in the article as saying, “If your income is $500,000 a year, you can pay 40 percent and still have money left. But if your income is $20,000 a year, it will be hard to make ends meet if you’re paying 30 percent of your income on rent.”

In discussing the rental affordability measurement to Business Week, David Bieri of the University of Michigan states that the 30-percent rule “[is] essentially an arbitrary number.” One of the arguments against the share of income approach is that different households earning the same annual income spend considerably different amounts of money on basic necessities. For example, families with children spend more on clothing, food, and medical bills than do single adults. Thus, a household with children that spends 50 percent of its income on housing might be cost burdened, whereas a single adult who earns the same salary and spends the same percentage of income on housing might not be. In addition, the share of income measure does not consider cost-of-living differences in areas where housing is expensive.

Data from the American Housing Survey and the American Community Survey indicate that severe rental burdens disproportionately impact poor families. The Worst Case Housing Needs surveys the number of very low-income families (those earning less than 50 percent of the area median income) who pay more than half their income in rent, have substandard housing conditions, or both.

*Rental Burdens: Rethinking Affordability Measures*, HUD PD&R Edge

It is critical to remember that while housing cost burden is an important factor in determining need and increased housing instability, there may be a larger group of residents in Meridian who are low- to moderate-income who have an affordable housing situation but are still in financial distress.

**Discussion**

Based upon the 2013-2017 CHAS data tables, housing problems for all categories of low- to moderate-income residents in Meridian fall within the racial and ethnic percentages of the overall population.
A disproportionately greater need exists when the members of a racial or ethnic group at a given income level experience housing problems at a greater rate (10% or more) than the income level as a whole.

**Severe housing problems** include:

- Overcrowded households with 1.5 persons per room, not including bathrooms, porches, foyers, halls, or half-rooms
- Households with cost burdens of more than 50% of income

Generally, severe housing problems in Meridian are caused by severe housing cost burdens of more than 50% of income.

The "2019 County Health Ranking Key Report" by the Robert Wood Johnson Foundation found that "many households are just one unforeseen event – an illness, job loss, financial crisis, or even a drop-in hour at work – from losing their home. The risk for homelessness is especially high for low-income families spending more than half of household income on housing costs. Families that face insecure housing, forced moves, or homelessness are more likely to experience poor mental or physical health and preventable hospitalizations. For children in these families, experiencing homelessness can also be harmful to brain and body function and development, with lifelong and cumulative negative health outcomes for the child, the family, and the community."

**TABLE 19 – SEVERE HOUSING PROBLEMS 80 - 100% AMI**

*The four severe housing problems are:
1. Lacks complete kitchen facilities, 2. Lacks complete plumbing facilities, 3. More than 1.5 persons per room, 4. Cost Burden over 50%

**Discussion**

A disproportionately greater number of housing problems would exist when members of any particular racial or ethnic group at an income level experience housing problems at a rate greater than 10% of the percentage of the same racial or ethnic group population as a whole.

There is minimal statistical variation in the overall population estimates and those broken down by low-to moderate-income levels. Generally, white alone residents are slightly more likely to not be low- to moderate-income. There is no racial disparity in Meridian, which meets the HUD definition.

**NA-25 DISPROPORTIONATELY GREATER NEED: HOUSING COST BURDENS – 91.205 (B)(2)**

This section evaluates the housing cost burden from a racial or ethnic group perspective. Cost burden is the fraction of a household's total gross income spent on housing costs. For renters, housing costs include rent paid by the tenant plus utilities. For homeowners, housing costs include mortgage payments, taxes, insurance, and utilities.

A disproportionate greater need exists when the members of a racial or ethnic group at an income level experience housing problems at a greater rate (10% or more) than the income level as a whole.
HUD defines cost-burdened families as those “who pay more than 30 percent of their income for housing” and “may have difficulty affording necessities such as food, clothing, transportation, and medical care.” Severe rent burden is defined as paying more than 50 percent of one’s income on rent.

The tables display cost burden information for Meridian and each racial and ethnic group.

**Cost Burden is described in the tables as:**

- No cost burden (less than 30%)
- Cost burden (30-50%)
- Severe cost burden (more than 50%)
- No/negative income.

No/negative income households are those whose income is zero or negative due to self-employment, dividends, and net rental income. These households are not included in the other two categories but still require housing assistance and are counted separately.

**TABLE 20 – GREATER NEED: HOUSING COST BURDENS AMI**

**Data Source:** 2013-2017 CHAS

**Discussion:**

A disproportionately greater need exists when the percentage of persons in a category of need who are members of a particular racial or ethnic group is at least 10 percentage points higher than the percentage of persons in the category as a whole. Within Meridian, no groups meet this HUD definition because the minority populations make up such a small part of the total population.
NA-30 DISPROPORTIONATELY GREATER NEED: DISCUSSION – 91.205(B)(2)

Are there any Income categories in which a racial or ethnic group has disproportionately greater need than the needs of that income category as a whole?

A disproportionately greater number of housing problems would exist when members of any particular racial or ethnic group at an income level experience housing problems at a rate greater than 10% of the percentage of the same racial or ethnic group population as a whole.

If they have needs not identified above, what are those needs?

Meridian does not have any groups that have disproportionately greater needs than the needs of any income category as a whole.

Are any of those racial or ethnic groups located in specific areas or neighborhoods in your community?

To assist communities in identifying racially/ethnically-concentrated areas of poverty (R/ECAPs), HUD has developed a census tract-based definition of R/ECAPs. The definition involves a racial/ethnic concentration threshold and a poverty test. The racial/ethnic concentration threshold is straightforward: HUD defines neighborhoods of extreme poverty as census tracts with 40 percent or more of individuals living at or below the poverty line. HUD supplements this with an alternate criterion because overall poverty levels are substantially lower in many parts of the country. Thus, a neighborhood can be a R/ECAP if it has a poverty rate that exceeds 40% or is three or more times the average tract poverty rate for the metropolitan/micropolitan area, whichever threshold is lower.

Meridian has no current nor past R/ECAP areas in mapping provided by HUD Open Data.
Boise City/Ada County Housing Authorities (BCACHA) provide affordable housing-related assistance to over 2,600 individuals and families every month, serving people with low and moderate incomes throughout Ada County. The Boise City Housing Authority and Ada County Housing Authority are legally separate, operated through a Joint Powers Agreement with a single staff overseen by a Board of Commissioners appointed and confirmed by the Mayor and City Council of Boise and the Ada County Commissioners.

In Ada County, BCACHA is responsible for delivering a number of federally funded programs, as well as housing authority bond-financed affordable housing developments for Boise, Garden City, Eagle, Star, Meridian, and Kuna. The service area holds a population of over 440,000 people and covers over 1052 square miles.

BCACHA does not manage or administer any housing units within the City of Meridian. Information on BCACHA in this section helps to illuminate the choices that are available to Section 8 voucher holders who may want to use BCACHA housing units and some programs. However, this would require the participant to move outside of Meridian.

Housing Choice Vouchers
BCACHA administers federally funded programs to provide monthly rental assistance to qualified tenants in privately owned rental housing. The Housing Choice Voucher Program provides qualified participants with a housing voucher that can be used in a variety of rental dwellings and locations with almost any property owner who is willing to participate in the program.

Low Rent Public Housing
The Low Rent Public Housing program provides housing in apartments and duplexes for qualified low-income families, including seniors and those with a disabling condition. The public housing program is federally subsidized and is targeted to provide suitable living environments free from discrimination.

Market-Rate Housing
BCACHA owns and maintains an inventory of market-rate rental housing options. Properties are scattered throughout Boise.

Project-Based Vouchers
BCACHA provides 40 Project-Based Vouchers for residents of a new permanent supportive housing project, New Path Community Housing. These vouchers help sustain the area's first “Housing First” project, providing housing and supportive services to the most vulnerable in our community. The Housing Authority will cover most of the rent and utilities for the community once it becomes occupied.
Home Ownership and Family Self-Sufficiency Programs
The FSS program enables families who are participants in the Housing Choice Voucher program to link with local career counselors, training and educational programs, and job search and retention services to become self-sufficient within five years. Additionally, a variety of programs administered through the Housing Authority has enabled families to attain homeownership.

Supportive Housing Programs
BCACHA also provides assistance through these innovative programs:

- CHOIS (Coordinated Housing Options & Individualized Services),
- Shelter Plus Care,
- HUD-VASH (Veterans Affairs Supportive Housing),
- HOPWA (Housing Opportunities for Persons Living with AIDS/HIV),
- VAWA (rental assistance through the Office on Violence Against Women), and
- Allumbaugh House (the region’s no-cost sub-acute mental health and detoxification center with services provided through Terry Reilly Health Services).

Data Source: PIC (PIH Information Center)
Section 504 Needs Assessment: Describe the needs of public housing tenants and applicants on the waiting list for accessible units:

Section 504 of the Rehabilitation Act of 1973 prohibits discrimination on the basis of disability in any housing that receives federal assistance, including public housing. PHAs are required to assess the needs of current tenants and applicants on its waiting list for accessible units and the extent to which the needs have not been met. In the event a tenant or applicant does require an accessibility modification or accommodation, the housing authorities provides the assistance necessary to ensure that the tenant or applicant maintains a safe and healthy living environment.

According to BCACHA, as of April 2022,

- 30% of applicants on the Public Housing waiting list reported being elderly; and
- 82.5% reported having a disability.

There are 564 households on the Public Housing and Section 8 New Construction waiting lists. These high-rise buildings are designated for the elderly and/or disabled. Waiting lists are maintained by date and time of application only, and BCACHA does not track the number of applicants needing an accessible unit. Twenty-one (21) of the housing authority-owned units are accessible – 6/93 at Capitol Plaza, 4/67 at Franklin Plaza, 10/80 at Shoreline Plaza, and 1/10 at our scattered site properties. When an elderly or disabled applicant reaches the top of the waiting list, a resident in an accessible unit is transferred to a non-accessible unit and the applicant needing the features of the accessible unit is moved in.

Most immediate needs of residents of Public Housing and Housing Choice voucher holders

Section 504 of the Rehabilitation Act of 1973 prohibits discrimination on the basis of disability in any housing that receives federal assistance, including public housing. PHAs are required to assess the needs of current tenants and applicants on its waiting list for accessible units and the extent to which the needs have not been met. In the event a tenant or applicant does require an accessibility modification or accommodation, the housing authorities provides the assistance necessary to ensure that the tenant or applicant maintains a safe and healthy living environment.

According to BCACHA, as of April 2022,

- 30% of applicants on the Public Housing waiting list reported being elderly; and
- 82.5% reported having a disability.

There are 564 households on the Public Housing and Section 8 New Construction waiting lists. These high-rise buildings are designated for the elderly and/or disabled. Waiting lists are maintained by date and time of application only, and BCACHA does not track the number of applicants needing an accessible unit. Twenty-one (21) of the housing authority-owned units are accessible – 6/93 at Capitol Plaza, 4/67 at Franklin Plaza, 10/80 at Shoreline Plaza, and 1/10 at our scattered site properties. When an elderly or disabled applicant reaches the top of the waiting list, a resident in an accessible unit is transferred to a non-accessible unit and the applicant needing the features of the accessible unit is moved in.
Most immediate needs of residents of Public Housing and Housing Choice voucher holders

According to staff at BCACHA, the greatest need of voucher holders is the ability to find vacant and affordable rental units. Voucher holders who are successful in finding a rental still have to qualify for the unit by meeting the landlord’s screening criteria and voucher program requirements. As rents continue to increase across our community, it becomes even more difficult for voucher holders to locate housing options that will work with the voucher. The most common needs for applicants, other than a safe and affordable housing unit, are self-sufficiency programs that promote financial responsibility, employment opportunities, and healthy lifestyle concepts. ACHA partners with local agencies to address other immediate needs of residents.

As of March 2022, there were a total of 2,500 applicants on ACHA’s Housing Choice Voucher waiting list. This includes 20% elderly households, 49% disabled households, and 48% families with minor children. For families on the waiting list, the most immediate need is access to affordable rental housing. **Applicants residing in Meridian represent 12% of the households on the waiting list.**

How do these needs compare to the housing needs of the population at large

Households on the waiting list for public housing and tenant-based rental assistance share the same need of the population at large for decent affordable housing, including housing with accessibility features for people with disabilities and for seniors. Low wage earners have a high reliance upon public transportation, which can be challenging for households residing outside of the Boise area. BCACHA participants have the advantage of receiving affordable housing payments, which other extremely low- and very low-income households do not.

While most extremely-low and low-income renter households live in older buildings, other renter households had a somewhat larger amount of housing choices. However, these choices were still constrained by factors like availability, affordability, credit and criminal checks, and location.

Discussion

BCACHA owns, manages, and maintains 250 public housing units for low-income households. BCACHA does not manage or administer any housing units within the City of Meridian.

- 160 units are for elderly/disabled (Low Rent Public Housing)
- 80 units are HUD-assisted elderly/disabled (Section 8 New Construction Program)
- 10 units for families on scattered Sites (Low Rent Public Housing)
- 187 market rate housing units
- 4 units for Permanent Supportive Housing
- 441 total owned units, all managed by BCACHA
The **Section 8 Housing Choice Voucher Program** serves approximately 2,230 low-income households throughout Ada County (156 Meridian households). This program allows clients to choose affordable rental units that meet program requirements within Ada County. Once an affordable rental unit has been identified the household may pay a portion of the rent, based on income. BCACHA provides the Section 8 rental subsidy portion to the landlord.

Actions to address the needs of public housing include:

- Opportunities for residents and community members to become involved with the development of policies, programs, and services regarding public housing.
- Implement activities that recognize residents and community members as a positive resource for effective and responsible public housing.
- Coordinator and catalyst in developing opportunities for public housing residents—aimed at increasing economic and human potential.
- Public housing residents assist in designing ACHA strategies, participate in on-site resident council/groups and activity committees, and increase communication of resources for residents.
- BCACHA employs two full-time Service Coordinators to assist residents in connecting with community services and programs to assist them in maintaining independent housing.

BCACHA launched a **Landlord Incentive Program** aimed at increasing affordable housing options for voucher holders. The program resulted in housing an additional 56 households within 6 months. Staff also conducted outreach to local landlords to develop and enhance relationships in order to increase the number of participating landlords.

The BCACHA entered into a sub-recipient agreement with Ada County in response to the COVID-19 pandemic, to administer **$12.7 million** of the **Emergency Rental Assistance Program (ERAP)** to help Ada County residents pay rent and utility costs in order to maintain housing stability. As of January 31, 2022, the initial round of funding received for the program was 100% expended and resulted in serving 2,784 households. BCACHA has received additional funding beyond the initial award and continues to support households who have been affected by the pandemic. Approximately **20% of assisted households were Meridian residents.**
Introduction:

The U.S Department of Housing and Urban Development (HUD) funds local homeless assistance and prevention networks called Continuums of Care (CoC). Idaho is divided into two CoCs: Boise City Ada County (Region Seven) and Balance of State (Regions One through Six). In addition to organizing, delivering, and reporting on housing and services for people who are experiencing homelessness, CoCs are required to complete a one-night point-in-time count of homeless persons during the last ten days in January. Idaho’s annual Point-In-Time (PIT) count was conducted on the night of February 23, 2022.

The data from PIT Counts helps determine the amount of funding awarded for homeless programs, reports changes among the homeless population and raises public awareness of homelessness. Data from the one-night PIT count and the longitudinal data collected by the Homeless Management Information System (HMIS) are the primary sources used to measure the progress in meeting the national strategic goal of preventing and ending homelessness.

The primary goal of the PIT Count is to provide a one-night “snapshot” of the number of people who are homeless who are either living on the streets, in places not meant for habitation, or are currently residing in emergency shelters or homeless transitional housing projects.

HUD’s definition of homelessness for the PIT count does not include persons who may be staying with friends or relatives, in a hotel/motel, in a treatment facility, or in jail. While persons in these circumstances may be at imminent risk of becoming homeless, the focus of the PIT Count is to identify those already experiencing homelessness.

Using HUD’s definition of homelessness for the PIT count, CoCs are instructed to count all adults, children in households, and unaccompanied youth who, on the night of the count, reside in one of the places described below:

- An unsheltered homeless person resides in a place not meant for human habitation, a vehicle, or the streets. This count includes people in temporary tents, encampments, and warming centers.
- A sheltered homeless person resides in an emergency shelter, transitional housing, or supportive housing for homeless persons who originally came from the streets or emergency shelters.

Due to the nature of a one-night count, the uses of the PIT Count data and its limitations should be noted. It is understood that a one-night point in time count has limitations and in any given year may under-count or over-count the population of those who are homeless when compared to
data collected over a more extended period of time or at other periodic intervals. The most significant value of the PIT Count is that it is an unduplicated count of both sheltered and unsheltered persons experiencing homelessness on one night. Decreases or increases in the number of persons counted from year to year may indicate a change in the homeless population, external circumstances, or both.

External factors affecting the count include the number of organizations participating in the count, persons who are homeless not accessing shelter or services during the count, volunteers experiencing difficulty finding those who are living on the street who agree to be surveyed, weather or natural disasters, community events, and new or closed projects.

The NA-40 Homeless Needs Assessment data represents the point-in-time count for all of Region 7. Data listed is for Region 7, including Ada County, City of Boise, and City of Meridian. The PIT count does not provide data specifically for the City of Meridian.

**TABLE 25 - HOMELESS NEEDS ASSESSMENT**

Data Source Comments:
Youth Homelessness

Unaccompanied Youth

Parenting Youth

Goals:
- Reduce Unaccompanied Youth Homelessness from 2021 to 2022
- Reduce Parenting Youth Homelessness from 2020 to 2021

BCAC has Met this goal for ES & UN projects:
- Unaccompanied Youth has decreased by 22%.
- Parenting Youth households has decreased by 100%.

Veteran Homelessness

Goals:
- Decrease Total Veteran Homelessness by at least 5% from 2021 to 2022
- Decrease Unsheltered Veteran Homelessness by at least 5% from 2021 to 2022

BCAC has Not Met this goal for ES, TH, UN projects:
- Total Veterans has increased by 17%.
- Unsheltered Veterans has decreased by 20%.
If data is not available for the categories "number of persons becoming and exiting homelessness each year," and "number of days that persons experience homelessness," describe these categories for each homeless population type (including chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth):

Our Path Home submitted its final data from the Point-in-Time (PIT) Count & Housing Inventory Chart (HIC) for Ada County to the federal government. The Count found a total of 620 people experiencing homelessness on the night of February 23rd, 2022. While Our Path Home has seen a minor decrease in the 2022 PIT Count compared to 2020, all of Our Path Home’s partners have seen an increase in people accessing their resources. The Point-in-Time-Count (PIT) & Homeless Inventory County (HIC) helps monitor trends over time but is only one piece of information used by communities to determine the current need.

Key findings from the 2022 Homeless Count include:

- 620 people were experiencing homelessness
- 464 were staying in a homeless shelter (6.6% decrease from 2020)
- 80 people were living unsheltered (3.6% decrease from 2020)
- 76 were in transitional housing (13.4% increase from 2020)

Chronically Homeless
The chronically homeless are defined as an unaccompanied homeless individual with a disabling condition or a family with a Head of Household who has a disabling condition, and who has either been continuously homeless for a year or more OR has had at least four episodes of homelessness in the past three years totaling 12 months or longer.

- 118 persons were identified as chronically homeless in Region 7. Over a third of chronically homeless individuals were unsheltered.

Families with Children

- The PIT counted 5 persons in households with unsheltered children and 86 persons in households with children who were sheltered. The 2022 PIT also was notable for having no persons in parenting youth households counted.

Veterans

- The PIT reported 97 veterans who were homeless. There were 93 homeless veterans who were sheltered and 4 who were unsheltered.
The United States Interagency Council on Homelessness (USICH) reports that 3 states, Connecticut, Delaware, and Virginia, have nearly eliminated homelessness for veterans and have robust systems in place to ensure that homelessness is rare, brief, and one-time. While Idaho has seen rates of homelessness amongst veterans drop dramatically over the past decade, there are still no communities that have met the USICH standard to end veterans' homelessness.

The Continuum of Care established a goal to "Decrease Total Veteran Homelessness by at Least 5% from 2021 to 2022." This goal was not met. Total Veterans experiencing homelessness has increased by 17%. The goal "Decrease Unsheltered Veteran Homelessness by at Least 5% from 2021 to 2022" was achieved. Unsheltered Veterans decreased by 20% in the 2022 PIT.

Unaccompanied Youth

- All unaccompanied youth in Region 7 were counted as sheltered. There was 18 unaccompanied youth who were counted. The Continuum of Care identified a goal to "Reduce Unaccompanied Youth from 2021 to 2022." The goal was met with a 76% decrease in 2022. Additionally, unaccompanied youth went from 15% of the homeless population counted in the 2021 PIT to 3% in 2022.

**Data Source**

**Comments:**

![2022 PIT Demographics](chart.png)
Estimate the number and type of families in need of housing assistance for families with children and the families of veterans.

Families with children continue to be one of the most vulnerable groups experiencing homelessness. The 2022 PIT does not provide information on families of veterans.

The major causes of homelessness for children in the U.S. involve both structural and individual factors, including:

1. The nation’s persistently high rates of poverty for families;
2. A lack of affordable housing across the nation;
3. Continuing impacts of the Great Recession;
4. Racial disparities in homelessness;
5. The challenges of single parenting; and
6. The ways in which traumatic experiences, especially domestic violence, precede and prolong homelessness for families.

2022 Point-in-Time-Count - Adult and Children Households

- Adults and children households were 15% of the population of persons experiencing homelessness. There were a total of 91 people in this category.
- Adults and children households have decreased by 57% since 2018. In 2018, 143 people were counted in this category and 91 in 2022.
- Five people in adult and children households were counted as unsheltered in 2022.

Information on the racial and ethnic groups of homeless persons was unavailable for Region 7 - Ada County.

Our Path Home established a goal to "Decrease Racial Disparity from 2021 to 2022." This goal checks whether Black or African American individuals make up more or less of the homeless population than they do of the general population. According to the 2020 American Community Survey, Black or African Americans comprise 1.2% of the Boise City/Ada County population.

The Continuum of Care has not met this goal. Black or African American individuals comprise 5.96% of the homeless population, up 0.39% from 5.58% in 2021.

The Continuum of Care has not identified any other racial or ethnic disparities in Region 7.

Describe the Nature and Extent of Unsheltered and Sheltered Homelessness.

The U.S. Department of Housing and Urban Development’s (HUD) definition of literal homelessness as defined in the Final Rule of the Homeless Emergency Assistance and Rapid Transition to Housing Act (HEARTH Act), as described in the following four categories:

1. Individuals and families who lack a fixed, regular, and adequate nighttime residence, including a subset for an individual who is exiting an institution where he or she resided for 90 days or less and who resided in an emergency shelter or a place not meant for human habitation immediately before entering that institution.
2. Individuals and families who will imminently lose their primary nighttime residence.
3. Unaccompanied youth and families with children and youth who are defined as homeless under other federal statutes who do not otherwise qualify as homeless under this definition.
4. Individuals and families who are fleeing, or are attempting to flee, domestic violence, dating violence, sexual assault, stalking, or other dangerous or life-threatening conditions that relate to violence against the individual or a family member.

Coordinated entry is an essential process through which people experiencing or at risk of experiencing homelessness can access the crisis response system in a streamlined way, have their strengths and needs quickly assessed, and quickly connect to appropriate, tailored housing and mainstream services within the community or designated region. When possible, the assessment provides the ability for households to gain access to the best options to address their needs, incorporating participants’ choice, rather than being evaluated for a single program within the system. The most intensive interventions are prioritized for those with the highest needs.

The number of persons counted in the Point In Time Count in Region 7 has continued to decrease over the past five years for both unsheltered and shelter persons experiencing homelessness.

- There were 517 people counted in an emergency shelter in 2018 and 464 in 2022 - a 10% decrease.
• There were 121 people counted in as unsheltered in 2018 and 80 in 2022 - a 50% decrease.

Discussion:

PRIMARY REASONS FOR HOMELESSNESS The top causes of homelessness are experiencing domestic violence or sexual abuse, an unexpected change or loss in income/job, being evicted or having a landlord dispute, and having a housing affordability issue. Such information assists in identifying and implementing appropriate and effective homelessness prevention initiatives based on local needs.

Primary reasons for homelessness;

• 28% domestic violence or abuse
• 25% other
• 20% lack/loss of income
• 18% forced out of housing
• 9% disability

2020 State of Homelessness in Idaho

NA-45 NON-HOMELESS SPECIAL NEEDS ASSESSMENT - 91.205 (B,D)

Meridian has a wide variety of public and private agencies that provide services to non-homeless special needs populations. US Census, American Community Survey data, and consultation with local stakeholder groups provided the data for the non-homeless special needs assessment.

Groups that require supportive housing includes but is not limited to:

• The elderly, age 65 and over, and the frail elderly, who are defined as elderly persons who require assistance with three or more activities of daily living such as bathing, walking, and performing light housework.
• Persons with mental, physical, and/or developmental disabilities.
• Persons with HIV/AIDS and their families.
• Victims of domestic violence, dating violence, sexual assault, and stalking.
• Persons with alcohol or other drug addictions.
• Individuals in need of housing due to criminal backgrounds.
• Individuals in need of housing due to evictions stemming from poverty.

There are several populations of residents that may need supportive housing in Meridian. These include elderly persons, frail elderly, persons with disabilities, persons with alcohol or other drug addictions, persons with HIV/AIDS and their families, and Section 108 Housing Choice Voucher Holders.

Elderly persons:
• Meridian has 6,450 households with a household that contains at least one person 62-74 years of age.
• 12% of households with a person 62-74 are extremely low-income.
• 10% of households with a person 62-74 are low-income.
• 20% of households with a person 62-74 are moderate-income.
• 56% of households with a person 62-74 are middle to upper income.

Frail Elderly
• Meridian has 2,745 households with a person age 75 or greater.
• 17% of households with a person age 75 or greater are extremely low-income.
• 15% of households with a person 75 or greater are low-income.
• 20% of households with a person 75 or greater are moderate income.
• 48% of households with a person 75 or greater are middle to upper income.
Both elderly and frail elderly households have housing needs centered on maintaining affordable housing options. Many residents in this category also benefit from accessibility upgrades in their homes.

Supportive Housing
Supportive housing is an innovative and proven solution to some of communities' toughest problems. It combines affordable housing with services that help people who face the most complex challenges to live with stability, autonomy, and dignity. People in supportive housing live more stable and productive lives. Residents of supportive housing are linked to intensive case management and voluntary, life-improving services like health care, workforce development, and child welfare.

Supportive housing improves:
• Housing stability
• Employment
• Mental and physical health
• School attendance
• Reduces active substance use
Supportive housing is permanent housing that has no time limit on residency assigned to it.

There are no supportive housing programs in Meridian.

Describe the characteristics of special needs populations in your community:

There are several populations of residents that may need supportive housing in Meridian. These include elderly person, frail elderly, persons with disabilities, persons with alcohol or other drug addictions, person with HIV/AIDS and their families, and Section 108 Housing Choice Voucher Holders.

Persons with disabilities:
Meridian has a relatively small population of individuals under 65 with a disability. The national average for persons under 65 with a disability is 8.7%, 5.7% in Meridian. Individuals who have a disability have a
wide range of needs depending upon their circumstances. Home accessibility improvements are often a high priority for individuals who have mobility challenges.

Types of Disabilities

- Hearing difficulty – 3.1%
- Vision difficulty – 1.3%
- Cognitive difficulty – 2.8%
- Ambulatory difficulty – 3.9%
- Self-care difficulty – 1.3%
- Independent living difficulty – 3.4%

2020 ACS 5-Year Estimates – S1080

Youth

Additionally, Meridian is a relatively young city, with persons under 18 accounting for 28.2% of the population, and children under 5 are 6.8% of the population. The national average for persons under 18 is 22.3% of the population. This large group relies on services to help nurture their growth into becoming productive and thoughtful future citizens. Factors surrounding schools, playgrounds, lead-based paint hazards, poverty, and crime play a significant role in ensuring that the city’s children are safe and grow up in livable neighborhoods.

Poverty

Meridian’s poverty rate is 6.5%. The US Census cautions that "poverty rate estimates are not comparable to other geographic levels due to methodology differences that may exist between different data sources." With this in mind, the US Census lists the national poverty rate as 11.5%

US Census QuickFacts, July 1, 2021 (V2021)

Persons who are experiencing addiction to alcohol or other drugs:
Excessive Drinking measures the percentage of a county’s adult population that reports binge or heavy drinking in the past 30 days. Excessive drinking is a risk factor for a number of adverse health outcomes, such as alcohol poisoning, hypertension, acute myocardial infarction, sexually transmitted infections, unintended pregnancy, fetal alcohol syndrome, sudden infant death syndrome, suicide, interpersonal violence, and motor vehicle crashes.

- 22% of Ada County residents have reported excessive drinking in the past 30 days

Alcohol-Impaired Driving Deaths is the percentage of motor vehicle crash deaths with alcohol involvement. Alcohol-Impaired Driving Deaths are reported for the county of occurrence. This is because it is more likely that the drinking behavior that led to the driving crash happened where the accident occurred rather than in the county where the people involved in the crash reside.

- Alcohol impaired driving deaths in Ada County – 34%

“County Health Rankings & Roadmaps: Ada County, Idaho” University of Wisconsin Population Health Institute
Substance Misuse
Data on substance misuse is collected and reported by Idaho’s seven (7) Health Districts. Meridian is covered by District 4, Center District Health.

Overdose death in District 4 in 2019
- 92 - natural and synthetic opioids
- 76 - oxycodone/hydrocodone/codeine
- 24 - morphine
- 25 - methadone
- 48 - synthetic opioid

“Substance Misuse Prevention Needs Assessment 2019” Idaho Office of Drug Policy
- 12.39% of residents in District 4 used an illicit drug in the past month among people aged 12 or older

Interactive NDUH Substate Estimates, Substance Abuse and Mental Health Data Archive

Public Housing residents: There are no public housing units in Meridian.

Families on the public housing and Section 8 tenant-based wait list:
As of March 2022, there were a total of 2,500 applicants on ACHA’s Housing Choice Voucher waiting list. This includes 20% elderly households, 49% disabled households, and 48% families with minor children. For families on the waiting list, the most immediate need is access to affordable rental housing.

Section 8 Voucher Holders:
The Section 8 Housing Choice Voucher Program serves approximately 2,230 low-income households throughout Ada County (156 Meridian households). Finding and maintaining housing is a primary housing challenge for Housing Choice Voucher holders.

What are the housing and supportive service needs of these populations and how are these needs determined?
The non-homeless special needs populations in Meridian have a wide range of service needs, including transitional housing, supportive housing, accessible housing, counseling, case management, transportation to healthcare facilities, and employment. All special needs populations require special consideration. While many persons within the special needs population do not rely on governmental assistance, some do.

Elderly and frail elderly persons may require supportive housing options that help provide access to medical care, transportation, accessible housing, and case management.

Persons with disabilities (mental, physical, developmental) may require support housing options that include group living arrangement, access to transportation, accessible housing, counseling, and case management.

Persons who are experiencing substance use disorders may need supportive housing in a group living arrangement, access to transportation, access to health care, counseling services, and case management.
Public Housing residents: There are no public housing units in Meridian.

Section 8 Voucher holders may need assistance with maintaining stable housing and family self-sufficiency resources.

Persons with HIV/AIDS and their families: Meridian residents with HIV have a wide range of service needs, including transitional housing, supportive housing, accessible housing, counseling, case management, transportation to healthcare facilities, and employment. All special needs populations require special consideration.

Meridian does not have emergency shelter beds or a domestic violence shelter. Many residents need to travel to neighboring cities including Boise to get their services met. Additionally, Meridian lacks transitional housing facilities.

There is a strong demand for more special needs housing and assistance to help these populations stay in stable environments. These residents are often low- and moderate-income persons or are experiencing homelessness. Additionally, many of these residents fall within two or more special needs categories, such as being elderly and having a physical disability.

Discuss the size and characteristics of the population with HIV/AIDS and their families within the Eligible Metropolitan Statistical Area:

The Idaho Department of Health & Welfare Family Planning, STD, and HIV Programs (FPSHP) and the Idaho Advisory Council on HIV and AIDS (IACHA) use HIV/AIDS epidemiologic and surveillance data to provide guidance and funding for programs for persons with, or at risk for, HIV/AIDS. The goals of these programs are to prevent HIV infections and, for those who are infected, to promote testing, care, and treatment.

Reports and incidence rates of sexually transmitted infections (STI) in Idaho continue to increase. Incidences of chlamydia, gonorrhea, and syphilis infections have increased notably in Idaho since 2014. Since becoming a reportable disease in Idaho in 1986, rates of chlamydia have reached an all-time high. Recent increases in rates year-over-year have not been recorded in Idaho since the mid-1980s for gonorrhea and the mid-1950s for syphilis.

HIV infection: Thirty-five (35) HIV diagnoses were reported among Idaho residents during 2019, which was stable compared with the number of reports received during prior years. Over 85% of reports were among males with a bimodal distribution; most frequently reported among those aged 39 and 45-54 years.

Race-and ethnicity-specific incidence rates indicate disparities exist at a state level, although incomplete race and ethnicity data and small numbers necessitate caution when interpreting these rates. During 2019, chlamydia incidence rates among Idaho residents who were non-white were significantly higher than those who are white. Gonorrhea incidence rates in 2019 were significantly higher among American Indian/Alaska Native and black residents compared with white residents.

Idaho Reported Sexually Transmitted Diseases 2019
Idaho’s report on STIs only provides information on the age of the person at the time of diagnosis. Public Health District 4, which includes Ada, Boise, Elmore, and Valley County reported a total of 11 new HIV cases in 2019.

**HIV infection by age group, Public Health District 4, 2019**

**Housing Opportunities for Persons with AIDS/HIV (HOPWA)**

The HOPWA program fulfills the housing and/or service needs of people living with HIV/AIDS. Long-term rental assistance is offered while supportive services center around ensuring participants are able to retain their housed status.

This resource is made available through sponsor organizations throughout the State of Idaho that specialize in HIV/AIDS-related services and/or low-income rental assistance programs. **Idaho Housing and Finance Association (IHFA)** currently contracts with HOPWA service providers throughout the State of Idaho that specialize in HIV/AIDS-related services and/or low-income rental assistance programs. There is currently no HOPWA service in Meridian.

**Discussion:**

Meridian and the surrounding community have a variety of services available for individuals with special needs.

**Meridian Senior Center**

The Senior Center offers active, healthy, and creative activities, along with opportunities for life enhancement programs to their members.

- Activities and events for seniors
- Free Attorney visit
- Weekly lunches
- Blood sugar testing
- Foot clinic
El-Ada Community Action

El-Ada Community Action Partnership (El-Ada) is a 501(c)(3) non-profit corporation and was established in 1967 as a part of the Economic Opportunity Act. El-Ada works to reduce poverty, revitalize low-income communities, and to empower low-income families and individuals to become fully self-sufficient.

Idaho Division of Vocational Rehab

The Idaho Division of Vocational Rehab is a state agency that is primarily federally funded and receives a small portion of matching funds. The organization supports individuals with disabilities and trains them to be successful in employment beginning at age 14.

Substance Use Disorder Programs

There are a variety of drug and alcohol recovery programs in Meridian. Local providers include Zelus Recovery, Cottonwood Creek, Center for Behavioral Health, Ascent Behavioral Health, and Harmony House. St. Luke’s Hospital has an addiction and substance abuse program for teens in the Pediatric Behavioral Health Department.

Idaho State Independent Living Council

The Idaho State Independent Living Council is the statewide entity that works with independent living centers to support individuals and families with disability. The Council works on systemic issues through advocacy, public outreach, and education.

Metro Meals on Wheels

Meals on Wheels Metro Boise delivers and serves more than 1,500 meals each weekday (up 300 meals a day over this time last year) to homebound seniors throughout Ada County, Emmett, Middleton, and a portion of Caldwell.

PEER Wellness

PEER Wellness is a recovery community center that provides intervention and long-term support for adults with behavioral health issues. Services include recovery coaching, support groups, social events, connections to treatment, advocacy, and community education events.

Supportive Housing and Innovative Partnerships (SHIP)

SHIP provides transitional housing for individuals and veterans with substance abuse, mental health issues, and who are experiencing homelessness. To provide well-rounded support, clients receive help with employment opportunities, transportation, enhanced safety, sober programs, and more. SHIP facilities include 13 houses, four vans, and many retail stores, all run by a team of 60 employees.
Describe the jurisdiction’s need for Public Facilities:

Public facilities generally include senior centers, homeless facilities, youth centers, childcare centers, neighborhood facilities, fire stations/equipment, health facilities, and facilities for special needs populations. Meridian’s continued growth will require constant investment in public facilities to help keep up with population growth and the need for services.

The City of Meridian lacks homeless facilities.

- No homeless emergency shelter space is available in Meridian.
- Meridian does not have a domestic violence shelter.
- There are no transitional housing facilities in Meridian.

Residents who are the most vulnerable are those that are experiencing housing instability. Leaving the community for services in Boise, Nampa, or Caldwell, takes vulnerable residents away from their existing safety net of family, employment, schools, and religious community. Families that stay in their community have the best chances of quickly resolving their housing instability or financial challenges and minimizing the impact of homelessness on their children.

The City’s annual report highlights the public facility projects that have been completed and lays out a path for future investment.

One tool that is helping the City of Meridian with transportation and Responsible Growth is Urban Renewal Districts (URD). City Council approved these URDs during the last year to build off the success of other districts like the Ten Mile URD. Specifically, the Linder Urban Renewal District, which is planned to help fund the construction of the Linder Road Overpass. In addition, one new district was formed in downtown, the 126-acre Northern Gateway District, and the Union District was expanded. Both of these URDs will help with needed transportation projects and will help continue the revitalization efforts of downtown to enhance the quality of life for all residents.

Improved Open Spaces

Community Development has focused its efforts to change open space and amenity requirements in City Code. The latest changes include increasing the open space required for proposed subdivisions and clarifying the value of various amenities in new projects. Projects zoned R-4, R-8, and R-15 now require 20 percent or 50 percent more open space, respectively. Also, larger projects require more amenities to be installed. An increase in the amount of open space required, based on the zoning of the property, provides more recreation space and helps preserve Meridian’s open space.

Streetlights

Several projects were completed in 2021 to deploy additional streetlights into the community as well as retrofit existing streetlights to LED bulbs. New streetlights were installed along sections of Chinden as part of the widening as well as in underserved areas on Ten Mile Road and near Chaparral Elementary School. In addition, 465 streetlights were upgraded to LED bulbs.
How were these needs determined?

The City conducted a comprehensive approach to determining the needs of the community.

- A public survey was distributed throughout the community to help determine the priority of potential projects.
- The City commissioned a study on the built environment of Meridian to determine where to prioritize resources.
- Several community partner and stakeholder meetings were held over the past year to listen to the needs of the community.
- A meeting was held for internal City employees and local housing providers to provide input on the growth of the City.
- Individual interviews were conducted with key partners and internal city staff.
- City and regional planning documents, HUD PD&R research, and other data points were reviewed.
- Information on the Consolidated Plan process, survey responses, and community feedback were presented to Meridian City Council.

Describe the jurisdiction’s need for Public Improvements:

The City of Meridian conducted a study, "Analysis of Built Environment and Opportunities for Improvement," to determine the community's needs for improved infrastructure and more livable neighborhoods for low- to moderate-income residents.

The study recommended:

- Continued homeowner rehabilitation assistance for income-eligible homeowners with needed improvements to preserve housing affordability, safety, and livability.
- Expanding recent efforts to provide needed sidewalks into low- and moderate-income residential neighborhoods.
- Installing streetlights in low- and moderate-income neighborhoods to improve safety.
- Develop more green spaces and parks in areas developed before the 1990s and coordinate efforts with the West Ada School District to ensure playground space is located near or at schools.
- Exploring the potential need for additional community centers to accommodate the drastic increase in population.
- Consider projects that will help improve food access in low- and moderate-income neighborhoods and develop community gardens.

Additionally, "City of Meridian's 2022-2025 Strategic Plan" outlined goals for improving transportation and infrastructure.

- Widen roads and improve intersections
- Improve sidewalk connections and accessibility
• Enhance our pathway network
• Invest in street lighting and safety.

How were these needs determined?

The City conducted a comprehensive approach to determining the needs of the community.

• A public survey was distributed throughout the community to help determine the priority of potential projects.
• The City commissioned a study on the built environment of Meridian to determine where to prioritize resources.
• Several community partner and stakeholder meetings were held over the past year to listen to the needs of the community.
• A meeting was held for internal City employees and local housing providers to provide input on the growth of the City.
• Individual interviews were conducted with key partners and internal city staff.
• City and regional planning documents, HUD PD&R research, and other data points were reviewed.
• Information on the Consolidated Plan process, survey responses, and community feedback was presented to Meridian City Council.

Describe the jurisdiction’s need for Public Services:

Public services generally include homeless/AIDS patient programs, senior services, handicapped services, legal services, youth services, transportation services, substances abuse services, services for battered/abused spouses, employment training, crime awareness/prevention, housing counseling, childcare services, health services, services for abused/neglected children, and mental health services.

Meridian accepts applications for public service projects to determine which projects best meet the needs of low- to moderate-income residents. The City looks for projects that will help substantially improve the lives of low- to moderate-income residents in Meridian.

How were these needs determined?

The City conducted a comprehensive approach to determining the needs of the community.

• A public survey was distributed throughout the community to help determine the priority of potential projects.
• The City commissioned a study on the built environment of Meridian to determine where to prioritize resources.
• Several community partner and stakeholder meetings were held over the past year to listen to the needs of the community.
• A meeting was held for internal City employees and local housing providers to provide input on the growth of the City.
• Individual interviews were conducted with key partners and internal city staff.
• City and regional planning documents, HUD PD&R research, and other data points were reviewed.
• Information on the Consolidated Plan process, survey responses, and community feedback was presented to Meridian City Council.
HOUSING MARKET ANALYSIS

MA-05 OVERVIEW

Housing Market Analysis Overview:

The purpose of the Market Analysis is to provide a clear picture of the environment in which the jurisdiction must administer its programs over the course of the Consolidated Plan. In conjunction with the Needs Assessment, the Market Analysis will provide the basis for the Strategic Plan and the programs and projects to be administered.

The Housing Market Analysis provides information on:

- Significant characteristics of Meridian's housing market in general, including the supply, demand, condition, and cost of housing.
- Housing stock available to serve persons with disabilities and other special needs.
- Condition and need of public and assisted housing.
- A brief inventory of facilities, housing, and services to meet the needs of homeless persons.
- Regulatory barriers to affordable housing.
- Significant characteristics of the jurisdiction's economy.

MA-10 NUMBER OF HOUSING UNITS – 91.210(A)&(B)(2)

Introduction

The United States needs more housing and more varied types of housing to meet households’ needs throughout the country. Some economists estimate that one consequence of the 2008 foreclosure crisis was the slow rebound in home construction while household growth continued, resulting in underproduction of housing by more than 3 million units.

Although home production has recently been on the rise, building permits, one indicator of new housing supply, remain below historical averages and far below the level needed to eliminate the deficit in housing.

The consequences of inadequate supply are higher housing costs for both renting and buying a home. More than 37 million renter and owner households spent more than 30 percent of their income for housing in 2019. In the years prior to the pandemic, low-interest rates for mortgage loans and increasing incomes, not lower home values, had reduced owner cost burden. For renters, increasing incomes were matched by rising rents, maintaining cost burdens despite a strong economy.

"Opportunities to Increase Housing Production and Preservation" HUD PD&R, September 7, 2021

The data tables are populated from the 2013-2017 American Community Survey (ACS) 5-Year Estimates.
- Residential properties primarily comprise traditional 1-unit structures (87%) and apartment complexes of 2 or more units (10%).
- Mobile homes, boats, RV, vans comprise 3% of the residential property units.
- Most owner-occupied (99%) and rental units (89%) have two or more bedrooms.

Ada County - Housing Conditions

Idaho Housing and Finance Association (IHFA)

Idaho Housing and Finance Association is a unique financial institution and administrator of affordable housing resources. IHFA functions as an agent for the U.S. Department of Housing and Urban Development and performs a variety of tasks associated with financing, developing or managing affordable housing.

IHFA Statewide Priorities

- Increase the supply of affordable rental housing in urban and rural communities;
- Reduce homelessness for Idaho’s youth, veterans and chronically homeless;
- Prevent homelessness through emergency housing assistance;
- Expand homeownership by providing reasonable educational and financial support;
- Financially and organizationally support community and local government investment in housing opportunities that are affordable; and,
- Preserve older, existing housing stock to maintain affordability.
Idaho Housing offers home loan options, including conventional loans, Rural Housing development, FHA and VA loans.

**Homebuyer Tax Credit (MCC)**
A Mortgage Credit Certificate (MCC) issued by Idaho Housing and Finance Association allows a homebuyer to claim a federal tax credit for 35% of the mortgage interest paid per year, up to $2,000 each year. The MCC is an actual tax credit, to use toward any federal taxes the borrower may owe, and it can be rolled over for up to 3 years. A homebuyer may be eligible to receive the tax credit for as long as he or she occupies the home.

**Down Payment / Closing Cost Assistance**
Idaho Housing offers down payment and closing cost assistance to homebuyers with good credit. If a borrower qualifies, these products can significantly reduce the amount of cash they'll need upfront to purchase a home.

**Second Mortgage**
- Can be used for down payment and closing cost assistance.
- Available for 2.5% or 3.5% when using the First Loan.
- Fixed-rate of 5% over 10 years with low monthly payments.
- Income limits up to $110,000 for some products.
- Credit score of 680 required or 640 when using the First Loan.
- Finally Home!® Homebuyer Education is required. Only one certificate is required per loan.
- Borrower must contribute at least 0.5% of the sales price of his OWN funds to the transaction.

**Forgivable Loan**
- No first time homebuyer requirement.
- Available for up to 3.5% of the sales price. Tiered forgiveness over seven years.
- A lien will be placed on the property.
- Can be used for purchase or refinances.
- Finally Home! Homebuyer Education is required. Only one certificate is required per loan.
- Borrower must contribute at least 0.5% of the sales price of their own funds to the transaction.

**Refinancing**
Idaho Housing offers cashout, rate/term, and streamline refinancing.

Figure 4: New Building Permits by Demographic Area, Ada County, 2021

New Building Permits
Describe the number and targeting (income level/type of family served) of units assisted with federal, state, and local programs.

**HUD Programs**

Assistance provided under HUD programs falls into three categories: public housing, tenant-based, and multifamily assisted or privately owned, project-based housing.

**Public housing** is a form of project-based subsidy because households may receive assistance only if they agree to live at a particular public housing project. In public housing, local housing agencies receive allocations of HUD funding to build, operate, or improve housing. The local agencies own the housing.

Currently, **tenant-based assistance** is the most prevalent form of housing assistance provided. Tenant-based programs allow participants to find and lease housing in the private market. Local public housing agencies (PHAs) and some state agencies serving as PHAs enter into contracts with HUD to administer the programs. The PHAs then enter into contracts with private landlords.

The third major type of HUD rental assistance is a collection of programs generally referred to as **multi-family assisted** or privately-owned, project-based housing. The subsidy arrangement is termed project-based because the assisted household may not take the subsidy and move to another location.

**Provide an assessment of units expected to be lost from the affordable housing inventory for any reason, such as expiration of Section 8 contracts.**

There is no anticipated loss of affordable housing units or expirations of Section 8 vouchers.

**Does the availability of housing units meet the needs of the population?**

The demand for housing continues to be one of the greatest challenges faced by residents in the Treasure Valley. However, the City of Meridian is making strides to increase the housing supply.

Community Planning Association of Southwest Idaho (COMPASS) has an annual report that outlines the housing market for the Treasure Valley. Their "2021 Development Monitoring Report" shows the progress made by Meridian.

**New Residential Units** (single-family, multi-family, and manufactured/mobile)

- In 2021, there were 10,833 new residential units in Ada and Canyon County. Meridian had 2,544 new residential permits accounting for 24% of all residential permits in the Treasure Valley.

**Describe the need for specific types of housing:**

Meridian needs affordable housing units that ensures that low- to moderate-income residents are spending no more than 30% of their monthly income on housing expenses. While there is a monumental amount of
new housing units in the community, it does not meet the financial needs of the community's residents that are most vulnerable to housing instability.

It is critical to understand how the US Department of Housing and Urban Development (HUD) evaluates income within a community. HUD sets income limits that determine eligibility for assisted housing programs including the Public Housing, Section 8 project-based, Section 8 Housing Choice Voucher, Section 202 housing for the elderly, and Section 811 housing for persons with disabilities programs. HUD develops income limits based on Median Family Income estimates and Fair Market Rent area definitions for each metropolitan area, parts of some metropolitan areas, and each non-metropolitan county. Meridian falls within the Boise City, ID HUD Metro FMR Area.

In 2021, a family in Meridian is considered low- to moderate-income if they make;

- $47,150 as a single person household
- $53,900 as a two person household
- $60,650 as a three person household
- $67,350 as a four person household
- $72,750 as a five person household
- $78,150 as a six person household

Most residents in Meridian either have a close family member or they themselves had an annual income that qualified as low- to moderate-income. Residents who fall within these income categories may have unique difficulties.

Discussion

Worst Case Housing Needs

Households with worst case housing needs are:

1. Very low-income renters;
2. Households with incomes at or below 50 percent of area median income;
3. Do not receive government housing assistance; and
4. Pay more than one-half of their income toward rent, live in severely inadequate conditions, or both.

The key to ending worst case housing needs is increasing affordable housing. In 2019, nationwide only 62 affordable units were available for every 100 very low-income renter households. Only 40 affordable units were available for every 100 extremely low-income renter households.

For most households, worst case needs are caused by severe rent burdens that is, paying more than one-half of income for rent. Inadequate market supply, competition for affordable units, and a shortage of rental assistance pose a substantial challenge for very low-income renter households.
There isn’t enough housing stock available that is affordable to the people who are most at risk of homelessness and housing instability.

**MA-15 HOUSING MARKET ANALYSIS: COST OF HOUSING - 91.210(A)**

**Housing Affordability in Meridian**
The rapid increase in the cost of housing for both renters and homeowners places low- and moderate-income residents in a position of having a housing cost burden.

**Housing is Out of Reach**
There is a significant gap between renters’ wages and the cost of rental housing across the United States. A full-time worker needs to earn an hourly wage of $15.40 in the Boise HMFA on average to afford a modest, two-bedroom rental home. The Housing Wage for a two-bedroom home is $19.27. That is $12.02 higher than the federal minimum wage of $7.25 and $4.35 higher than the Boise HMFA hourly wage of $14.92 earned by renters.

Renters with the lowest incomes face the greatest challenge in finding affordable housing. The average minimum wage worker in Boise HMFA must work nearly 106 hours per week to afford a two-bedroom rental home or 85 hours per week to afford a one-bedroom rental home at the average fair market rent.

The annual income needed to afford a two-bedroom in Boise HMFA is $40,080. The two-bedroom housing wage is $17.36. Many occupations do not earn enough annually to afford housing.

- Waiters and waitresses - $9.52 median hourly wage
- Fast food and counter workers - $9.60 median hourly wage
- Cooks, fast food - $9.98 median hourly wage
- Cashiers - $11.74 median hourly wage
- Home health and personal care aids - $11.95 median hourly wage
- Teaching assistants, except post-secondary - $12.00 median hourly wage
- Retail salespersons - $13.25 median hourly wage

**One-bedroom Housing Wage - $13.77**

- Nursing assistants - $14.28 median hourly wage
- Customer services representatives - $16.68 median hourly wage
- Construction laborers - $16.96 median hourly wage
Two-bedroom Housing Wage - $17.36

- Maintenance and repair workers - $18.50 median hourly wage
- Carpenters - $19.08 median hourly wage
- Elementary school teachers - $24.52 median hourly wage
- Secondary school teachers - $24.91 median hourly wage
- Registered nurses - $35.15 median hourly wage

### IDAHO

In Idaho, the Fair Market Rent (FMR) for a two-bedroom apartment is **$903**. In order to afford this level of rent and utilities — without paying more than 30% of income on housing — a household must earn **$3,010** monthly or **$36,116** annually. Assuming a 40-hour work week, 52 weeks per year, this level of income translates into an hourly Housing Wage of **$17.36**.

### FACTS ABOUT IDAHO:

#### STATE FACTS

- **Minimum Wage**: $7.25
- **Average Renter Wage**: $13.62
- **2-Bedroom Housing Wage**: $17.36
- **Number of Renter Households**: 189,292
- **Percent Renters**: 30%

**OUT OF REACH 2021 | NATIONAL LOW INCOME HOUSING COALITION**

---

**CONSOLIDATED PLAN**

**MERIDIAN**

**OMB Control No: 2506-0117 (exp. 09/30/2021)**
Is there sufficient housing for households at all income levels?

Data for monthly rent for fair market, high HOME, and low HOME rent is from the US Department of Housing and Urban Development from 2021. The lack of affordable housing impacts low- and moderate-income residents the greatest. The steadily increasing rent costs compound the financial struggles that these families are at risk of experiencing. Additionally, the growing need for new rental housing units and aged housing unit stock results in many renters living in substandard housing conditions.

Affordable, but not Available

Homes that are affordable to extremely low-income renters are not necessarily available to them. In the private market, households can occupy homes that cost less than 30% of their incomes, and many do. When higher-income households occupy rental homes also affordable to lower-income households, they render those homes unavailable to the lower-income households. Extremely low-income renters must compete with all higher-income households for the limited number of rental homes affordable to them in
the private market. To truly measure the housing options extremely low-income renters have, we must account for the fact that higher-income renters occupy some of the most affordable units. Rental homes are both affordable and available for households of a specific income group if the homes are affordable to them and they are not occupied by higher-income households.

**Extremely Low-income Renters**

The vast majority of extremely low-income renters work in low-wage jobs or are unable to work. With wages insufficient to pay for modest rental housing even when individuals work full-time year-round, a brief furlough or loss of hours, as we have seen over the past year, can create debts that renters can never repay. Extremely low-income renters in the labor force, many already struggling to pay their rents before the pandemic, were significantly impacted by COVID-19. Industries most affected by COVID-19 shutdowns consisted of a disproportionate share of low-wage work. Extremely low-income renters were likely impacted by the closures of restaurants, hotels, and other places of low-wage employment.

*The Gap, A Shortage of Affordable Homes, National Low Income Housing Coalition, March 2021*

**How is affordability of housing likely to change considering changes to home values and/or rents?**

**Rental Housing Stability**

As the economy improves, rental prices continue to increase. The trend over the past decade has been a higher rental increase than the increase in monthly wages. As this trend continues, it puts a more significant financial pressure on low- and moderate-income families who are spending an ever-increasing percentage of their income on housing costs.

As higher-income renters and distressed homeowners seek cheaper alternatives to their current housing, competition for less expensive rental homes may actually increase. Meanwhile, few of the lowest-income renters have the option of leaving the rental market altogether. Consequently, rents for the least expensive homes may be less responsive to economic downturns, and in some cases, they could even increase because of greater demand. Even if rents at the bottom-end of the market fall during a downturn, they will not fall sufficiently to provide extremely low-income renters with an adequate supply of affordable housing. Owners have an incentive to abandon their rental properties or convert them to other uses when rental income is too low to cover basic operating costs and maintenance. They have little incentive to provide housing in the private market at rents that are affordable to extremely low-income renters. During periods of economic growth, the private market on its own still does not provide an adequate supply of rental housing affordable to low-income households. The rents that the lowest-income households can afford to pay typically do not cover the development costs and operating expenses of new housing. While new construction for higher-income renters encourages a chain of household moves that eventually benefits lower-income renters, new luxury units may not impact rents at the bottom of the market as much as they do rents at the top.

*The Gap, A Shortage of Affordable Homes, National Low Income Housing Coalition, March 2021*

**Homeowner Housing Stability**
The **FHFA House Price Index (FHFA HPI®)** is a broad measure of the movement of single-family house prices. The FHFA HPI is a weighted, repeat-sales index, meaning that it measures average price changes in repeat sales or refinancings on the same properties. This information is obtained by reviewing repeat mortgage transactions on single-family properties whose mortgages have been purchased or securitized by Fannie Mae or Freddie Mac since January 1975. The FHFA HPI serves as a timely, accurate indicator of house price trends at various geographic levels. Because of the breadth of the sample, it provides more information than is available in other house price indexes. It also provides housing economists with an improved analytical tool that is useful for estimating changes in the rates of mortgage defaults, prepayments, and housing affordability in specific geographic areas.

The FHFA HPI Calculator is available on the FHFA website and provides data on the increase of house prices in Boise MSA measured quarterly. A quick calculation for a home purchased in 2019 Quarter 1 for $100,000 and sold in 2021 Quarter 4 would have an **appreciation of 67%** and have an estimated value of $167,000.

Continued housing cost increases will result in households that cannot convert their existing home into a larger home to accommodate a growing family, reduce the ability of renters to transition to homeownership, and cause the existing residents to be unable to purchase homes inside the City.

**How do HOME rents / Fair Market Rent compare to Area Median Rent? How might this impact your strategy to produce or preserve affordable housing?**

**Fair Market Rent**

Since 1974 the U.S. Department of Housing and Urban Development (HUD) has helped low-income households obtain better rental housing and reduce the share of their income that goes toward rent through a program that relies on the private rental market. A key parameter in operating the certificate and voucher programs is the **Fair Market Rent (FMR)**. FMRs play different roles in the certificate and voucher programs. In both programs, FMRs set limits.

In the certificate program, FMRs set limits on what units can be rented; in the voucher program, **FMRs set limits on the subsidy provided to the household**. Certificate program households **cannot rent units with gross rents exceeding the FMR**: the recipients receive a subsidy equal to the difference between the gross rent and 30 percent of their incomes. Voucher program households receive a subsidy equal to the difference between the FMR and 30 percent of their monthly incomes. Participants in the voucher program can choose units to live in with gross rents higher than the FMR, but they must pay the full cost of the difference between the gross rent and the FMR, plus 30 percent of their income.

FMRs function primarily to control costs. Research has shown that program recipients act rationally and choose units with gross rents close to the FMRs, that is, the best units available under program rules. While budget realities and sensitivities to public acceptance exert pressures to set FMRs at low levels, other concerns create countervailing incentives to raise FMRs.

**For the Section 8 program to work properly, certificate and voucher holders must have an adequate supply of decent, safe, and sanitary rental units to choose from.** Higher quality units command higher rents, so
FMRs must be sufficiently high to provide acceptable choices for participants. In addition, the certificate and voucher programs were designed to allow assisted households to choose among different neighborhoods. The FMRs must also be high enough to provide acceptable choices among neighborhoods.

Discussion

Quality Affordable Homes Critical to Good Health

When rents are high, families prioritize rent and utilities over food and health care, even when serious health conditions are part of the picture. Ensuring enough affordable homes are available can lead to healthier families and communities. In homes made affordable through rental vouchers, children are less likely to be hungry, less likely to be seriously underweight, and more likely to be in good health when compared to their peers in unaffordable homes. In communities with enough affordable homes, primary care visits go up by 20 percent, emergency room visits go down by 18 percent, and accumulated medical expenses go down by 12 percent.

Idaho rents have grown three times faster than renters’ household incomes, making it hard for many families to keep up. The shift to more expensive homes has caused median rent in Idaho to increase more than 30 percent since 1990 while Idaho median renter household income has increased by only 11 percent. Today, only one out of the top five Idaho occupations has a median wage that is above what is needed to afford rent in a typical 2 bedroom home in the state. None of the most common occupations have entry wages sufficient.

Today, Idaho has far fewer homes available to meet the needs of all renters. Overall, rents have been rising steadily in Idaho, even when accounting for inflation, leaving fewer affordable homes. While Idaho gained nearly 56,000 low or modest-income households since 1990, the state added less than 7,000 affordable rental homes.

_Housing Affordability in Idaho, November 2018_

_Housing Affordability in Idaho, November 2018_

MA-20 HOUSING MARKET ANALYSIS: CONDITION OF HOUSING – 91.210(A)

Housing is a major element of people’s material living standards. It is essential to meet basic needs, such as for shelter from weather conditions and to offer a sense of personal security, privacy, and personal space. Good housing conditions are also essential for people’s health and affect childhood development.

Housing is the key to reducing intergenerational poverty and increasing economic mobility. Research shows that increasing access to affordable housing is the most cost-effective strategy for reducing childhood poverty and increasing economic mobility in the United States. Stanford economist Raj Chetty found that children who moved to lower-poverty neighborhoods saw their earnings as adults increase by approximately 31%, an increased likelihood of living in better neighborhoods as adults, and a lowered likelihood of becoming a single parent. Moreover, children living in stable, affordable homes are more likely to thrive in school and have greater opportunities to learn inside and outside the classroom.
Increasing access to affordable housing bolsters economic growth. Research shows that the shortage of affordable housing costs the American economy about $2 trillion a year in lower wages and productivity. Without affordable housing, families have constrained opportunities to increase earnings, causing slower GDP growth. In fact, researchers estimate that the growth in GDP between 1964 and 2009 would have been 13.5% higher if families had better access to affordable housing. This would have led to a $1.7 trillion increase in income or $8,775 in additional wages per worker. Moreover, each dollar invested in affordable housing boosts local economies by leveraging public and private resources to generate income—including resident earnings and additional local tax revenue—and supports job creation and retention.

"The Problem," National Low Income Housing Alliance

Housing Rehabilitation

When low- to moderate-income families have a home that is unaffordable, the maintenance and upkeep on that housing units often is delayed or not addressed because of financial constraints. Housing rehabilitation is critical to ensure that residents have a safe, healthy, and livable home environment. Dilapidated housing can have an immediate impact on a family’s health. Lack of air conditioning in the hot summer months has been linked to a sharp increase in cardiovascular events. Mold, mildew, and other water leak issues often lead to asthma, headaches, and other serious conditions.

Definitions

The City of Meridian uses a Habitability Checklist developed in coordination by City of Meridian CDBG and Building staff for all Homeowner Repair projects. This checklist addresses basic living requirements identified in Meridian’s Code of Ordinances.

The table below displays the number of housing units, by tenure, based on the number of "conditions" the unit has.

Selected conditions are similar to housing problems in the Needs Assessment: (1) lacks complete plumbing facilities, (2) lacks complete kitchen facilities, (3) more than one person per room, and (4) cost burden greater than 30%.

### Need for Owner and Rental Rehabilitation

The Needs Assessment identified cost burden as the most common housing problem for Meridian low- and moderate-income residents. Over 8% of both owner-occupied homes and 13% of renter-occupied homes were built before 1980. This represents over 3,000 housing units within the City.

As these homes continue to age, repair and maintenance costs also increase. Cost burden does not include the repair and maintenance cost of the home. Consequently, if families struggle financially, they
will defer maintenance of their homes, causing a future need for standard and emergency residential rehabilitation.

The City does not collect data on abandoned vacant units or abandoned real estate-owned (REO) properties.

**Estimated Number of Housing Units Occupied by Low or Moderate Income Families with LBP Hazards**

Environmental lead is a toxic substance affecting the growth and development of up to one million U.S. preschool children today, with effects ranging from learning disabilities to death. High lead levels can cause many health problems by damaging the brain, nervous system, and kidneys. Lead poisoning can cause decreased intelligence, behavioral and speech problems, anemia, decreased muscle and bone growth, poor muscle coordination, and hearing damage. Lead exposures remain prevalent despite considerable knowledge and increased screening and intervention efforts.

Increased lead exposure and increased body burden of lead remain a significant problem for children in the United States. Lead is an environmental toxicant that may cause adverse health effects to the nervous, hematopoietic, endocrine, renal, and reproductive systems. Lead exposure in young children is particularly hazardous because children absorb lead more readily than adults. Many children exposed to lead do not exhibit any signs of the disease. The child's signs or symptoms could be mistaken for other illnesses, and the child goes undiagnosed. The developing nervous system of children is particularly more susceptible to the effects of lead. The underdeveloped blood-brain barrier in young children increases the risk of lead entering the developing nervous system resulting in neurobehavioral disorders. Blood lead levels (BLLs) at any detectable level have been shown to cause behavioral and developmental disorders; therefore, **no safe blood lead level in children has been identified.** It is increasingly important for continued childhood lead poisoning prevention education and awareness.

Lead-contaminated water, soil, and paint have been recognized as potential sources of children's lead exposure. **Dust from deteriorating lead-based paint is considered the largest contributor to the lead problem.** Until the 1950s, many homes were covered inside and out with leaded paints. Lead began to fall from favor in the 1950s but was still commonly used until it was banned in homes after 1977.

Because of the long-term use of lead-based paints, many homes in the United States contain surfaces with paint, which is now peeling, chalking, flaking, or wearing away. The dust or paint chips contain high levels of lead that easily find ways into the mouths of young children. A particular problem has emerged due to many homes with lead-based paints, which are now undergoing renovations. Often the dust created by this work has high lead levels, which are readily absorbed by the children's developing bodies.

Meridian has a small amount of housing built before 1980 that has the potential to be hazardous to children. Meridian's housing growth happened almost entirely after 1980. The City utilizes HUD CDBG funding for homeowner rehabilitation projects. All projects follow the Lead-Based Paint Rule including disclosure, testing, and clearance.
Meridian has around 3,000 housing units that were constructed prior to 1980. These housing units may have lead-based paint hazards that are harmful to the children living in them.

Discussion

The City does not currently have a complete inventory of vacant dwellings. The HUD prepopulated fields for "vacant units" and "REO Properties" are blank because data is not available for the jurisdiction.

MA-25 PUBLIC AND ASSISTED HOUSING – 91.210(B)

Boise/Ada County Housing Authority (BCACHA) owns, manages, and maintains 250 public housing units for low-income households. BCACHA does not manage or administer any housing units within the City of Meridian. Information on BCACHA in this section helps to illuminate the choices that are available to Section 8 vouchers holders who may want to use BCACHA housing units and some programs. However, this would require the participant to move outside of Meridian.

- 160 units are for elderly/disabled (Low Rent Public Housing)
- 80 units are HUD-assisted elderly/disabled (section 8 New Construction Program)
- 10 units for families on scattered Sites (Low Rent Public Housing)
- 187 market rate housing units
- 4 units for Permanent Supportive Housing
- 441 total owned units, all managed by BCACHA.

The Section 8 Housing Choice Voucher Program serves approximately 2,230 low-income households throughout Ada County (156 Meridian households). This program allows clients to choose affordable rental units that meet program requirements within Ada County. Once an affordable rental unit has been identified the household may pay a portion of the rent, based on income. BCACHA provides the Section 8 rental subsidy portion to the landlord.

Actions to address the needs of public housing include:

- Opportunities for residents and community members to become involved with the development of policies, programs, and services regarding public housing.
- Implement activities that recognize residents and community members as a positive resource for effective and responsible public housing.
- Coordinator and catalyst in developing opportunities for public housing residents—aimed at increasing economic and human potential.
- Public housing residents assist in designing ACHA strategies, participate in on-site resident council/groups and activity committees, and increase communication of resources for residents.
- BCACHA employs two full time Service Coordinators to assist residents in connecting with community services and programs to assist them in maintaining independent housing.

BCACHA launched a Landlord Incentive Program aimed at increasing affordable housing options for voucher holders. The program resulted in housing an additional 56 households within 6 months. Staff also
conducted outreach to local landlords to develop and enhance relationships in order to increase the number of participating landlords.

The BCACHA entered into a sub-recipient agreement with Ada County in response to the COVID-19 pandemic, to administer $12.7 million of the Emergency Rental Assistance Program (ERAP) to help Ada County residents pay rent and utility costs in order to maintain housing stability. As of January 31, 2022, the initial round of funding received for the program was 100% expended and resulted in serving 2,784 households. BCACHA has received additional funding beyond the initial award and continues to support households who have been affected by the pandemic. Approximately 20% of assisted households were Meridian residents.

TABLE 36 – TOTAL NUMBER OF UNITS BY PROGRAM TYPE

Data Source: PIC (PIH Information Center)

Describe the number and physical condition of public housing units in the jurisdiction, including those that are participating in an approved Public Housing Agency Plan:

BCACHA owns and manages two high-rise rental complexes and five scattered-site duplex public housing units in Ada County. No housing units are located in Meridian.

Information is included for BCACHA units outside Meridian because some Section 8 voucher holders transition into public housing. BCACHA also owns and manages a high-rise, Section 8 financed complex of 80 one-bedroom apartments. All three high-rise complexes serve elderly and/or disabled residents. The ten units at the scattered-site duplexes serve families.

Upgrades to the two high-rise apartments includes:

- Elevator modernization
- Upgraded windows and sliding glass doors on all floors
- Upgraded shower stalls in most units
• Upgraded security system with additional lighting and cameras
• Upgraded key fob system

Describe the restoration and revitalization needs of public housing units in the jurisdiction:

BCACHA continues to use capital funds to rehabilitate and modernize its public housing developments.

This includes items identified in the Capital Fund Program-Five Year Action Plan:

• Replace/repair water waste lines at Capitol and Franklin Plaza
• Replace exterior entry doors
• Replace common area lights to LED
• Conduct 5 year Standpipe test
• Conduct energy audit
• Repair concrete sidewalks and driveways
• Upgrade kitchen and bathroom
• Replace carpet and vinyl
• Finish interior garages
• Other apartment renovations

Describe the public housing agency's strategy for improving the living environment of low- and moderate-income families residing in public housing:

Improving the living environment of public housing residents involves providing activities that are designed to benefit the individuals and families by addressing a wide range of issues faced by low- and moderate-income persons, from physical problems with their environment to social issues.

It is a goal of the BCACHA to promote self-sufficiency and homeownership through the Family Self-Sufficiency program (FSS). BCACHA continues to maintain community partnerships and outreach to families that may qualify for homeownership to achieve this goal. The FSS program enables voucher holders to reduce their dependency on rental subsidies and encourages homeownership. While participating in the FSS program, participants work closely with the FSS Coordinators to identify and set goals to achieve self-sufficiency. The supportive services available to program participants include job training, financial counseling, networking/connecting with housing providers.

BCACHA actively marketed the Family Self-Sufficiency (FSS) program to existing voucher holders through quarterly newsletters, attending the annual recertification meetings for voucher holders to explain the programs, and regular outreach. HUD requires BCACHA’s FSS program to serve a minimum of 42 families. BCACHA served a total of 95 families in 2021, 23 of them being new enrollments. A few FSS successes include:

• Quarterly workshops for all participants that included topics such as debt reduction, job search and training, budgeting, and homeownership;
• Graduation of 2 families from the program after working with them to increase their earned income.
• The average amount of escrow that was disbursed to graduates was $5,932.
• Out of the 95 families that were served, 51% have escrow balances that were accrued by increasing their earned income.

Discussion:
BCACHA continues to meet the needs of those most vulnerable in the community. The City of Meridian and BCACHA work closely together on regional initiatives and to also ensure that BCACHA clients have access to the Meridian CDBG program. In previous years, BCACHA helped to administer a CDBG Homeownership Program for the City

MA-30 HOMELESS FACILITIES AND SERVICES – 91.210(C)

While many services are available in Boise, it is important to consider that the cost of transportation and the distance from Meridian make accessing services nearly impossible for many Meridian residents who are in crisis. Meridian lacks emergency shelter, transitional shelter, and permanent supportive housing within the City. Households experiencing homelessness often have to leave Meridian and their family, friends, and faith communities to access services in Boise - disconnecting them from their existing support network.

Our Path Home
Our Path Home is the Continuum of Care provider in Boise and Ada County. The City of Meridian participates as an active partner in the Continuum of Care. Data from the Continuum of Care on the City of Meridian is unavailable for the number of persons experiencing homelessness and specific numbers of persons being assisted through program. Information on the entirety of the Continuum of Care is provided in this section.

Our Path Home has the capacity to serve approximately 1,100 households per year: roughly 500 that are experiencing homelessness are already in a supportive housing program and about 600 that are at-risk of experiencing homelessness.

Particularly because of limited units affordable and accessible to households experiencing homelessness, many adult-only households and families with children languish on the Our Path Home CONNECT queue, sleeping in emergency shelter or on the street.

About 305 of the 500 households Our Path Home provides supportive housing to each year are already in permanent supportive housing units; these units do not often experience turnover. Once a tenant is leased-up in a permanent supportive housing unit, Our Path Home carries the cost of on-going rental assistance and support services and, therefore, must expand program capacity to serve more households.

The Scope of the Problem in Ada County
About 300 families and 350 adult-only households are in the queue at any given time; however, we know the number of households experiencing homelessness is greater.
To best estimate that number, three data points are triangulated:

**Households Entering the System**
- In 2020, 695 households entered the system through Our Path Home CONNECT.

**People Active in Emergency Shelter**
- In 2020, 2,149 people (1,924 households) were active in our emergency shelters.

**Point in Time Count**
- Every year, Our Path Home conducts a one-night count of anyone we can find that is either accessing emergency shelter or spending the night on the street. Since 2009, this number is in the range of 675-875 people, from a low of 694 in 2013, to a high of 872 in 2010. **In 2020, 647 people were counted.**

The table "Facilities and Housing Targeted to Homeless Households" shows the availability of emergency shelter beds, transitional housing, and permanent supportive housing beds that are available in the Boise/Ada Continuum of Care. **There are no housing facilities available to homeless households in Meridian.**

**TABLE 37 - FACILITIES AND HOUSING TARGETED TO HOMELESS HOUSEHOLDS**

**Data Source Comments:** This report is based on information provided to HUD by Continuums of Care in the 2021 Continuum of Care application and has not been independently verified by HUD. CoCs were instructed to collect data for a point-in-time during the last week of January 2021. The data presented in this report are limited to beds available for occupancy on the night of the count (beds under development are excluded). This data represent all resources available in the Boise/Ada County Continuum of Care. The shelter beds are not available in Meridian and require residents to go to Boise for services.
2020 State of Homelessness in Idaho

Idaho continues to be one of the fastest-growing states in the country. This growth has spurred tremendous economic development and a booming housing market. This environment has created great opportunities for some as well as great hardship for others. Affordable housing has become increasingly difficult to secure as rent rates continue to rise and rental vacancy rates reach virtually zero. Additionally, the COVID-19 pandemic triggered job loss and reduced wages, further adding to the housing instability of thousands of households throughout Idaho. Ultimately, homelessness is often the end result, and it does not happen by choice.

Homelessness stems from a variety of factors;

- Unemployment,
- Unforeseen life changes,
- Substance use,
- Medical emergencies,
- Domestic violence, or
- Mental health issues.

Often, it strikes the people you least expect. Housing instability is particularly challenging due to the limiting wage opportunity and other financial barriers caused by the pandemic. Nonprofits, community organizations, and response networks throughout Idaho continue to increase capacity, become more sophisticated, and collaborate in their efforts to provide housing and critical support services for the most disadvantaged among us.

2020 State of Homelessness in Idaho, IHFA, 2020
Jessie Tree leads the Treasure Valley on preventing eviction and homelessness by supporting our neighbors at risk of housing loss, empowering them to stay in their homes.

Jessie Tree provides **financial assistance** coupled with **case management** to households at risk of eviction and homelessness who are unable to pay rent. Case management includes landlord mediation, budgeting help, and housing stability planning, while financial assistance catches people up on the rent that they owe.

Jessie Tree also supports households in **eviction court** to keep them from getting an eviction on their record and stay out of homelessness.

**Terry Reilly Health Services**

Terry Reilly Health Services (TRHS) provides high-quality, accessible health care at a cost that is affordable to every family in the Treasure Valley. As a community health center, they serve Southwest Idaho with locations in Ada, Canyon, and Owyhee counties. Terry Reilly operates clinics with integrated medical, dental, behavioral health, and pharmacy services. This enables doctors, dentists, counselors, and
pharmacists to work together under one roof to provide the best care in a Patient Centered Medical Home.

In 2020, Terry Reilly provided services in Ada, Canyon, and Owyhee counties to:

- 2,690 homeless adults and children
- 5,915 behavioral health patients
- 730 women received prenatal care
- 5,328 uninsured patients
- 60,949 prescriptions were filled at TRHS Pharmacy

**TRHS Allumbaugh House**

Allumbaugh House provides access to medically monitored detoxification and mental health crisis services for residents of Ada, Boise, Valley and Elmore counties. The original partners for Allumbaugh House included the cities of Boise and Meridian, Ada County, Idaho Department of Health and Welfare, Boise City/Ada County Housing Authority, Saint Alphonsus Hospital, and St. Luke's Hospital. Terry Reilly contracts with these agencies to manage Allumbaugh House.

In 2020, Terry Reilly reported 731 admissions for mental health & detoxification services at Allumbaugh House.

**TRHS Patient Navigator**

Patient Navigators are trained to assist with:

- Apply for Medicaid, SNAP, ICCP, TAFI and other state programs
- Evaluate and apply for social security benefits (SSI and SSDI)
- Provide Medicare education and enrollment services
- Connect clients to housing resources in Ada and Canyon County
- Arrange transportation
- Locate food pantries
- Provide case management services
- Make referrals to community partners on behalf of the patient for areas including legal assistance, employment, internet access, safety, etc.

Women’s and Children’s Alliance (WCA) provides safe housing for women in the Boise Metropolitan Area. WCA focuses on providing shelter and supportive services to individuals impacted by domestic violence and/or sexual assault. These services are provided at no-cost, and span a four-county service area representing 30 percent of the population of the state of Idaho. The WCA has been at the forefront of providing services to women, men and their children healing from domestic abuse and sexual assault.

WCA in 2020

- WCA experienced a 57% increase in the total number of calls to our 24-hour hotlines and 84% increase in the number of calls related to domestic abuse.
- Client Advocates attended 1,374 full hearings—a 7% increase over 2019 and the majority of those were done virtually from the WCA.
• 19 emergency intakes into shelter—more than four times the number of that in 2019 and of similar years prior. This illustrates clearly that home is not safe for all.

WCA provides services to residents in Meridian but does not have shelter space within the City. The City of Meridian provides a secured outreach space at the Meridian Public Library to help residents connect with WCA services.
Idaho Youth Ranch - Hays House

Idaho Youth Ranch is a non-profit 501(c)(3) agency that offers emergency shelter, residential care, youth and family therapy, job readiness training, adoption services, and more for kids and their families. They also operate a network of thrift stores that help fund their youth programs and services.

Idaho Youth Ranch provides jobs for more than 400 Idahoans in communities across the state who staff our program operations, thrift stores, offices, and distribution centers.

Idaho Youth Ranch Hays House is the Treasure Valley’s only 24-hour shelter for runaway and homeless youth. The Youth Ranch is located in Boise. Services and referrals are also available to parents who need help addressing problems that disrupt a healthy home, including conflict, running away, homelessness, school problems, neglect or abandonment, poor communication, and illegal behavior.

Hays House offers:

- Respite care to give primary caregivers much needed relief and improve family stability.
- Drop-in services so young people can stop in for a safe place to get a warm shower, a hot meal, and more.

Hays House gives kids a safe, supportive, caring, stable place to live while they help find their way forward.

Support services include:

- Life-skills classes
- Family and Individual counseling from a master’s level clinician
- Structured educational support
- Community-based recreation
- Fun environment - complete with video games, arts and crafts, a live-in therapy dog, and more
- Access to an accredited academic program for grades 9 to 12 that includes GED instruction and testing

Safe Place

Idaho Youth Ranch Hays House is a Safe Place. The Safe Place program is for young people in need of immediate help and safety.

Idaho Youth Ranch’s Safe Place initiative is part of a national network of Safe Place programs in 40 states and the District of Columbia. Nearly 22,000 community businesses and organizations nationwide display the yellow Safe Place sign, making help readily available for youth. Safe Place locations include Idaho Youth Ranch Stores throughout the Treasure Valley and will soon be expanding to businesses & public places.
It is estimated over one million youth run away from home each year due to abuse, neglect, family conflicts, and other issues. The Safe Place program is an option for young people who feel they have nowhere to turn. In its last report in 2018, United States Interagency Council on Homelessness found that over 8,000 Idaho students were homeless. While most stay with friends or relatives or live-in motels, more than 400 were found to be unsheltered.

The Safe Place program has helped more than 330,000 youth nationwide since its inception in 1983 and currently serves more than 1,478 communities across the country.

National Safe Place Network also operates TXT 4 HELP, a 24/7 text-for-support service for youth in crisis. Teens can text the word “safe” and their current location to 4HELP (44357) and receive a message with the closest Safe Place location and the number for the local youth shelter. Users also have the option to text interactively with a mental health professional for more help.

Interfaith Sanctuary Shelter

Interfaith Sanctuary Shelter is home with a warm meal and a safe place to lay your head for all genders, races, religions, and sexual orientation. Services are provided in Boise. Access to these services would require a Meridian resident to travel into Boise.

Interfaith Sanctuary offers services to a wide sector of those experiencing homelessness, including two-parent intact families, single father families, and single mother families with a male child over age 12 who are not eligible for emergency shelter services at any other location in Boise. At other shelters in the Treasure Valley males over the age of 12 are not able to stay with females, so these families would risk being separated if they were not able to access Interfaith Sanctuary.

While the target population is men, women, and families who are homeless, other underserved populations are represented in this group including victims of domestic abuse, persons with mental and/or physical illness, veterans, persons with substance use issues, and those facing under/unemployment.

Daytime programming includes:

- **Family Daytime Programs** - Family case management, medical and mental health support, transportation, special kids' activities, group, and one on one support for preschool children.
- **Project Recovery** - Home to guests seeking recovery and supported through a partnership with Recovery 4 Life, a local behavioral health organization, to ensure Interfaith Sanctuary guests receive access to services and treatment that allows them to stay on a road to recovery.
- **Project Well Being** – Mental Health support, art therapy, fitness, meditation, counseling, med management and home to the homeless newspaper “Word on the Street”.
- **City of Boise Work Program** – Employs guests to help maintain Boise city and parks.
- **Doug Richards Cooking School** - a Food Service Training Program to get guests back to work in the Food Service Industry
Describe mainstream services, such as health, mental health, and employment services to the extent those services are used to complement services targeted to homeless persons.

All local emergency homeless shelters refer families to CATCH of Ada County, including the Salvation Army Family Shelter, WCA, Interfaith Sanctuary, Boise Rescue Mission, and the City Light Home for Women and Children. Additionally, the West Ada School District refers families they have identified as homeless.

Coordinated Entry
Coordinated Entry is an “airport hub” for ending homelessness, triaging situations and navigating people to resources that lead to safe, stable and healthy housing. It all starts with Coordinated Entry. CATCH operates Our Path Home Connect, Ada County’s Coordinated Entry system) and began operating Access Point (Canyon County’s Coordinated Entry system).

Our Path Home Connect reported the following for Ada County? In 2020:

- 689 households were served.
- 247 households with children and 442 adult-only households completed housing planning sessions.
- 52 households with children and 70 adult-only households were referred to housing interventions.
- 165 households with children and 176 adult-only households reported resolving their own housing crisis without assistance from service providers.

The Linda Fund
Early into implementing Our Path Home Connect, CATCH recognized an unmet need for resources available to adult only households. CATCH launched The Linda Fund in November 2017 to serve as a resource for households whose only barrier to escaping homelessness was having enough money saved up to be able to afford the deposit and first month of rent. This program removes the final barrier to housing by helping cover the cost of the deposit and/or first month of rent.

In 2020, CATCH housed 101 families under the Linda Fund in Ada County.

- Of those 101 households, eighteen were families with children under the age of 18 and 83 were adult-only households.
- On average it cost $1,310 for the deposit and first month’s rent to end each household’s homelessness.

Rapid Rehousing
CATCH offers housing placement, rental assistance, case management, financial independence education, and CATCH Match through Rapid Rehousing programs in Ada and Canyon Counties.

In 2021, CATCH offered services under the Rapid Rehousing program to 150 families in Ada County.
Of those 150 families:

- 47 signed a lease and moved into new housing,
- 47 successfully graduated from the program and remain stably housed,
- 8 were unable to sustain their housing beyond the support of CATCH of Ada County.

List and describe services and facilities that meet the needs of homeless persons, particularly chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth. If the services and facilities are listed on screen SP-40 Institutional Delivery Structure or screen MA-35 Special Needs Facilities and Services, describe how these facilities and services specifically address the needs of these populations.

**El-Ada Community Action Partnership**

The **Supportive Services for Veteran Families** provides a range of supportive services designed to promote housing stability for eligible very low-income Veteran families. Through the SSVF Program, El-Ada provides outreach, case management services and assists participants in obtaining VA benefits and other public benefits.

Limited temporary financial assistance is available to enrolled Veteran families participating in case management, and may include: partial or full month rent assistance; one time rent or utility deposit assistance; rental application fee assistance; and/or bus passes for their housing search.

In 2021, El-Ada assisted:

- 117 Veteran households
- 84% of Veteran households in El-Ada’s SSVF program exited into permanent housing

**Supportive Housing and Innovative Partnerships (SHIP)**

SHIP provides gender-specific safe and sober housing for persons in recovery from substance use and mental health issues. They provide support for Idaho’s veterans and persons in recovery.

- SHIP has partnered with the VA to provide housing to homeless veterans through the Safe Harbor and Grant Per Diem programs.
- Offenders currently living in a correctional facility can have their applications processed within two weeks of a tentative parole date.

**Veterans Affairs Supportive Housing**

The Veterans Affairs Supportive Housing (HUD-VASH) Program provides rental assistance to homeless Veterans and their families in combination with case management and clinical services through the Veterans Affairs Medical Center (VAMC) of Boise.

The Boise VA screens applicants for program eligibility and service needs. To be eligible the veteran must be homeless, qualify for VA healthcare benefits, and agree to case management services. If eligible, they
are referred to Boise/Ada County Housing Authority for rental assistance. BCACHA determines eligibility for rental assistance in accordance with HUD-VASH regulations.

**Coordinated Housing and Individualized Services (CHOIS)**

The Coordinated Housing Options and Individualized Services (CHOIS) program provides rental assistance and case management services to homeless and disabled individuals and families. The program is funded by the U.S. Department of Housing and Urban Development and operated by BCACHA in collaboration with several community agencies. Participants pay 30% of their income towards rent and utilities and receive ongoing supportive services. Applicants for the CHOIS program must be referred to the program through Ada County’s Coordinated Entry System, known as “Our Path Home.”

**Violence Against Women Transitional Housing Program**

The Transitional Housing program is a federally funded grant provided by the Office on Violence Against Women (OVW). It is designed to provide temporary housing for victims of domestic violence, sexual assault, and/or stalking and administered locally by BCACHA. The program also provides services to participants which may include case management, mental health counseling, transportation, and support groups. These services are provided under a contact by a local service provider. Survivors of domestic and/or sexual violence, dating violence, or stalking and are fleeing an abusive relationship are eligible to receive assistance through this program.

**MA-35 SPECIAL NEEDS FACILITIES AND SERVICES – 91.210(D)**

**Everyone needs safe, decent, stable housing.** For some of the most vulnerable people in America — people with mental illness, chronic health conditions, histories of trauma, and other struggles — a home helps them to get adequate treatment and start on the path toward recovery. But some conditions make it difficult for people to maintain a stable home without additional help. Supportive housing, a highly effective strategy that combines affordable housing with intensive coordinated services, can provide that needed assistance.

A broad body of research shows that supportive housing effectively helps people with disabilities maintain stable housing. People in supportive housing use costly systems like emergency health services less frequently and are less likely to be incarcerated. Supportive housing can aid people with disabilities in getting better health care, help seniors trying to stay in the community as they age, and support families trying to keep their children out of foster care.

Supportive housing is a highly effective strategy that combines affordable housing with intensive coordinated services to help people struggling with chronic physical and mental health issues maintain stable housing and receive appropriate health care.

**Permanence and affordability.** Tenants generally pay no more than 30 percent of their income for rent. They have the same rights and responsibilities as other renters, such as having the lease in their name and the right to privacy in their unit.
Integration. Individuals and families are able to live independently in apartments or single-family homes in residential neighborhoods. Tenants in supportive housing should have access to public transportation, grocery stores, parks, and other neighborhood amenities common to all other residents. Less accessible services put tenants’ housing and health at risk: if they are unable to travel to providers’ offices, for instance, they may stop using the services.

Emphasis on choice. Supportive housing maximizes client choice, in clients’ housing options and the services they receive. For instance, tenants can generally come and go as they please and have control over their daily schedule, like mealtimes and visitors. They also can direct the types of services they receive and the goals they set with the service provider.

Low barriers to entry. Supportive housing providers do not require clients to hit benchmarks before moving into housing or put other screening barriers in the way. Blanket bans on people with criminal histories or bad credit, for example, or requirements to meet goals, like employment or completing a course of treatment, before entering supportive housing would screen out the very people supportive housing aims to help. Individuals and families are able to live independently in apartments or single-family homes in residential neighborhoods.

"Supportive Housing Helps Vulnerable People Live and Thrive in the Community" Center on Budget and Policy Priorities, May 31, 2016

Including the elderly, frail elderly, persons with disabilities (mental, physical, developmental), persons with alcohol or other drug addictions, persons with HIV/AIDS and their families, public housing residents and any other categories the jurisdiction may specify, and describe their supportive housing needs

Meridian generally lack supportive housing supports for vulnerable residents. Permanent supportive housing is available in the neighboring communities.

Prisoner Reentry

The first year after release is a critical period during which released prisoners are most susceptible to reoffending, emphasizing the importance of post-release supervision.

Post-release supervision typically serves two primary functions with regard to preventing such recidivism:

1. Promoting the successful reintegration of prisoners back into society; and

Idaho Community Corrections embraces both roles, using individual support and community programs and services to promote successful reintegration into the community, and employing supervision functions to ensure that released prisoners are maintaining a drug- and crime-free lifestyle.

"Prisoner Reentry in Idaho", The Urban Institute, 2004
Reentry is the release planning process all offenders will go through including the continuation of services from the Institution to the community. The goal of reentry is to increase public safety and reduce recidivism by developing a release plan that best fits the offender’s needs. This is achieved through the prioritized provision and coordination of services necessary to facilitate a seamless transition of an offender from an Institution to the community. This process starts when the individual enters the Institution and continues when they are released into the community.

**Release planning includes several aspects such as treatment, housing, supervision, employment, education, healthcare, and other services.** By assessing the individual’s risk for recidivism and treatment needs, a comprehensive transition plan will be developed. By assessing each individual’s risk to the community and establishing services based on identified needs, those with the highest risk will receive the highest level of services. Establishing services to address the offender's identified needs in the community is a collaborative effort between state and local agencies.

*Reentry Services, Idaho Department of Correction*

Local services providers in Meridian report that it is extremely challenging for persons who are being released from prison/jail or who have a criminal background to find housing.

**Supportive Housing Helps People with Disabilities Live Stably in the Community**

In studies conducted of this population, at least 75 percent of homeless people with mental illness or other serious disabilities (including those who have been homeless for long periods) who entered supportive housing as part of such a study remained through the study’s end (usually 18 to 24 months). Few studies have followed tenants for much longer, of those that have, at least half of the tenants stayed for as long as five years.

Supportive housing achieves much better housing stability than case management without rental assistance. Tenant housing stability in supportive housing is similar to stability in more segregated housing and service models like group homes and nursing homes, but tenants highly prefer supportive housing. The success seems to hold for a range of disabilities — people with physical disabilities or chronic illnesses such as HIV/AIDS fare well in supportive housing, as do people with severe mental illness or substance use disorders.

People with disabilities who lived in supportive housing after release from jail or prison were 61 percent less likely to be re-incarcerated one year later than those not offered supportive housing. People with mental health disorders and other severe disabilities are also more likely than others to be incarcerated or to enter long-term health care institutions like nursing homes or psychiatric hospitals, or to cycle between institutionalization and homelessness. Many studies show that supportive housing successfully interrupts this cycle — people with histories of incarceration or institutionalization significantly reduce their use of those systems after moving into supportive housing.

Most studies recruit people from homeless shelters or off the streets, but a few small studies use supportive housing to help people move out of nursing homes or other institutions. One such study found
that a group in supportive housing recruited from psychiatric hospitals moved quickly out of the institutions and avoided subsequent homelessness, while a group without supportive housing exited institutions much more slowly and experienced more homelessness two years later.

The research on supportive housing designed to move people with disabilities directly out of jails or prisons is limited to a few studies, most of which are case studies. One of the most recent and well-designed tracked 121 participants who lived in supportive housing after release and 118 who did not. Those in supportive housing were 43 percent less likely to be rearrested on misdemeanor charges (though there was no difference in the likelihood of felony arrests), and were 61 percent less likely to be re-incarcerated one year later.

**Supportive Housing Helps Vulnerable People Live and Thrive in the Community**, Center on Budget and Policy Priorities, May 31, 2016

**AARP Network of Age-Friendly States and Communities (NAFSC)**

Like many cities across the country, Meridian is experiencing a demographic shift: since 2010, the median age has increased from 32 to 36, and the population of Meridian residents aged 65 or older has increased from 8.9% to 12.8%. Ensuring that our community is livable for residents of all ages is more important than ever. With this objective in mind, the City officially joined the **AARP Network of Age-Friendly States and Communities (NAFSC)** in May 2021, thereby gaining access to online informational resources provided by AARP, as well as best practices from other communities all across the country who are committed to making their areas more livable and age-friendly for people of all stages.

Cities that join the NAFSC participate in a structured, multi-year process of assessment, goal-setting, and action plan implementation, with the overall aim of improving their livability for residents. In 2021, City staff worked with AARP Idaho and Vitruvian Planning to create an initial assessment for the City of Meridian.

The City is using this assessment as a roadmap for a **Livability Working Group**, which will consist of key stakeholders whose insights and recommendations will help steer the process and lead to the creation of a livability action plan.

**Describe programs for ensuring that persons returning from mental and physical health institutions receive appropriate supportive housing**

Our Path Home, the local continuum of care provider for Ada County, works with a variety of community partners to help ensure that persons who are returning from mental and physical health institutions receive appropriate supportive housing. **St. Luke's Health System and St. Alphonsus Health System are both partners with Our Path Home.** They work with the other partners within the Continuum of Care to help ensure that resources are available to patients when they discharge from their services.

Our Path Home partners include;

<table>
<thead>
<tr>
<th>211 Idaho Care Line</th>
<th>A Body Mind and Wellness</th>
</tr>
</thead>
</table>
Specify the activities that the jurisdiction plans to undertake during the next year to address the 
housing and supportive services needs identified in accordance with 91.215(e) with respect to 
persons who are not homeless but have other special needs. Link to one-year goals. 91.315(e)

The non-homeless special needs populations in Meridian have a wide range of service needs, including 
transitional housing, supportive housing, accessible housing, counseling, case management, 
transportation to healthcare facilities, and employment. All special needs populations require special 
consideration. While many persons within the special needs populations do not rely on governmental 
assistance, some do.

**Meridian does not have emergency shelter beds or a domestic violence shelter.** Many residents need to 
travel to neighboring cities such as Boise to get their services met. Additionally, Meridian lacks 
transitional housing facilities.

There is a strong demand for more special needs housing and assistance to help non-homeless special 
needs populations stay in stable environments. These residents are often low- and moderate-income 
persons or are experiencing homelessness. Additionally, **many of these residents fall within two or more 
special needs categories, such as being elderly and having a physical disability.**

The City is not a participating jurisdiction receiving HUD HOME funding. While there is a great need for 
supportive housing in Meridian, the City’s CDBG allocation is not designed to support the building of new 
housing or supportive housing projects. The City is limited to clearance and acquisition as an eligible 
project; and is not a housing developer.

Additionally, tenant-based rental assistance programs that are often used to help support individuals with 
supportive housing options is also not allowable as a HUD CDBG project.

**For entitlement/consortia grantees:** Specify the activities that the jurisdiction plans to undertake 
during the next year to address the housing and supportive services needs identified in accordance 
with 91.215(e) with respect to persons who are not homeless but have other special needs. Link to 
one-year goals. (91.220(2))
The City of Meridian focuses Community Development Block Grant funding on helping low- to moderate-income residents gain and maintain access to affordable housing options. The City's support housing through its Homeowner Repair Program and Homebuyer Assistance Program.

Supportive services are provided through Boys and Girls Club, Meridian Senior Center, and Emergency Rental Assistance.

MA-40 BARRIERS TO AFFORDABLE HOUSING – 91.210(E)

**Negative Effects of Public Policies on Affordable Housing and Residential Investment**

Since 1990, Meridian has experienced exponential growth, becoming the second largest city in Idaho and one of the top ten fastest growing cities in the nation. Due to the desirability of the area, population growth will continue. Over the last 20 years, property in and around Meridian has changed from primarily agricultural and single-family residential to include a more diverse mix of residential types and commercial and industrial uses. That trend will continue as land traditionally used for agriculture develops at urban intensities. However, the foremost goals will remain to grow the city as a premier place to live, work, and play.

The City of Meridian desires, over time, all development within its Area of City Impact to be served with urban services from the City of Meridian. Such services primarily include sanitary sewer, water, reclaimed water, fire, police, and parks. Secondarily, the City considers the availability and capacity of the school system, transportation facilities, libraries, and storm water facilities in any review of development within the AOCI. All requests for annexation into the City limits will require that the owner extend City-owned services at the time of development.

The importance of cooperating with Ada County and neighboring cities is imperative to successful long-term land use, transportation, and utility planning. There are very significant financial and quality-of-life implications for not doing so. As such, the City of Meridian is committed to fulfilling the terms of its Area of City Impact Agreement with Ada County and coordinating with adjacent service providers.

Meridian aims to guide growth in a way that efficiently expands infrastructure and services to support sustainable growth patterns.

**Residential Land Use**

The purpose of this designation is to provide for a variety of housing types and densities varying from large estate or semi-rural lots to multi-family homes. In all cases, urban services such as sewer, water, parks, and emergency services should be provided.

The Comprehensive Plan encourages a variety of product types and lot sizes within every neighborhood. Gross residential densities are rounded to the nearest whole number. At the discretion of City Council, areas with a Residential Comprehensive Plan designation may request an office use if the property only has frontage on an arterial street or section line road and is two acres or less in size.
Housing

Opportunities for housing should be available for all income groups with a diverse mix including rural, modular, townhouses, apartments, workforce housing, large lot subdivision, and single-family homes ranging in size from one-bedroom to estate homes. A premier community needs a good cross-section of housing and therefore must guard against an abundance of subdivisions in similar and repetitive densities, appearances, and price ranges. Neighborhoods should also enhance and retain livability and value through innovatively designed amenities, pathways, public spaces, gathering spaces, and elements that promote social interaction and provide the city with a sustainable tax base. High-density housing must be strategically located to public transportation, community services, and employment areas.

As part of the City’s Vision, new neighborhoods should emphasize diverse open spaces and amenities, distinct, engaging places and identities, and Meridian’s strong historic character and charm.

Until 2014, Meridian’s population was distributed throughout the community primarily in detached single-family suburban-style developments. Increasingly, however, higher density housing is being constructed throughout the community, particularly near employment areas, major roadways, and regional attractions.

The City realizes that the baby boomer generation is aging and creating an increased demand for 55-plus-age non-single-family detached dwellings. Coupled with the fact that more young adults are waiting longer to have children and may not want large homes on large lots, this necessitates providing more diversity in housing choices. The majority of the growing senior population will prefer to “age in place” within existing neighborhoods. Many will seek residential accommodations to suit their emerging health and mobility needs. However, there will also be a growing demand for highly specialized senior living facilities within the community.

Meridian Comprehensive Plan, City of Meridian Idaho

Policy Priorities

The City of Meridian is consistently working to reverse any negative effects of public policies on affordable housing and residential investment. The Comprehensive Plan outlines specific policy priorities to be addressed and improved upon to help the City of Meridian best serve its residents.

The Meridian Comprehensive Plan, Policy Priorities include:

- Consider developing new subarea plans as appropriate for areas with unique characteristics, public/private partnerships in place, and that are compatible with Comprehensive Plan policies in order to provide additional guidance on future land uses, design, infrastructure, and amenities.
- Develop incentives for appropriate investment in strategic growth areas; discourage development outside of established growth areas.
- Improve the neighborhood meeting and public notice process.
- Evaluate comprehensive impacts of growth and consider City Master Plans and Strategic Plans in all land use decisions (e.g., traffic impacts, school enrollment, and parks).
• Coordinate with the City of Nampa, Canyon County, Star, Eagle, Kuna, Boise, and Ada County on land use, transportation, and emergency services.

• **Utilize preferred methods of communication with citizens and** engage their input on public facilities planning, construction, and funding.

• **Maintain an efficient and fair system of fees and development requirements** that assesses the costs and benefits of financing public facilities and services, the need for which is generated by new development.

• Require urban infrastructure be provided for all new developments, including curb and gutter, sidewalks, water and sewer utilities.

• **Encourage infill development.**

• Ensure a **variety and balance of land uses** within the Area of City Impact.

By working through each of these initiatives, the City will improve residential investment and access to affordable housing.
Economic Trends and Population and Household Trends

Ada County, ID Economic Trends and Population and Household Trends Ada County is the predominant county in the Boise City metropolitan statistical area (MSA). As of December 1, 2021, the population of Ada County was estimated at 517,200, reflecting an average annual increase of 12,950, or 2.8% percent, since 2015. By comparison, the population increased at an average annual rate of 2.0% percent, or 8,150, from 2010 to 2015. The number of households increased by an average of 4,300 annually, or 2.5%, since 2010, to 198,500.

Economic conditions in the MSA and Ada County are currently strong and payrolls and resident employment have recovered from the significant disruption in early 2020 caused by actions taken to contain the spread of COVID-19. During the 3 months ending (TME) November 2021, nonfarm payroll in the MSA increased by 7,700, or 2.2%, to 356,500, more than compensating for the loss of 2,100 jobs, or 0.6% a year prior. Current payrolls are 1.6% higher than payrolls during the TME November 2019 before the pandemic.

Resident employment in Ada County averaged 254,000 during the TME November 2021, up by 7,375 jobs, or 3.0% from a year ago, and compared with the loss of 3,750 jobs, or 1.5% a year before. The current level of resident employment is 1.4% higher than during the TME November 2019. The unemployment rate averaged 1.9% during the TME November 2021, down from 4.8% a year earlier.

**TABLE 44 - MEDIAN EARNINGS IN THE PAST 12 MONTHS**

**Data Source:** 2013-2017 ACS

Based on the Business Activity table above, what are the major employment sectors within your jurisdiction?

The major employment sectors in Meridian are:

- Advanced manufacturing,
- Health care and ancillary industries,
- Technology, and
- Professional services.
The City of Meridian, Department of Economic Development has a job growth plan to help encourage the growth of these key established sectors.

A Strong Medical Core

Anchored by St. Luke’s Hospital System, Blue Cross of Idaho, Idaho College of Osteopathic Medicine, and Idaho State University Health Science Center, Meridian’s health care industry enhances the City’s commitment to growing innovators in health, research and technology. There is a need for health care professionals at all education and experience levels in Meridian to help support future growth.

Professional Offices and Retail

With more than 16 million square feet of commercial real estate, Meridian offers spaces to suit any business operation. Class A office and medical buildings, manufacturing facilities and industrial parks, bustling retail centers, and land ready for development make up Meridian’s robust business community. The continued growth within this sector requires an increase in employees ready to adapt to a changing business world and with skills to meet market demands. Opportunities exist for entry level positions.

Built for Business, Designed for Living, City of Meridian, Economic Development Department

Boise Valley Economic Partnership (BVEP)

BVEP offers free, customized, confidential services and site location assistance to businesses and entrepreneurs interested in relocating, starting up, or expanding in the Boise Valley. They provide regional data on some of the largest employers in Meridian and the Boise MSA.

St. Luke’s
Idaho-based, not-for-profit health system
6,000-6,999 Employees

Micron Semiconductor
Manufacturing and technology
5,000-5,999 Employees

St. Alphonsus
A four-hospital regional, faith-based Catholic ministry providing award winning cardiac care, ER, urgent care, women’s health, orthopedic care and clinics.
5,000-5,999 Employees

Citi
The Boise/Meridian site is a strategic site for Citigroup, with multiple lines of business located on campus. Citi has approximately 200 million customer accounts and does business in more than 160 countries and jurisdictions. Citi provides consumers, corporations, governments and institutions with a broad range of financial products and services, including consumer banking and credit, corporate and investment
banking, securities brokerage, transaction services, and wealth management.

500-900 Employees

**Describe the workforce and infrastructure needs of the business community:**

Meridian continues have population growth at a steady pace. This population growth, coupled with an expanding healthcare and technology sector, will create demand for jobs at every skill level.

**Occupations in Demand**

Idaho Department of Labor’s In Demand Occupations tool allows users to filter jobs in Southwest Idaho by education requirement and industry. The tool describes the projected growth within a particular field by 2030. For unskilled and skilled labor, requiring no more than a high school diploma, construction, health care, and sales jobs will increase dramatically over the next decade.

- 61.8% anticipated growth rate for carpenters. Projected growth of 3,736 jobs.
- 35.1% anticipated growth rate for construction laborers. Projected growth of 2,014 jobs.
- 20.0% anticipated growth rate for office clerks. Projected growth of 1,767 jobs.
- 20.9% anticipated growth rate for home health and personal care aides. Projected growth of 1,681 jobs.

*Idaho Department of Labor, Occupations in Demand Tool*

**Describe any major changes that may have an economic impact, such as planned local or regional public or private sector investments or initiatives that have affected or may affect job and business growth opportunities during the planning period. Describe any needs for workforce development, business support or infrastructure these changes may create.**

**Meridian Opportunity Zone**

Private investment vehicles called Opportunity Funds that place 90 percent or more of their funds into an Opportunity Zone can earn tax relief on the capital gains generated through those investments. Tax benefits increase the longer investments are in place. Investors benefit from deferred capital gains taxes, capital gains tax reductions, appreciation exclusions.

The Meridian Opportunity Zone contains strong and emerging central markets for industrial companies, health science and higher education organizations, regional transit groups, small businesses, and housing. It is seen by the city as the key to connecting consumers, commuters and workers living across the Treasure Valley. The tract has convenient freeway access, well-built local roads and an active rail corridor boasting a strong infrastructural advantage in creating long-term opportunities for profitable investment, innovation and growth.

This corridor is marketed to attract health science and technology companies. With St. Luke’s Meridian Medical Center, Idaho Urologic Institute, Idaho State University and the Idaho College of Osteopathic Medicine, this area is slated for future health science and technology clustering. The corridor creates a clear need and opportunity for a specialized and highly-skilled workforce.
Meridian Idaho Opportunity Zone, Idaho Commerce

Tax Credit Incentives

Idaho has a strong approach to helping encourage the growth of local businesses and the relocation of businesses to the area. These programs have made a significant impact in the economic growth of the region.

Tax Reimbursement Incentive (TRI)
Companies creating new, high-wage jobs in Idaho can receive up to a 30% reimbursement on sales, payroll and corporate income taxes for up to 15 years. Companies must pay wages above the county average and create at least 50 new jobs in an urban area or 20 new jobs in a rural area.

Idaho Business Advantage
The Idaho Business Advantage incentive package offers an array of tax credits, sales-tax rebates, and property tax exemptions. To be eligible, businesses must invest $500,000 or more in new facilities and create 10 or more new jobs with salaries averaging $40,000 a year with benefits.

Workforce Development Training Fund
Companies that invest in training a talented team in Idaho are eligible to receive funds to develop their employees.

Idaho Opportunity Fund
The Idaho Opportunity Fund awards capital to communities seeking improvements to public infrastructure with the goal of attracting or retaining businesses. This fund is managed by the Director of Idaho Commerce.

3% Investment Tax Credit
Companies that invest in depreciable, tangible, personal property used in Idaho can earn a 3% income tax credit to offset up to 50% of tax liability and can carry the credit forward up to 14 years.

Idaho Power New Construction and Major Renovations Program
Idaho Power offers a handful of incentives and resources to support businesses conducting new construction, major renovations, retrofits, custom projects, industrial training and more.

How do the skills and education of the current workforce correspond to employment opportunities in the jurisdiction?

The City of Meridian has an economic development strategy that evaluated whether the skills and education of the workforce met the needs for employers. While the “A Five-Year Economic Development Strategy for Meridian” was commissioned in 2014, most of the analysis remains true today; there is a great need for a more skilled and educated workforce to help support the growth of Meridian over the next decade.

Workforce Limitations
Whether created locally or recruited, businesses and industry representatives noted, during the listening session for the economic development strategy, **the need for a more skilled workforce or for better programs geared to “reskilling” or “up-skilling” the workforce.** This need was particularly acute among agribusinesses. Businesses noted both in-person and via survey that there are opportunities to improve education-industry collaboration.

**Growth within State Impacts Talent Pool**

Much of Meridian’s and the region’s growth is migration from within the state and NW US. Several of Meridian’s competitors however, get most of their growth from either natural birth (Salt Lake City) or international migration (Seattle, Portland). The impacts of this for Meridian and Idaho is that unlike the international cities, Meridian’s employers will rely on the workforce that has been raised in Idaho and the NW, and consequently, their labor force skills are weak – due to Idaho’s poor educational attainment levels and poorly funded workforce programs.

The “**Five-Year Economic Development Strategy for Meridian**” made six recommendations that the consulting team felt would help bolster the economy in Meridian. The first recommendation was to take steps to improve the workforce. The assessment was that talent and innovative ecosystem cultivation was critical. The City was encouraged to leverage education business collaborations, talent development, and entrepreneurship to establish a foundation for making Meridian a capital for high-end research & commercialization activity.

**Describe any current workforce training initiatives, including those supported by Workforce Investment Boards, community colleges and other organizations. Describe how these efforts will support the jurisdiction’s Consolidated Plan.**

The Workforce Innovation and Opportunity Act (WIOA) is a federally funded program that establishes the Workforce Development System and provides funding to support training and employment services for adults, dislocated workers and low-income, out-of-school youth.

The **Workforce Development System** is comprised of a statewide Governor’s Workforce Development Council, a single state planning region, and numerous state and local employment and training organizations that work in partnership to bring services to Idaho students, job seekers and business customers.

Services provided may include:

- Receive financial assistance for short-term training.
- Receive supportive assistance (for example, required work clothing, textbooks, etc.).
- Attend training on job readiness, resume preparation and mock interview support.
- Match with employers who are hiring skilled workers.
• Find potential on-the-job training opportunities.

The **Work Opportunity Tax Credit (WOTC)** is a federal tax credit available to employers for hiring individuals from certain target groups who have consistently faced significant barriers to employment.

Targeted hiring groups in Idaho:

• Veteran receiving food stamps
• Unemployed veteran
• Disabled veteran
• Long-term Temporary Assistance for Needy Families recipients
• Temporary Assistance for Needy Families recipients
• Food stamp recipients
• Vocational rehabilitation referrals
• Ex-felons
• Supplemental security income recipients (SSI)
• Long-Term unemployment recipients

**Does your jurisdiction participate in a Comprehensive Economic Development Strategy (CEDS)?**

No

**If so, what economic development initiatives are you undertaking that may be coordinated with the Consolidated Plan? If not, describe other local/regional plans or initiatives that impact economic growth.**

Ada County does not have an Economic Development District, nor a Comprehensive Economic Development Strategy (CEDS) as outlined by the US Department of Commerce.

**Discussion**

**Migration Trends**

The relative affordability of housing in the Boise HMA has enticed jobseekers and retirees for decades, although the disparity in housing costs has shrunk in recent years. Net in-migration to the HMA in 2019 was highest from the Los Angeles-Long Beach-Anaheim, CA metropolitan area, where the **average sales price of a home** was **2.6 times greater than in the Boise HMA**, compared with 3.1 times higher in 2014. If the current trajectory holds, the relative affordability of the HMA will diminish, which could slow net immigration to the HMA.

*Comprehensive Market Analysis, Boise City Idaho*, HUD Office of Policy Development and Research, December 1, 2020

The continued outward migration of people from California, Oregon, and Washington will have pronounced impact in Meridian over the coming decades. It is difficult to anticipate how greatly this will
affect the lives of low- to moderate-income Meridian residents as the cost-of-living increases, housing prices continue to climb, and rapid growth impacts established families and communities.

Idaho State University - Meridian Campus

Idaho State University is a public research-based institution that advances scholarly and creative endeavors through academic instruction and the creation of new knowledge, research, and artistic works. ISU provides leadership in the health professions, biomedical, and pharmaceutical sciences, as well as serving the region and the nation through delivery of preeminent technical, undergraduate, graduate, professional, and interdisciplinary education. The University fosters a culture of diversity and engages and impacts communities through partnerships and services.

The ISU-Meridian Health Science Center, which spans four acres, houses nine distance-learning classrooms, the L.S. Skaggs Pharmacy Complex; Counseling and Speech and Language clinics; and human patient simulation and clinical/medical science laboratories. The Delta Dental of Idaho Dental Residency Clinic which opened in 2011, provides advanced training for dentists and treatment for underserved patients.

Unique to ISU-Meridian is its partnership with West Ada School District, whose administrative offices and Renaissance Magnet High School are adjacent to the University. Renaissance students interested in careers in medical sciences and research will have the opportunity to use ISU laboratories and resources.

ISU-Meridian serves as the higher education anchor of THE CORE, an 1,800-acre business enterprise corridor with public and private partners committed to building the economy through innovations in health, research and technology.

Comprehensive Housing Market Analysis Boise City, Idaho

U.S. Department of Housing and Urban Development, Office of Policy Development and Research
MA-50 NEEDS AND MARKET ANALYSIS DISCUSSION

Are there areas where households with multiple housing problems are concentrated? (include a definition of "concentration")

Concentration occurs when the area experiences multiple housing problems at a greater rate than the rest of the community.

HUD uses four housing problems in the CHAS data to define a housing problem:

1. Housing unit lacks complete kitchen facilities;
2. Housing unit lacks complete plumbing facilities;
3. Household is overcrowded; and
4. Household is cost-burdened.

A household is said to have a housing problem if they have one or more of these four problems.

In Meridian, owner-occupied housing does not appear to have significant challenges with concentrations of multiple housing problems. However, there was a block area (16001010333) that did show an area where over 10% of renters had two or more housing problems. This area is located north of Fairview Avenue, east of Meridian Road, south of E Ustick, and west of N Eagle Road.

Are there any areas in the jurisdiction where racial or ethnic minorities or low-income families are concentrated? (include a definition of "concentration")

R/ECAP

To assist communities in identifying racially/ethnically-concentrated areas of poverty (R/ECAPs), HUD has developed a census tract-based definition of R/ECAPs. The definition involves a racial/ethnic concentration threshold and a poverty test.

The racial/ethnic concentration threshold is straightforward: R/ECAPs must have a non-white population of 50 percent or more. Regarding the poverty threshold, HUD defines neighborhoods of extreme poverty as census tracts with 40 percent or more of individuals living at or below the poverty line. HUD supplements this with an alternate criterion because overall poverty levels are substantially lower in many parts of the country. Thus, a neighborhood can be a R/ECAP if it has a poverty rate that exceeds 40% or is three or more times the average tract poverty rate for the metropolitan/micropolitan area, whichever threshold is lower.

Meridian has no current nor past R/ECAP areas in mapping provided by HUD Open Data's most recent version, 2/8/2018.
Theil Index

The Theil index is a statistic used to measure economic inequality. The Theil index measures an entropic "distance" the population is away from the "ideal" egalitarian state of everyone having the same income. The numerical result is in terms of negative entropy so that a higher number indicates more order that is further away from the "ideal" of maximum disorder. Formulating the index to represent negative entropy instead of entropy allows it to be a measure of inequality rather than equality.

The Index uses index ranging from 0 to 1 that displays information about racial segregation. Lower index values below .20 suggest less segregation, and higher index values above .40 suggest more segregation. The Theil Index is a measure of how evenly members of racial and ethnic groups are distributed within a region, calculated by comparing the diversity of all sub-regions (Census blocks) to the region as a whole. Patterns of racial segregation can emerge as a result of systemic barriers and opportunities or localized individual preferences. For example, highly segregated areas may indicate discriminatory housing practices or other related barriers. Data used in the calculation of this index were derived from the U.S. Census Bureau’s 2010 Decennial Census.

HUD CDBG Low-Moderate Income Areas

The Community Development Block Grant (CDBG) program requires that each CDBG funded activity must either principally benefit low- and moderate-income (LMI) persons, aid in the prevention or elimination of slums or blight, or meet a community development need having a particular urgency. Most activities funded by the Community Development Block Grant (CDBG) program are designed to benefit low- and moderate-income (LMI) persons. This benefit may take the form of housing, jobs, and services. Additionally, activities may qualify for CDBG assistance if the activity will benefit all the residents of a primarily residential area where at least 51 percent of the residents are low- and moderate-income persons, i.e. area-benefit (LMA).

What are the characteristics of the market in these areas/neighborhoods?

Meridian has no current nor past R/ECAP areas in mapping provided by HUD Open Data's most recent version, 2/8/2018.

Are there any community assets in these areas/neighborhoods?

Meridian does not have any neighborhoods that meet the definition of a R/ECAP. The City continues to work to improve low- to moderate-income neighborhoods with street lighting and park upgrades. There are parks, community activities, and schools scattered throughout the City that are close to the low-moderate-income areas.

Are there other strategic opportunities in any of these areas?

The City of Meridian works diligently to ensure that all neighborhoods have access to services, parks, and schools. The City continually evaluates where to place resources and how to manage the rapid population growth in the City. There are regional initiatives to improve transportation access, develop
new economic development opportunities, and increase the supply of affordable housing. These discussions involve ensuring the low- and moderate-income neighborhoods are considered and evaluated on how development will impact these areas.
Racial segregation according to the Theil Index, 2010.

The Theil Index is an index ranging from 0 to 1 that displays information about racial segregation. Lower index values below .20 suggest less segregation and higher index values above .40 suggest more segregation. The Theil Index is a measure of how evenly members of racial and ethnic groups are distributed within a region, calculated by comparing the diversity of all sub-regions (Census blocks) to the region as a whole. Patterns of racial segregation can emerge as a result of systemic barriers and opportunities or localized individual preferences. For example, highly segregated areas may be indicative of discriminatory housing practices or other related barriers. Data used in the calculation of this index were derived from the U.S. Census Bureau's 2010 Decennial Census. Please see the data directory for more detailed information about the methodology. Geographies for which no data were provided or for which the population was less than 1,000 are represented as having "Insufficient Data."
The dark purple areas on the map are block groups that HUD designates as eligible for Community Development Block Grant (CDBG) funding in FY2019. Eligible block groups are those where at least 51% of residents are of low or moderate income. Low/mod persons are those living in households with income below 80% of the Area Median Income. Additional block groups are eligible if they are inside the boundary of an “exception grantee” and meet a separate threshold of low/mod persons. Light purple block groups are partially eligible, meaning one or more parts of the block group is not eligible. Block groups marked in yellow on the map are ineligible for CDBG funding. Income estimates come from 2011-2015 ACS data. Calculations were suppressed in cases where the number of individuals in the area was less than 11. Areas with insufficient data appear as grey in the map. For more information about the CDBG Program, please see our Data Directory.
Describe the need for broadband wiring and connections for households, including low- and moderate-income households and neighborhoods.

Broadband access in communities helps provide economic growth, improved educational opportunities, access to better healthcare, greater employment opportunities, improving public safety, and increased global competitiveness for businesses.

The term broadband commonly refers to high-speed Internet access that is always on and faster than traditional dial-up access. Broadband includes several high-speed transmission technologies such as digital subscriber line (DSL), cable modem, fiber, wireless, satellite, and broadband over powerlines (BPL).

Research among Organisation for Economic Co-operation and Development (OECD) countries shows that a 4 Mbps increase in household broadband speed is associated with a roughly 4 percent increase in household income. Research shows that businesses who begin utilizing broadband increase their employees’ labor productivity by an average of 5 percent in the manufacturing sector and 10 percent in the services sector.

The current standard for broadband in the U.S. is internet with a 25 Mbps (Megabits per second) download speed. Though Netflix says it needs only 5 Mbps to stream video, the 25 Mbps threshold is intended to satisfy the different needs; high-quality downloads, video communication, and multiple demands of a single household’s network. However, many Americans are still unable to access broadband at the speeds necessary to make full use of its benefits.

HUD is actively working to bridge the digital divide in low-income communities served by HUD by providing help with the expansion of broadband infrastructure to low- and moderate-income communities. In December 2017, HUD published the final rule, "Narrowing the Digital Divide Through Installation of Broadband Infrastructure in HUD-Funded New Construction and Substantial Rehabilitation of Multifamily Rental Housing." The final ruling requires installing broadband infrastructure at the time of new construction or substantial rehabilitation of multifamily rental housing funded or supported by HUD. Additionally, CDBG entitlement communities must analyze the needs of the broadband needs of housing occupied by low- and moderate-income households.

2019 ACS Data on Broadband

Generally, Meridian has a wide broadband coverage that is used by almost all residents. The most recent data available for Meridian shows that the community has a small population of residents who do not currently have access to broadband. Unfortunately, 2019 ACS does not provide data for Meridian on specific income populations who lack broadband service.
The 2019 ACS 1-Year Estimates (table S2801) data shows the following key data points in Meridian;

- 98.3% of the population has one or more types of computing devices
- 94.4% of the population has broadband of any type
- 85.7% has cellular data

The populations that may need broadband assistance in Meridian include the following groups;

- 8.7% of has cellular data with no other internet access
- 5.6% without internet subscription
- 1.7% with no computer

Describe the need for increased competition by having more than one broadband Internet service provider serve the jurisdiction.

Research available from BroadbandNow for Meridian shows that broadband internet is widely available throughout the City and residents have various choices for residential broadband service. Data shows that Meridian does not have an immediate need for additional increased competition for broadband internet service.

**Internet Access in Meridian, Idaho**

FCC data shows two primary broadband service options in Meridian — coaxial cable (97.15% coverage) and DSL (close to one hundred percent coverage). Cable broadband is usually delivered through TV corporations using pre-existing copper coaxial TV wires mounted on telephone poles or buried in the street. DSL Internet, similarly, is sent via twisted copper phone wires. Most Meridian street addresses can access both cable service and DSL from two or more Internet companies.

Meridian residents generally have two or more ISPs at a given address. The mapping tool on this page illustrates how competition changes in different parts of the city. Coverage from Viasat Internet and HughesNet, in general, will overlap. As you might predict, the decision between Viasat and HughesNet is common in Meridian.

- There are 21 internet providers in Meridian with 11 of those offering residential service.
- Meridian is the 4th most connected city in Idaho ahead of Boise, Garden City, Nampa, Star, and Middleton.

*BroadbandNow*

**Indicators of Broadband Need**

The Indicators of Broadband Need map was created by the United States Department of Commerce, National Telecommunications and Information Administration (NTIA). The map uses several different data sources to show information on broadband availability within the United States. Layers in this map
were created using data sourced from the American Community Survey collected by the U.S. Census, Measurement Lab (M-Lab), Ookla, Microsoft and the Federal Communications Commission (FCC).

Meridian does not currently show any areas of need on the Indicators of Broadband Need Map beyond very small parcels of land that are largely undeveloped.

**BroadbandUSA Community Report**

BroadbandUSA Community Reports is generated at a county level and describes the broadband and socio-economic metrics Meridian, Idaho. Data sources include the U.S. Census American Community Survey, Ookla, Measurement Lab (M-Lab), the Federal Communications Commission (FCC) and Esri Business Analyst. The BroadbandUSA Community Reports were created by the National Telecommunications and Information Administration (NTIA) in the U.S. Department of Commerce.

Describe the jurisdiction’s increased natural hazard risks associated with climate change.

Idaho’s climate is changing. Over the past century, most of the state has warmed one to two degrees (F). Snowpack is melting earlier in the year, and the flow of meltwater into streams during summer is declining. In the coming decades, streams will be warmer, populations of several fish species may decline, wildfires may be more common, deserts may expand, and water may be less available for irrigation.

The climate is changing because the earth is warming. People have increased the amount of carbon dioxide in the air by 40 percent since the late 1700s. Other heat-trapping greenhouse gases are also increasing. These gases have warmed the surface and lower atmosphere of our planet about one degree during the last 50 years. Evaporation increases as the atmosphere warms, which increases humidity, average rainfall, and the frequency of heavy rainstorms in many places—but contributes to drought in others.
Greenhouse gases are also changing the world’s oceans and ice cover. Carbon dioxide reacts with water to form carbonic acid, so the oceans are becoming more acidic. The surface of the ocean has warmed about one degree during the last 80 years. Warming is causing snow to melt earlier in spring.

**Drought and Wildfires**
Climate change can increase the frequency and severity of fires that burn forests, grasslands, and desert vegetation. On average, nearly 1 percent of the land in Idaho has burned per year since 1984, making it the most heavily burned state in the nation. Changing the climate is likely to more than double the area in the Northwest burned by forest fires during an average year by the end of the 21st century. Although drier soils alone increase the risk of wildfire, many other factors also contribute.

Higher temperatures and a lack of water can also make trees more susceptible to pests and disease, and trees damaged or killed burn more readily than living trees. Changing the climate is likely to increase the area of pine forests in the Northwest infested with mountain pine beetles over the next few decades. Pine beetles and wildfires are each likely to decrease timber harvests. Increasing wildfires also threaten homes and pollute the air.

The combination of more fires and drier conditions may expand deserts and otherwise change the landscape in southern Idaho. Many plants and animals living in arid lands are already near the limits of what they can tolerate. Higher temperatures and a drier climate would generally extend the geographic range of the Great Basin desert. In some cases, native vegetation may persist and delay or prevent expansion of the desert. In other cases, fires or livestock grazing may accelerate the conversion of grassland to desert in response to changing climate. For similar reasons, some forests may change to desert or grassland.

**Agriculture**
Climate change may also pose challenges for livestock and crops. Hot weather causes cows to eat less, grow more slowly, and produce less milk; and in extreme cases it may threaten their health. Higher temperatures might also decrease potato yields and potato quality in the Northwest. Some farms may be harmed if more hot days reduce crop yields, or if the decline in summer streamflow reduces the water available for irrigation. Other farms may benefit from a longer growing season and the fertilizing effect of carbon dioxide.

**Health and Vulnerable People**

Climate change is likely to amplify some threats to health in Idaho. Certain people are especially vulnerable, including children, the elderly, the sick, and the poor.

"What Climate Change Means for Idaho," United States Environmental Protection Agency, August 2016, EPA 430-F-16-014

Describe the vulnerability to these risks of housing occupied by low- and moderate-income households based on an analysis of data, findings, and methods.

**Community Resilience Estimates (CRE) - US Census**
Community resilience is the capacity of individuals and households to absorb, endure, and recover from the health, social, and economic impacts of a disaster such as a hurricane or pandemic. When disasters occur, recovery depends on the community’s ability to withstand the effects of the event. To facilitate disaster preparedness, the Census Bureau has developed new small area estimates, identifying communities where resources and information may effectively mitigate the impact of disasters.

Variation in individual and household characteristics are determining factors in the differential impact of a disaster. Some groups are less likely to have the capacity and resources to overcome the obstacles presented during a hazardous event. Resilience estimates can aid stakeholders and public health officials in modeling these differential impacts and developing plans to reduce a disaster’s potential effects.

Individual and household characteristics from the 2019 American Community Survey (ACS) were modeled in combination with data from to Population Estimates Program to create the CRE. Data is currently available at a county level.

Risk factors from the 2019 ACS include:

- Income to Poverty Ratio
- Single or Zero Caregiver Household
- Crowding
- Communication Barrier
- Households without Full-time, Year-round Employment
- Disability
- No Health Insurance
- Age 65+
- No Vehicle Access
- No Broadband Internet Access

Ada County - Population 472,400

- 42.9% of residents with 0 risk factors - 202,600 residents
- 41.8% of residents with 1-2 risk factors - 197,400 residents
- 15.3% with 3+ risk factors - 72,400 Residents

The following data sets from the US Census "COVID Impact Planning Report - Ada County" show disaster recovery figures for Ada County that are relevant beyond the scope of COVID and apply to all disaster recovery response for vulnerable populations.

Ada County Emergency Management and Community Resilience (EMCR)

Effective November 1, 2004, a Local Hazard Mitigation Plan approved by the Federal Emergency Management Agency (FEMA) is required for participation in its Hazard Mitigation programs. To ensure that the latest information and analysis is contained in the plan it must be updated every five years.

Mitigation is the cornerstone of emergency management. It’s the continuing effort to lessen the impact disasters have on people and property. Mitigation is defined as “sustained action that reduces or eliminates long-term risk to people and property from natural hazards and their effects.”

In an effort coordinated by Ada County Emergency Management & Community Resilience (EMCR), local governments and districts completed the 2017 update of the Ada County Multi-Hazard Mitigation Plan.

The update included information on:

- The seven potential natural hazards of Ada County and dam failure
- Risk assessments, that include computer modeling, to describe potential losses from these hazards
- A set of goals, objectives and actions that will guide future mitigation activities within the county
• A system for implementing and monitoring the plan in the future
• This plan update included new modeling of the hazards based on the most recent data available. The plan is composed of two volumes. Volume One examines potential disasters and mitigation on a county-wide basis, and identifies desired actions that could reduce risk for the area as a whole. Volume Two is composed of individual annexes for each of the planning partners (local jurisdictions and taxing districts) that are participating in the process. These annexes address specific mitigation actions that each partner has identified as possible methodologies to reduce risk in their area.

The Ada County Hazard Mitigation Plan Update process included the following:

• Strategically located and planned mitigation projects that prioritized the protection of people, structures, infrastructure and unique ecosystems that contribute to our way of life and the sustainability of the local economy.
• Involved the maximum number of planning partners (local governments) that wish to participate in the process.
• Ensured that the goals, objectives, identified hazards and mitigation strategies coincided with those documented in the most current State of Idaho All Hazards Mitigation Plan.
• Enhanced the risk assessment and analysis of the current plan using the most up to date geographic data and modeling tools available.
• Created outreach and public education opportunities to display and discuss risk assessment/analysis with the people of Ada County.
• Met or exceeded all the requirements of a FEMA All Hazards Mitigation Plan as the center point of the community’s participation in FEMA Hazard Mitigation programs.

Ada County Emergency Management is currently in the process of planning the 2022 EMCR.
STRATEGIC PLAN

SP-05 OVERVIEW

Strategic Plan Overview

The Strategic Plan serves as a planning document that outlines the anticipated resources over the course of 5-years from CDBG entitlement funding, program income, and other sources. Additionally, a series of goals is described, illuminating how the City will prioritize available financial resources, geographic priorities, and expected outcomes.

Priorities and goals were determined through analysis of multiple data sources:

- Comprehensive community surveys and meetings
- Interview and consultation with area stakeholders
- Staff recommendations
- Results of previous monitoring of subrecipients
- HUD Annual Homeless Assessment Report (2020)
- HUD Worst Case Housing Needs (2019)
- Policy Map, Community Profile (2021)
- HUD Community Resiliency Kit (2021)
- Community Housing Assessment Strategy (CHAS) data
- American Housing Survey (AHS) data
- American Community Survey (ACS) 2013-2017 5-Year Estimates

SP-10 GEOGRAPHIC PRIORITIES – 91.215 (A)(1)

**Geographic Areas Affected**
City of Meridian

**Associated Goals**
Housing
Program Administration

**Description**
**Provide Decent Housing**

A decent place to live removes the barriers to opportunity, success, and health that have been part of a family’s life for years, if not generations. Creating safe and decent places to live can have incredibly positive effects on a family’s health, on the study habits of students, and a neighborhood’s overall attractiveness and stability. Decent housing includes a spectrum of solutions: new construction, repair, and renovation, housing finance, infrastructure development, secure land tenure, among others.

**Basis for Relative Priority**
Providing people with a range of housing choices has many positive aspects – both for the community in general and for individual families. As individuals and families move from one stage of life to the next, various housing types enable them to live in a place that suits their needs while allowing them to reside in the same community, keeping those ties and staying close to family members if they desire.

The City of Meridian seeks to encourage the viable community development of the community by promoting integrated approaches that provide decent housing, a suitable living environment, and expand economic opportunities for low- and moderate-income persons. The primary means towards this end is the development of partnerships among all levels of government and the private sector, including for-profit and non-profit organizations. Housing and community development are not viewed as separate programs but rather as the various elements that make up a comprehensive vision of community development.

Introduction

The City of Meridian prioritized goals and objectives for using CDBG funding to strategically and effectively benefit low- and moderate-income residents by increasing decent housing, creating a suitable living environment, and expanding economic opportunities.

The City of Meridian follows HUD guidelines and limits public services to no more than 15% and administration to 20% of the annual entitlement.

</tr>
</tbody>
</table>

Explain how federal funds will leverage those additional resources (private, state and local funds), including a description of how matching requirements will be satisfied

The City of Meridian does not currently participate or receive funding from any additional HUD programs, including HOME, HOPWA, or ESG.
The projects outlined in the Strategic Plan, which are implemented by outside agencies, are anticipated to use CDBG funding to leverage their initial financial resources.

- Affordable housing supply projects are expected to leverage other local, state, federal, and/or private funds.
- Subrecipients must report on match support for projects.

If appropriate, describe publicly owned land or property located within the jurisdiction that may be used to address the needs identified in the plan.

Meridian will continue to improve the livability of low- and moderate-income neighborhoods and buildings. Projects centered around ADA upgrades and improvements will help residents with mobility challenges better access the neighborhoods, public transportation, and outdoor recreation. The buildout of the public infrastructure improves low- and moderate-income neighborhoods. The City will support multi-modal paths, park upgrades, and public infrastructure improvements in low- to moderate-income areas.

Discussion

The City expects partners to leverage CDBG funding to the fullest extent possible to implement robust programs that will help further the needs of area residents.
SP-40 INSTITUTIONAL DELIVERY STRUCTURE – 91.215(K)

TABLE 49 - INSTITUTIONAL DELIVERY STRUCTURE

Assess of Strengths and Gaps in the Institutional Delivery System

Meridian has various service providers who provide targeted assistance and mainstream services, such as health, mental health, and employment services to homeless persons and persons with HIV.

Area non-profits help provide public service activities that improve the lives of low- and moderate-income residents. The City is administering HUD CDBG programs both internally and working with external partners. The City has a strong working relationship with the Continuum of Care and Idaho Housing and Finance Association (IHFA).

**TABLE 50 - HOMELESS PREVENTION SERVICES SUMMARY**

Describe how the service delivery system including, but not limited to, the services listed above meet the needs of homeless persons (particularly chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth).

There are health services available to persons living with HIV through several health providers.

**Allies Linked for the Prevention of HIV and AIDS (ALPHA) - located in Boise**

ALPHA provides HUD vouchers for Housing Opportunities for Persons with AIDS (HOPWA) program. HOPWA is the only Federal program dedicated to the housing needs of people living with HIV/AIDS. ALPHA also has a food pantry, needle/syringe exchange, and sexual health testing.

**Planned Parenthood - Meridian Health Center**

Planned Parenthood in Meridian provides HIV services in the community. HIV counseling referral services are available. Counseling and confidential (private) testing for HIV are provided by trained staff.

- HIV testing
- HIV education
- HIV referrals
- HIV prevention with PrEP

**Idaho State University/Meridian - HIV Education Program**

Through a partnership with the University of Washington/Northwest AIDS Education and Training Center (NW-AETC), Idaho State University provides statewide HIV and AIDS medical training. Physicians, nurses, physician assistants, nurse practitioners, pharmacists, and other providers are offered state-of-the-art, high-quality education in the areas of acute diagnosis and treatment of HIV and AIDS.
Grant funding provides education to advance the HIV and AIDS knowledge base of rural practitioners in the areas of: risk assessment, diagnosis of primary infection, rapid testing, medication management, and appropriate referral to specialty clinics. Preceptorship opportunities in high-volume, northwest HIV clinics are also available. Community-based needs assessments are conducted to customize training and build capacity in every district of Idaho. Additionally, an online “HIV and AIDS 101” course is now available to health science students, providers new to HIV care, or anyone generally interested in increasing their knowledge base.

Describe the strengths and gaps of the service delivery system for special needs population and persons experiencing homelessness, including, but not limited to, the services listed above

Meridian has an excellent variety of services available to all community members; these are especially beneficial to the populations targeted in the CDBG program, special needs residents, and persons experiencing homelessness. The largest gap is in emergency homeless shelter beds, domestic violence shelter beds, and permanent supportive housing. Meridian residents experiencing homelessness connect to shelter beds in neighboring communities.

Provide a summary of the strategy for overcoming gaps in the institutional structure and service delivery system for carrying out a strategy to address priority needs

To overcome gaps in the system, the City will continue to provide opportunities for public, private, and governmental organizations to come together to share information, advocate for issues of concern, leverage resources to make projects happen, and address barriers associated with implementing activities, and coordinate efforts.

Funding gaps will exist. The City will continue to search for additional funding, leverage resources, and efficiently administer programs. Likewise, increased coordination between and among providers can also lead to more efficient program management.

**Goal Descriptions**

1. **Public Facilities and Infrastructure Improvements**

Public Facilities and Improvements are publicly-owned facilities and infrastructure such as streets, playgrounds, underground utilities, and buildings owned by non-profits open to the general public. Safe and accessible infrastructure is essential to the quality of life and building communities that support community diversity and stability. In general, public facilities and public improvements are interpreted to include all facilities and improvements that are publicly owned or owned by a nonprofit and open to the general public. Acquisition, construction, reconstruction, rehabilitation, and installation of public facilities and improvements are eligible activities.

Meridian's goal to improve and expand public facilities may include, but is not limited to:

- ADA Improvements
- Senior Centers
- Homeless and Domestic Violence Facilities
- Neighborhood Facilities
- Health Facilities
- Sidewalks
<table>

<tbody>
<tr>
<td><strong>Goal Description</strong></td>
<td>Public services are an integral part of a comprehensive community development strategy. Public Service activities provide for a wide range of activities that address needs in the community provided for the target population. Public services can strengthen communities by addressing the needs of specific populations. They can address a range of individual needs and increase CDBG dollars' impact by complementing other activities. The City of Meridian may allocate up to 15% of CDBG funds to public services programs that provide supportive services to low- to moderate-income persons or prevent homelessness. In general, these services are provided by local non-profit partners. This funding is capped at 15% of the CDBG entitlement plus program income. Meridian's goal to improve and provide public services may include, but is not limited to:</td>
<td></td>
</tr>
<tr>
<td></td>

</table>
| Goal Description | General Administrative funds will pay reasonable program administrative costs and carrying charges related to the planning and execution of community development activities. Administering federal funds and ensuring compliance is critical for utilizing Federal resources. Meridian is committed to using CDBG entitlement funding for administration to help to continue growing a community development program that is efficient, effective, and resourceful. Meridian may have administration projects that include, but are not limited to:  
- General management, oversight, and coordination  
- Providing local officials and citizens with information about the CDBG program  
- Preparing budgets and schedules  
- Preparing reports and other HUD-required documents  
- Program planning  
- Public Information  
- Monitoring program activities  
- Fair Housing activities  
- Indirect costs  
- Submission of applications for Federal programs |

Estimate the number of extremely low-income, low-income, and moderate-income families to whom the jurisdiction will provide affordable housing as defined by HOME 91.315(b)(2)

During the 2022-2026 Consolidated Plan period, the City of Meridian will have projects that help to support affordable housing for low- to moderate-income residents.

- Direct Financial Assistance to Homebuyers - 2
- Homeowner housing rehabilitated - 20
- Rental Units Constructed - 4 housing household units
Other programs will help support low- and moderate-income residents.

- Public Facilities and Infrastructure projects - 2,000 persons assisted
- Public Services - 165 persons assisted
- Homelessness Prevention - 90 persons assisted
Need to Increase the Number of Accessible Units (if Required by a Section 504 Voluntary Compliance Agreement)

The Ada County Housing Authority (ACHA) does not have any public housing units in Meridian. Information is provided to give a greater context into the services that the public housing agency may be able to provide to Meridian's Housing Choice Vouchers holders who decide to move into a public housing unit in Boise.

Section 504 of the Rehabilitation Act of 1973 prohibits discrimination on the basis of disability in any housing that receives federal assistance, including public housing. PHAs are required to assess the needs of current tenants and applicants on its waiting list for accessible units and the extent to which the needs have not been met. According to ACHA, as of April 2022, 30% of applicants on the Public Housing waiting list reported being elderly, and 82.5% reported having a disability. In the event a tenant or applicant does require an accessibility modification or accommodation, the housing authorities provides the assistance necessary to ensure that the tenant or applicant maintains a safe and healthy living environment.

There are 564 households on the Public Housing and Section 8 New Construction waiting lists. These high-rise buildings are designated for the elderly and/or disabled. Waiting lists are maintained by date and time of application only, and ACHA does not track the number of applicants needing an accessible unit. Twenty-one (21) of the housing authority-owned units are accessible – 6/93 at Capitol Plaza, 4/67 at Franklin Plaza, 10/80 at Shoreline Plaza, and 1/10 at our scattered site properties. When an elderly or disabled applicant reaches the top of the waiting list, a resident in an accessible unit is transferred to a non-accessible unit and the applicant needing the features of the accessible unit is moved in.

Activities to Increase Resident Involvements

ACHA works closely with its residents and resident boards to provide high quality living such as:

- Work with local service providers and link participants to supportive services
- Coordinate and oversee the delivery of services, ensuring services are provided on a regular, ongoing, and satisfactory basis.
- Coordinate and sponsor educational events, which may include topics relating to health care, health care benefits, wellness programs for seniors, life skills training, computer skills, pet care, community safety, debt reduction, etc.

Is the public housing agency designated as troubled under 24 CFR part 902?

No

Plan to remove the ‘troubled’ designation

ACHA is not designated as troubled.
Barriers to Affordable Housing

Since 1990, Meridian has experienced exponential growth, becoming the second largest city in Idaho and one of the top ten fastest growing cities in the nation. Due to the desirability of the area, population growth will continue. Over the last 20 years, property in and around Meridian has changed from primarily agricultural and single-family residential to include a more diverse mix of residential types and commercial and industrial uses. That trend will continue as land traditionally used for agriculture develops at urban intensities. However, the foremost goals will remain to grow the city as a premier place to live, work, and play.

The City of Meridian desires, over time, all development within its Area of City Impact to be served with urban services from the City of Meridian. Such services primarily include sanitary sewer, water, reclaimed water, fire, police, and parks. Secondarily, the City considers the availability and capacity of the school system, transportation facilities, libraries, and storm water facilities in any review of development within the AOCI. All requests for annexation into the City limits will require that the owner extend City-owned services at the time of development.

The importance of cooperating with Ada County and neighboring cities is imperative to successful long-term land use, transportation, and utility planning. There are very significant financial and quality-of-life implications for not doing so. As such, the City of Meridian is committed to fulfilling the terms of its Area of City Impact Agreement with Ada County and coordinating with adjacent service providers.

Meridian aims to guide growth in a way that efficiently expands infrastructure and services to support sustainable growth patterns.

Residential Land Use

The purpose of this designation is to provide for a variety of housing types and densities varying from large estate or semi-rural lots to multi-family homes. In all cases, urban services such as sewer, water, parks, and emergency services should be provided.

The Comprehensive Plan encourages a variety of product types and lot sizes within every neighborhood. Gross residential densities are rounded to the nearest whole number. At the discretion of City Council, areas with a Residential Comprehensive Plan designation may request an office use if the property only has frontage on an arterial street or section line road and is two acres or less in size.

Strategy to Remove or Ameliorate the Barriers to Affordable Housing

The City has committed to creating more diverse housing types through its redevelopment plan for downtown. The Destination Downtown plan states that creating diverse housing opportunities for different housing needs and life cycles in downtown Meridian is essential to support new businesses and activities. A healthy housing mix will also help draw people downtown and ensure 24-7 activity. Housing
created or redeveloped as part of the downtown plan is expected to include apartments, townhomes, condominiums, duplexes, and single-family homes.

The City helped facilitate multiple RFPs over the past several years for a large portion of the publicly-owned properties in downtown Meridian, prioritizing proposals that focused on developing mixed-use and high-density housing. One project that was awarded, Downtown Lofts, will bring several affordable units to downtown Meridian, including six (6) that will be dedicated to CATCH participants.

**SP-60 HOMELESSNESS STRATEGY – 91.215(D)**

**Reaching out to homeless persons (especially unsheltered persons) and assessing their individual needs**

The City does not currently receive other HUD funds, including HOME, ESG, or HOPWA.

The City will continue to work with the local Continuum of Care and local partners in reaching the local homeless population and assessing their needs. The City is a member of the local homelessness coordinating committee and participates in the annual Point In Time Count.

**Continuum of Care Member** - The City of Meridian is a member of the Continuum of Care (CoC). The City has committed to better understanding the needs that Meridian residents who are currently or at risk of experiencing homelessness face and how to serve them better.

**Community Collaboration** - City representatives are also frequently involved in public discussions, presentations, and meetings with citizens, other government officials, and local service providers, including West Ada School District, Jesse Tree, and CATCH. This collaboration helps the community provide support, understanding, and outreach to those experiencing homelessness in Meridian.

**Homeless Management Information System** - In previous years, the City worked with the CoC to add data points to the CoC’s Homeless Management Information System (HMIS) to enable the City to determine how many Meridian residents are experiencing homelessness and the reasons for their housing crisis. The City is committed to serving the individual needs of Meridian’s homeless population, as identified by the CoC and local organizations.

**Point-in-Time County** - The City has also worked with the CoC to conduct the annual Point-in-Time Count, which helps determine the number of people experiencing homelessness on a given day. This information allows the City to understand the level of homelessness in Meridian and develop a program that better serves those in need. The City will continue to assist with this process in upcoming years.

**Emergency Rental Assistance** - Meridian’s 2022 Annual Action Plan includes funding for Emergency Rental Assistance. This program provides financial support to help residents at risk of homelessness remain in their stable housing.

**Addressing the emergency and transitional housing needs of homeless persons**
The City is not eligible as a recipient of other HUD funds, including HOME, ESG, or HOPWA. Idaho Housing and Finance (IHFA) is the agency designated by the State to administer these funds to communities in Idaho that are not eligible to receive direct funding.

The City provides resources for homelessness prevention through **Emergency Rental Assistance** to help families maintain their stable housing. The reduction and prevention of homelessness is a part of the Public Service goal of the Consolidated Plan.

The City is a member of the local **Continuum of Care - Our Path Home.**

**Our Path Home** utilizes coordinated entry to provide services to people experiencing homelessness. Coordinated entry is an essential process through which people experiencing or at risk of experiencing homelessness can access the crisis response system in a streamlined way, have their strengths and needs quickly assessed, and quickly connect to appropriate, tailored housing and mainstream services within the community or designated region. When possible, the assessment provides the ability for households to gain access to the best options to address their needs, incorporating participants’ choices rather than being evaluated for a single program within the system. The most intensive interventions are prioritized for those with the highest needs.

The local access points to the coordinated entry system provide the assessment, information and referrals, and other resources to the person seeking housing.

Our Path Home plans to expand **three proven interventions** to help end homelessness for families with children:

**Prevention**

Prevention stabilizes families and keeps them housed, thereby ensuring children don’t endure the trauma that comes from living without a home. In turn, we will be better positioned to prioritize assistance for those families that need it most.

Preventing homelessness and keeping one family in their housing costs an average of $1,305 – and oftentimes, far less.

**Rapid Resolution Assistance**

Quick and short-term assistance for families experiencing brief economic hardships helps provide stability. This type of assistance offers families light support to gain stable housing, curbing the need for more costly interventions.

Providing rapid resolution assistance to one family to regain housing costs an average of $1,720.

**Supportive Housing**
Supportive housing provides the rental assistance and case management needed to house and stabilize families. Rental assistance helps make housing affordable and individualized support services help keep families in housing long-term.

**Helping homeless persons (especially chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth) make the transition to permanent housing and independent living, including shortening the period of time that individuals and families experience homelessness, facilitating access for homeless individuals and families to affordable housing units, and preventing individuals and families who were recently homeless from becoming homeless again.**

The City will provide funding to NeighborWorks Boise to assist with homeowner repairs to Meridian residents with low- and moderate-income to keep them in housing they can afford. In addition, Meridian’s work with Jesse Tree has helped provide rental and case management services aimed at preventing and resolving needs for those currently experiencing homelessness or at risk of homelessness in Meridian.

The partnerships that the City has with local committees, organizations, and networks in evaluating, understanding, and addressing the many needs of Meridian residents experiencing homelessness include; the Meridian Police Department, Ada County Sheriff’s Office, City of Boise, City of Nampa, City of Caldwell, Women’s and Children’s Alliance, Jesse Tree, Boys & Girls Clubs of Ada County, West Ada School District, CATCH, Ada County Housing Authority, Local HUD office, CoC, Meridian Food Bank, United Way, NeighborWorks Boise, IHFA, Terry Riley, El-Ada Community Action, Our Path Home Connect, and many others. These partnerships are extensive and ongoing in order to help address and prevent homelessness in Meridian.

These efforts, particularly coordination and participation with CATCH and the CoC, are designed to assist local service providers in helping persons experiencing homelessness make the transition to permanent housing and independent living.

In addition, the City’s relationships with ACHA, CATCH, and Jesse Tree are aimed to develop activities through the Program that facilitate access for individuals and families experiencing homelessness to affordable housing units while also preventing individuals and families from becoming homeless.

**Help low-income individuals and families avoid becoming homeless, especially extremely low-income individuals and families who are likely to become homeless after being discharged from a publicly funded institution or system of care, or who are receiving assistance from public and private agencies that address housing, health, social services, employment, education or youth needs.**

The City is involved in the CoC, which is comprised of representation from ACHA, Health and Welfare, mental health service providers, and other service agencies, including law enforcement and correctional agencies. The CoC coordinates, collects data, reviews data, and prioritizes strategies based on data and input from providers. The coordinated entry serves all communities within Ada County, and case conferencing is conducted weekly.
The City is also involved in the Behavioral Health Board (BHB), which focuses on mental health and substance use disorders. The BHB is a government entity established by the Idaho legislature in 2014 to advise Idaho’s behavioral health authority, identify gaps, and promote improvements to the delivery of integrated services for behavioral health in Idaho. The Board promotes and supports prevention, intervention, recovery, and resiliency for individuals and families in need. It is composed of 23 stakeholders, advocates, and professionals across the continuum of care. Involvement with this group allows the City to understand the community’s broader needs related to behavioral health in general and specifically for those discharged from institutional settings such as mental health facilities and corrections programs.

Much of the work funded through the Community Development Block Grant (CDBG) program is directed at housing stability for Meridian’s LMI residents. In addition to the services previously mentioned, the City is focusing on public transportation for seniors, youth scholarships for daycare, and streetlight improvements in low- to moderate-income neighborhoods to meet the needs of those in the community who may or may not be experiencing homelessness.

### SP-65 LEAD BASED PAINT HAZARDS – 91.215(I)

**Actions to address LBP hazards and increase access to housing without LBP hazards**

Lead poisoning is the most significant and prevalent disease of environmental origin among children living in the United States. Lead exposures remain prevalent despite considerable knowledge and increased screening and intervention efforts. Environmental lead is a toxic substance that affects the growth and development of up to one million U.S. preschool children today, with effects ranging from learning disabilities to death. High levels of lead can cause many health problems by damaging the brain, nervous system, and kidneys. Lead poisoning can cause decreased intelligence, behavioral and speech problems, anemia, decreased muscle and bone growth, poor muscle coordination, and hearing damage.

Increased lead exposure and increased body burden of lead remain a significant problem for children in the United States. Lead is an environmental toxicant that may cause adverse health effects to the nervous, hematopoietic, endocrine, renal, and reproductive systems. Lead exposure in young children is particularly hazardous because children absorb lead more readily than adults. Many children exposed to lead do not exhibit any signs of the disease. The child’s signs or symptoms could be mistaken for other illnesses, and the child goes undiagnosed. The developing nervous system of children is particularly more susceptible to the effects of lead. The underdeveloped blood-brain barrier in young children increases the risk of lead entering the developing nervous system resulting in neurobehavioral disorders. Blood lead levels (BLLs), at any detectable level, have been shown to cause behavioral and developmental disorders. Therefore, no safe blood lead level in children has been identified. It is increasingly crucial for continued childhood lead poisoning prevention education and awareness.

Lead-contaminated water, soil, and paint have been recognized as potential sources of children’s lead exposure. Dust from deteriorating lead-based paint is considered the most significant contributor to the lead problem. Until the 1950s, many homes were covered inside and out with leaded paints. Lead began to fall from favor in the 1950s but was still commonly used until it was banned in homes after 1977. Because of the long-term use of lead-based paints, many homes in the United States contain surfaces
with paint, which is now peeling, chalking, flaking, or wearing away. The dust or paint chips contain high levels of lead that easily find ways into the mouths of young children. A particular problem has emerged due to many homes with lead-based paints, which are now undergoing renovations. Often the dust created by this work has high lead levels, which are readily absorbed by the children's developing bodies.

**How are the actions listed above related to the extent of lead poisoning and hazards?**

For this plan's purposes, the number of units built before 1980 occupied by households serves as the baseline of units that contain lead-based paint hazards.

Meridian has a small amount of housing built before 1980 that has the potential to be hazardous to children. The 2013-2017 ACS estimates that 3,000 units were constructed before 1980.

CDC's Childhood Lead Poisoning Prevention Program compiles blood lead surveillance data for children 1-6 years of age or under who were tested at least once since January 1, 1997. The national surveillance system comprises de-identified data from state and local health departments. The State of Idaho does not have any data listed in the CDC database for any years in the National Childhood Blood Lead Surveillance Data or the Childhood Lead State Surveillance Data.

Children who receive Medicaid assistance are required to obtain a blood lead test at 12 and 24 months of age (or between 36 and 72 months if earlier tests are missed) as part of early periodic screening requirements; however, not all Medicaid-enrolled children receive the required blood lead test.

**How are the actions listed above integrated into housing policies and procedures?**

The City of Meridian's CDBG projects, which require lead-based paint actions, are generally limited to housing rehabilitation. The process involves the following areas: notification, lead hazard evaluation, lead hazard reduction, and clearance. CDBG housing rehabilitation projects do not require ongoing lead-based paint maintenance. Lead-based paint activities apply to all homes built before 1978.

The City has written policies and procedures for all programs required to comply with the HUD lead-safe housing rule (LSHR). Additionally, the City requires lead-based paint policies and procedures with any partners who may administer these programs on the City's behalf. Contractors in the housing rehabilitation program have lead-based paint requirements integrated into their contract for services with the homeowner.

**SP-70 ANTI-POVERTY STRATEGY – 91.215(J)**

**Jurisdiction Goals, Programs and Policies for reducing the number of Poverty-Level Families**

The needs, goals, and projects outlined in the Consolidated Plan work together to help reduce poverty. While poverty is a function of factors (many of which are) beyond the control of City policies, providing citizens of Meridian with affordable, quality housing in economically diverse neighborhoods can foster economic mobility and soften the impact of poverty.
Meridian’s anti-poverty strategy involves supporting local nonprofit organizations that offer assistance to those residents living in poverty.

**How are the Jurisdiction poverty reducing goals, programs, and policies coordinated with this affordable housing plan**

The 2022-2026 Consolidated Plan has goals designed to help address and reduce poverty in Meridian. The goals outlined in Consolidated Plan are focused solely on helping improve the lives of low- and moderate-income residents.

**Goal 1: Housing**

The City will help to ensure that low- to moderate-income residents will have safe and livable housing. **Housing rehabilitation** projects and emergency home repair ensure that residents most at risk of having deferred home maintenance and unsafe living environments can remain in their homes. Additionally, **homeownership assistance** programs help low- to moderate-income residents transition into more stable homeownership. Improvement and preservation of the existing house stock is key to increasing the number of affordable housing units in Meridian.

The City prioritized goals and objectives for using CDBG funding to strategically and effectively benefit low- and moderate-income residents by increasing access to decent housing and creating a suitable living environment while expanding economic opportunities for LMI persons. Meridian is committed to improving and increasing access to safe and affordable housing for low- and moderate-income (LMI) residents. Affordable and safe housing helps to provide financial stability, reduces the chances of a person becoming homeless, and promotes housing sustainability.

**Goal 2: Public Services**

The City will work to utilize CDBG funds for public service. Projects will help low- to moderate-income residents with the impacts of domestic violence, homelessness, and other key community services. These projects may vary over the course of the consolidated plan. Still, the focus will remain on ensuring that low- and moderate-income residents have the support they need to ensure their safety, access to affordable housing, and increased access to economic improvements.

Public services are an integral part of a comprehensive community development strategy. Public Service activities provide a wide range of activities that address needs in the community provided for the target population. Public services can strengthen communities by addressing the needs of specific populations. They can address a range of individual needs and increase CDBG dollars' impact by complementing other activities.

The City of Meridian may allocate up to 15% of CDBG funds to public services programs that provide supportive services to low- to moderate-income persons or prevent homelessness. In general, these services are provided by local non-profit partners. This funding is capped at 15% of the CDBG entitlement plus program income.
Goal 3: Public Facilities and Infrastructure

Public Infrastructure Improvements will focus on safe and accessible infrastructure essential to the quality of life and building communities that support community diversity and stability. In general, public infrastructure improvements will include acquisition, construction, reconstruction, and installation of public infrastructure and facilities.

SP-80 MONITORING – 91.230

Describe the standards and procedures that the jurisdiction will use to monitor activities carried out in furtherance of the plan and will use to ensure long-term compliance with requirements of the programs involved, including minority business outreach and the comprehensive planning requirements.

The City of Meridian works closely with HUD to ensure that all statutory requirements are met, and that information reported in the City’s CAPER is accurate and complete. Additionally, the City will participate in online and onsite HUD training regularly.

The goal of monitoring is to encourage the completion of projects within the contract period while ensuring that project objectives are achieved. Monitoring is an ongoing, two-way communication process between the City and recipients. Successful monitoring involves frequent telephone contacts, written communications, analysis of reports and audits, and periodic meetings.

Monitoring is the principal means by which the City:

- Ensures that HUD-funded programs and technical areas are carried out efficiently, effectively, and in compliance with applicable laws and regulations
- Assists subrecipients in improving their performance, developing or increasing capacity, and augmenting their management and technical skills
- Stays abreast of the efficacy and technical areas of HUD CDBG and CDBG-CV programs
- Documents the effectiveness of programs administered by the subrecipients

The City performs a risk assessment of subrecipients to identify which subrecipients require comprehensive monitoring.

High-risk subrecipients include those that are:

- New to the CDBG program
- Experience turnover in key staff positions or change in goals or directions
- Encountering complaints and/or bad press
- Previous compliance or performance problems including failure to meet schedules, submit timely reports, or clear monitoring or audit findings
- Carrying out high-risk activities (economic development, job creation, etc.)
- Undertaking multiple CDBG-funded activities for the first time
The City and CDBG subrecipients are held accountable to program goals through a range of monitoring and timeliness activities.

**Monitoring Visits:** The City conducts an annual visit or desk monitoring of all subrecipients. On-site visits may include an on-site interview, inspection of financial and client records relating to the CDBG funding provided, evaluation of the subrecipients performance, analysis of the strengths and weaknesses of the program, assurance that activities comply with the Action Plan, and a report by the subrecipients of any needs, such as technical assistance or areas for program enhancement.

**Evaluating Performance:** Performance is measured against the goals identified in the initial CDBG subrecipient agreement. During the annual monitoring visit, the subrecipient has an opportunity to explain how goals and objectives for the year were achieved or why their goals were not reached. A follow-up letter to each subrecipient concludes the annual monitoring visit process. The letter summarizes the findings of the visit, and a copy is kept on file for reference.

**Financial Management:** Monitoring activities are also conducted whenever a subrecipient makes a reimbursement request. City staff verifies that the subrecipient has started their program and is making progress toward their goals before approving a reimbursement request. Subrecipients also must submit the appropriate documentation to be reimbursed.

**Data Management:** The City updates the program and financial information in the Integrated Disbursement and Information System (IDIS) every month to meet HUD's Timeliness requirements. The City obtains program information from the quarterly reports received from the CDBG subrecipients.
The City of Meridian prioritized goals and objectives for using CDBG funding to strategically and effectively benefit low- and moderate-income residents by increasing decent housing, creating a suitable living environment, and expanding economic opportunities.

The City of Meridian follows HUD guidelines and limits public services to no more than 15% and administration to 20% of the annual entitlement.

Anticipated Resources

</table>

The City anticipates receiving $517,466 in annual entitlement from FY2022 - FY2026 for a total of $2,069,864.

**TABLE 52 - EXPECTED RESOURCES – PRIORITY TABLE**

Explain how federal funds will leverage those additional resources (private, state and local funds), including a description of how matching requirements will be satisfied

The City of Meridian does not currently participate or receive funding from any additional HUD programs, including HOME, HOPWA, or ESG.

The projects outlined in the Strategic Plan, which are implemented by outside agencies, are anticipated to use CDBG funding to leverage their initial financial resources.

- Affordable housing supply projects are expected to leverage other local, state, federal, and/or private funds.
- Subrecipients must report on match support for projects.
If appropriate, describe publicly owned land or property located within the jurisdiction that may be used to address the needs identified in the plan

Meridian will continue to improve the livability of low- and moderate-income neighborhoods and buildings. Projects centered around ADA upgrades and improvements will help residents with mobility challenges better access the neighborhoods, public transportation, and outdoor recreation. The buildout of the public infrastructure improves low- and moderate-income neighborhoods. The City will support multi-modal paths, park upgrades, and public infrastructure improvements in low- to moderate-income areas.

Discussion

The City expects partners to leverage CDBG funding to the fullest extent possible to implement robust programs that will help further the needs of area residents.

<td>Goal Description</td>
<td><strong>Program Administrative</strong> funds will pay reasonable program administrative costs and carrying charges related to the planning and execution of community development activities. Administering federal funds and ensuring compliance is critical for utilizing Federal resources. Meridian is committed to using CDBG entitlement funding for administration to help to continue growing a community development program that is efficient, effective, and resourceful. Meridian may have administration projects that include, but are not limited to:</td>
<td></td>
</tr>
</tbody>
</table>
- General management, oversight, and coordination
- Providing local officials and citizens with information about the CDBG program
- Preparing budgets and schedules
- Preparing reports and other HUD-required documents
- Program planning
- Public Information
- Monitoring program activities
- Fair Housing activities
- Indirect costs
- Submission of applications for Federal programs
Introduction

Meridian will receive $517,477.00 in Community Development Block Grant (CDBG) funds for October 1, 2022, to September 30, 2023 funding cycle. Over the next year CDBG funds will be utilized as follows:

The following projects will be funded in 2022 using CDBG dollars:

- **Homeowner Repair Program** - $157,423 Funds will be used towards a housing rehabilitation program for Meridian's low- to moderate-income residents.
- **Homebuyer Assistance** - $40,000 Funds to help low- and moderate-income persons purchase a home.
- **Franklin and 7th Streetlights** - $100,000 The project will improve street lighting in a low- to moderate-income neighborhood.
- **Landing Subdivision Streetlights** - $97,423 The project will improve street lighting in a low- to moderate-income neighborhood.
- **Emergency Rental Assistance** - $42,761 The project will help residents at risk of homelessness to maintain their stable housing.
- **Youth Scholarship Program** - $20,000 Funding will provide childcare services for families in need of assistance.
- **Senior Transportation** - $14,859 The project will provide transportation services to seniors to access medical appointments and activities.

TABLE 54 – PROJECT INFORMATION

Describe the reasons for allocation priorities and any obstacles to addressing underserved needs

The Federal CDBG funds are intended to provide low- and moderate-income households with viable communities, including decent housing, a suitable living environment, and extended economic opportunities. Eligible activities include housing rehabilitation and preservation, homeownership...
opportunities, public services, community infrastructure improvements, planning, and administration.

The system for establishing the priority for the selection of these projects is predicated upon the following criteria:

- Meeting the statutory requirements of the CDBG program
- Meeting the needs of low- and moderate-income residents
- Coordination and leveraging of resources
- Response to expressed community needs
- Sustainability and/or long-term impact, and
- The ability to demonstrate measurable progress and success.

The primary obstacles to meeting underserved needs are the limited resources available to address identified priorities. The City of Meridian will partner with other public agencies and nonprofit organizations, when feasible, to leverage resources and maximize outcomes in housing and community development. In the end, however, the need far exceeds the funding available from all sources combined.

| Estimate the number and type of families that will benefit from the proposed activities | n/a  |
AP-50 GEOGRAPHIC DISTRIBUTION – 91.220(F)

Description of the geographic areas of the entitlement (including areas of low-income and minority concentration) where assistance will be directed

The projects in FY 2022 do not emphasize any one geographic area of Meridian. Funds are generally dispersed out geographically to have the most significant impact. The City does not have a singular concentration of low- to moderate-income residents.

While some projects focus on a low- to moderate-income area (LMA), they are not part of a greater neighborhood reinvestment or a designated neighborhood Revitalization Strategy Area (NRSA).

Geographic Distribution

<table>
<thead>
<tr>
<th>Target Area</th>
<th>Percentage of Funds</th>
</tr>
</thead>
<tbody>
<tr>
<td>Meridian Citywide</td>
<td>100</td>
</tr>
</tbody>
</table>

TABLE 55 - GEOGRAPHIC DISTRIBUTION

Rationale for the priorities for allocating investments geographically

The City did not identify a geographic target area as a basis for funding allocation priorities. Goals and projects are not limited to a specific area within the City.

Discussion

All projects supported with CDBG funds are within the Meridian city limits. The projects listed in the 2022 Action Plan will benefit low- and moderate-income residents throughout the City of Meridian.

AP-55 AFFORDABLE HOUSING – 91.220(G)

Massive job losses in the wake of the pandemic left many households struggling to pay their monthly housing costs. According to the Census Bureau’s Household Pulse Surveys, nearly 40 percent of owner households lost employment income between the onset of the pandemic and the end of 2020. Lower-income households were the most likely to face losses. Between March and December 2020, close to half (48 percent) of owners earning less than $25,000 had lost employment income, compared with under 34 percent of owners with incomes of $100,000 or more. As a result of these losses, 22 percent of lower-income households were behind on their mortgage payments by the end of the year—more than four times the share of highest-income households.

Although the majority of owners with lower incomes do not undertake any improvements in a given year, those that do typically devote a considerable share of their incomes to these projects. In 2019, homeowners in the bottom income quintile spent 14 percent of their incomes on remodeling projects, almost three times the share of owners in the top income quintile and about twice the average share for
all owners. As such, lowest income homeowners have contributed about 10 percent of all home improvement spending nationally in recent years.

Since these owners are more likely to live in older homes than owners with higher incomes, they spent significantly more of their improvement dollars on replacement projects (51 percent) in 2019 than owners in the top income quintile (40 percent). Conversely, lowest-income owners spent a much smaller share of their budgets for kitchen and bath remodels and additions (22 percent) than owners in the top quintile (36 percent).

Given that national spending on replacement projects is more stable than spending on discretionary projects, it is not surprising that outlays by lowest-income owners are also more stable over the remodeling cycle. If lower-income households as a group do not recover from the pandemic’s setbacks, their remodeling spending will undoubtedly fall. This decline, in turn, would not only change the mix of home improvement activities and increase industry volatility, but also widen the already large gap between the housing conditions of highest- and lowest income households.

"Improving America's Housing 2021" Harvard Joint Center on Housing Studies

During the 2022 Annual Action Plan period, the City of Meridian will support helping to maintain affordable housing for low- to moderate-income residents.

The City of Meridian focuses on homebuyer assistance and homeowner rehabilitation as ways to help affordable housing for low- to moderate-income residents. These programs help eligible residents move into homeownership and maintain their stable housing.

**TABLE 57 - ONE YEAR GOALS FOR AFFORDABLE HOUSING BY SUPPORT TYPE**
Discussion

The City will continue to find way to increase the amount of affordable housing for low- to moderate-income residents in Meridian.

AP-60 PUBLIC HOUSING – 91.220(H)

Introduction

Ada County Housing Authority (ACHA) does not have any public housing units in Meridian. ACHA does administer the Section 8 voucher program in Meridian.

The Section 8 Housing Choice Voucher Program serves approximately 2,230 low-income households throughout Ada County (156 Meridian households). This program allows clients to choose affordable rental units that meet program requirements within Ada County. Once an affordable rental unit has been identified the household may pay a portion of the rent, based on income. ACHA provides the Section 8 rental subsidy portion to the landlord.

Actions planned during the next year to address the needs to public housing

The City does not directly provide public housing, but supports ACHA in improving public housing. Many landlords in Meridian are willing to accept Section 8 vouchers, but finding units in small complexes such as those located in Meridian is a challenge. Voucher holders generally have the most success finding homes in large apartment complexes, most of which are located in Boise.

Actions to encourage public housing residents to become more involved in management and participate in homeownership

ACHA administers the Housing Choice Voucher Homeownership Option, a program designed to promote and support homeownership by families that are participating in or have graduated from ACHA’s Family Self-Sufficiency (FSS) program. Families who have been determined eligible have the option, if they meet certain additional criteria, to purchase a home and receive payment assistance toward their mortgage rather than towards their rent.

ACHA also conducts workshops for first-time homebuyers covering the following topics: benefits of and preparation for homeownership, credit analysis, FICO scoring methodology, mortgage types and requirements, private mortgage insurance, loan to value ratio, down payment assistance programs, escrow and title process, property taxes, home maintenance, and homeowner responsibilities.
If the PHA is designated as troubled, describe the manner in which financial assistance will be provided or other assistance

ACHA is not designated as troubled.

Discussion

The City does not own or manage any public housing and relies on ACHA to provide those services to the community. The City works with ACHA on various initiatives to coordinate and promote services and resources to the community.

AP-65 HOMELESS AND OTHER SPECIAL NEEDS ACTIVITIES – 91.220(I)

The City coordinates with the Boise City/Ada County Continuum of Care (CoC) and the Region 4 Behavioral Health Board (BHB) to identify the strategies to address the needs of those at risk of or currently experiencing homelessness.

Describe the jurisdictions one-year goals and actions for reducing and ending homelessness including

Reaching out to homeless persons (especially unsheltered persons) and assessing their individual needs

The City intends to continue to work with its partners to identify, understand, and support those experiencing homelessness (especially persons experiencing unsheltered homelessness) or at risk of homelessness with special needs in Meridian.

Continuum of Care Member - The City of Meridian is a member of the Continuum of Care (CoC). The City has committed to better understanding the needs that Meridian residents who are currently or at risk of experiencing homelessness face and how to serve them better.

Community Collaboration - City representatives are also frequently involved in public discussions, presentations, and meetings with citizens, other government officials, and local service providers, including West Ada School District, Jesse Tree, and CATCH. This collaboration helps the community provide support, understanding, and outreach to those experiencing homelessness in Meridian.

Homeless Management Information System - In previous years, the City worked with the CoC to add data points to the CoC’s Homeless Management Information System (HMIS) to enable the City to determine how many Meridian residents are experiencing homelessness and the reasons for their housing crisis. The City is committed to serving the individual needs of Meridian’s homeless population, as identified by the CoC and local organizations.

Point-in-Time County - The City has also worked with the CoC to conduct the annual Point-in-Time Count, which helps determine the number of people experiencing homelessness on a given day. This information allows the City to understand the level of homelessness in Meridian and develop a program
that better serves those in need. The City will continue to assist with this process in upcoming years.

**Emergency Rental Assistance** - Meridian’s 2022 Annual Action Plan includes funding for Emergency Rental Assistance. This program provides financial support to help residents at risk of homelessness remain in their stable housing.

**Addressing the emergency shelter and transitional housing needs of homeless persons**

While there are emergency shelter and transitional housing facilities located in other nearby cities in the Treasure Valley, none of these facilities are located within the City of Meridian. The City has prioritized funding homelessness prevention to mitigate the need for these services but also works with the CoC to assist Meridian residents who need emergency shelter. The City encourages agencies who provide these services to apply for CDBG funding, but there were no applications during PY22 for projects directly related to emergency shelters or transitional housing projects. However, all services to be funded are available to those who qualify.

**The City of Meridian lacks homeless facilities.**

- No homeless emergency shelter space is available in Meridian.
- Meridian does not have a domestic violence shelter.
- There are no transitional housing facilities in Meridian.

Residents who are the most vulnerable are those that are experiencing housing instability. Leaving the community for services in Boise, Nampa, or Caldwell, takes vulnerable residents away from their existing safety net of family, employment, schools, and religious community. **Families that stay in their community have the best chances of quickly resolving their housing instability or financial challenges and minimizing the impact of homelessness on their children.**

**Helping homeless persons (especially chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth) make the transition to permanent housing and independent living, including shortening the period of time that individuals and families experience homelessness, facilitating access for homeless individuals and families to affordable housing units, and preventing individuals and families who were recently homeless from becoming homeless again**

The City will provide funding to NeighborWorks Boise to assist with homeowner repairs to Meridian residents with low- and moderate-income to keep them in housing they can afford. In addition, Meridian’s work with Jesse Tree has helped provide rental and case management services aimed at preventing and resolving needs for those currently experiencing homelessness or at risk of homelessness in Meridian.

The partnerships that the City has with local committees, organizations, and networks in evaluating, understanding, and addressing the many needs of Meridian residents experiencing homelessness include; the Meridian Police Department, Ada County Sheriff’s Office, City of Boise, City of Nampa, City of Caldwell, Women’s and Children’s Alliance, Jesse Tree, Boys & Girls Clubs of Ada County, West Ada School.
District, CATCH, Ada County Housing Authority, Local HUD office, CoC, Meridian Food Bank, United Way, NeighborWorks Boise, IHFA, Terry Riley, El-Ada Community Action, Our Path Home Connect, and many others. These partnerships are extensive and ongoing in order to help address and prevent homelessness in Meridian.

These efforts, particularly coordination and participation with CATCH and the CoC, are designed to assist local service providers in helping persons experiencing homelessness make the transition to permanent housing and independent living.

In addition, the City’s relationships with ACHA, CATCH, and Jesse Tree are aimed to develop activities through the Program that facilitate access for individuals and families experiencing homelessness to affordable housing units while also preventing individuals and families from becoming homeless.

Helping low-income individuals and families avoid becoming homeless, especially extremely low-income individuals and families and those who are: being discharged from publicly funded institutions and systems of care (such as health care facilities, mental health facilities, foster care and other youth facilities, and corrections programs and institutions); or, receiving assistance from public or private agencies that address housing, health, social services, employment, education, or youth needs

The City is involved in the CoC, which is comprised of representation from ACHA, Health and Welfare, mental health service providers, and other service agencies, including law enforcement and correctional agencies. The CoC coordinates, collects data, reviews data, and prioritizes strategies based on data and input from providers. The coordinated entry serves all communities within Ada County, and case conferencing is conducted weekly.

The City is also involved in the Behavioral Health Board (BHB), which focuses on mental health and substance use disorders. The BHB is a government entity established by the Idaho legislature in 2014 to advise Idaho’s behavioral health authority, identify gaps, and promote improvements to the delivery of integrated services for behavioral health in Idaho. The Board promotes and supports prevention, intervention, recovery, and resiliency for individuals and families in need. It is composed of 23 stakeholders, advocates, and professionals across the continuum of care. Involvement with this group allows the City to understand the community’s broader needs related to behavioral health in general and specifically for those discharged from institutional settings such as mental health facilities and corrections programs.

During PY22, the City will also provide funding to Jesse Tree to keep families, individuals, and children at risk of eviction stably housed. Meridian partners with other organizations, such as the West Ada School District, to assess needs and provide services for those at risk of becoming homeless.

Discussion

Much of the work funded through the Community Development Block Grant (CDBG) program is directed at housing stability for Meridian’s LMI residents. In addition to the services previously mentioned, the City is focusing on public transportation for seniors, youth scholarships for daycare, and streetlight
improvements in low- to moderate-income neighborhoods to meet the needs of those in the community who may or may not be experiencing homelessness.

## AP-75 BARRIERS TO AFFORDABLE HOUSING – 91.220(J)

### Introduction:

Even though construction costs for new housing developments remain relatively stagnant, housing prices continue to rise, severely impacting the availability of affordable housing in the United States. According to Brian Montgomery, Federal Housing Administration commissioner and assistant secretary for housing, constraints on housing not only reduce the supply of affordable housing but also increase the number of households that are cost-burdened, spending more than 30 percent of their income on rent.

Land-use policies and zoning regulations constrain the supply of affordable housing. Density limits, height restrictions, parking requirements, lengthy permitting and approval processes, and community opposition all contribute to increased housing prices.

Many local planning procedures currently in place enable community opposition that stalls housing production. Reshaping local regulations allows jurisdictions to make a lasting impact on the supply of affordable housing.

HUD, PD&R Edge, *"Regulatory Barriers and Affordable Housing Quarterly Update"

### Actions it planned to remove or ameliorate the negative effects of public policies that serve as barriers to affordable housing such as land use controls, tax policies affecting land, zoning ordinances, building codes, fees and charges, growth limitations, and policies affecting the return on residential investment*

The City has committed to creating more diverse housing types through its redevelopment plan for downtown. The Destination Downtown plan states that creating diverse housing opportunities for different housing needs and life cycles in downtown Meridian is essential to support new businesses and activities. A healthy housing mix will also help draw people downtown and ensure 24-7 activity. Housing created or redeveloped as part of the downtown plan is expected to include apartments, townhomes, condominiums, duplexes, and single-family homes.

The City helped facilitate multiple RFPs over the past several years for a large portion of the publicly-owned properties in downtown Meridian, prioritizing proposals that focused on developing mixed-use and high-density housing. One project that was awarded, Downtown Lofts, will bring several affordable
units to downtown Meridian, including six (6) that will be dedicated to CATCH participants.

**Discussion:**

The City will continue to identify areas to reduce barriers to affordable housing.

---

**AP-85 OTHER ACTIONS – 91.220(K)**

---

**Introduction:**

The City of Meridian continues to remain involved in several efforts to address the needs of the underserved and promote efforts to coordinate the many components related to housing, suitable living environments, and promoting safer living environments.

**Actions planned to address obstacles to meeting underserved needs**

The City will continue to engage in conversations with neighboring communities and service providers to identify and address underserved needs, maintain affordable housing, and reduce the number of families living in poverty. During PY22, the City has allocated funding to provide housing stability for those at risk of homelessness and extended care programs that offer youth a positive place to go. The City will increase relationships with private providers, developers, and social services providers to reduce the obstacles for Meridian residents to achieve decent housing, a suitable living environment, and expand economic opportunities.

**Actions planned to foster and maintain affordable housing**

The City intends to partner with local service providers that will assist in fostering and maintaining affordable housing.

Projects funded during PY22 will provide:

- Emergency assistance to families who are at risk of eviction and homelessness;
- Assistance for homeowners to make necessary improvements to maintain their current housing; and,
- Scholarships for children to participate in extended care programs so their caregivers can work.

Additionally, the City will be working with service providers that focus on providing stability to those with mental health and/or substance use disorders to allow them to gain or maintain affordable housing with access to care coordination. The City will also explore additional partnerships with mission-driven and private developers to bring more workforce housing into downtown and underutilized land parcels.

The City is actively working to develop workforce housing and opportunities for residents to increase their
income to foster and maintain affordable housing.

**Actions planned to reduce lead-based paint hazards**

Meridian's CDBG projects, which require lead-based paint actions, are generally limited to housing rehabilitation.

The Lead-Safe Housing Rule (LSHR) process involves the following areas: notification, lead hazard evaluation, lead hazard reduction, and clearance. CDBG housing rehabilitation projects do not require ongoing lead-based paint maintenance. Lead-based paint activities apply to all homes built before 1978.

Meridian has written policies and procedures for all programs required to comply with the HUD lead-safe housing rule (LSHR). Additionally, the City requires lead-based paint policies and procedures with any partners who may administer these programs on the City’s behalf. Contractors in the housing rehabilitation program have lead-based paint requirements integrated into their contract for services with the homeowner.

**Actions planned to reduce the number of poverty-level families**

The objectives of the CDBG program are to address the needs of low to moderate-income residents in Meridian. Generally, the CDBG-funded programs for PY2022 work toward this end, whether through direct service delivery through contracted subrecipients or infrastructure improvements to reduce blight and address accessibility issues.

In addition to the programs, the City has developed many partnerships with service providers, non-profits, state agencies, and other entities to address issues affecting poverty.

**Actions planned to develop institutional structure**

In recent years the City made the CDBG Administrator position a full-time position and changed the position title to Community Development Program Coordinator. This position is now funded out of the City’s general fund. This institutional change is designed to provide more time to effectively manage the CDBG program and provide flexibility for the position to expand efforts into economic and other areas that can help meet the community development needs of the City.

Staff will continue to work to attain relevant and appropriate professional development training during the program year to learn and address current and future institutional problems. Discussions will continue about the expansion and opportunities to add new program staff to assist in this community development work.

The City has been involved in the institutional restructuring of the CoC and the implementation of new HMIS and Coordinated Entry standards for service providers in the County. These activities have dramatically altered the institutional framework of housing and other service providers in the region and have improved the efficiency and transparency of the collaborative work to address these needs. The City hopes to identify new institutional structures that can be developed, reformed, or changed to better
support those most at risk in the region (e.g., transitional and emergency housing networks).

**Actions planned to enhance coordination between public and private housing and social service agencies**

City staff will be working with the CoC to identify ways to enhance coordination between public and private housing and social service agencies. As in many communities, there is not enough funding to provide the level of services we’d like, so the CoC plans to identify a way of coordinating available services and reducing duplication of services for more effective use of funding. Multiple methods will be explored, including phone apps and enhancing services already available.

The City's partnership and funding relationship with local housing service organizations, including NeighborWorks Boise, Jesse Tree, and Ada County Housing Authority, will continue to expand in this program year. In addition, coordination with other organizations like CATCH, Boise Rescue Mission, Interfaith Sanctuary, Terry Reilley, El-Ada Community Action, Jannus, Idaho Office for Refugees, Agency for New Americans, Women’s and Children’s Alliance, and all members associated with the local CoC (including private housing developers) will continue to be built upon to improve networks, coordination, and problem-solving in the jurisdiction.

Meridian's participation in the local CoC, housing and homelessness roundtables, and other regional coordination efforts outlines the City's continued action plan to enhance networking and coordination between public and private housing and social service agencies.

**Discussion:**

The City intends to fund multiple projects to improve access to affordable housing and suitable living environments for Meridian residents. Staff will be working with subrecipients to identify barriers within their programs and find ways to address them to provide more effective services. Staff will also identify ways to improve and expand Meridian’s CDBG Program for future years.
Community Development Block Grant Program (CDBG)  
Reference 24 CFR 91.220(l)(1)

Projects planned with all CDBG funds expected to be available during the year are identified in the Projects Table. The following identifies program income that is available for use that is included in projects to be carried out.

1. The total amount of program income that will have been received before the start of the next program year and that has not yet been reprogrammed 0
2. The amount of proceeds from section 108 loan guarantees that will be used during the year to address the priority needs and specific objectives identified in the grantee's strategic plan. 0
3. The amount of surplus funds from urban renewal settlements 0
4. The amount of any grant funds returned to the line of credit for which the planned use has not been included in a prior statement or plan 0
5. The amount of income from float-funded activities 0

Total Program Income: 0

Other CDBG Requirements

1. The amount of urgent need activities 0

2. The estimated percentage of CDBG funds that will be used for activities that benefit persons of low and moderate income. Overall Benefit - A consecutive period of one, two or three years may be used to determine that a minimum overall benefit of 70% of CDBG funds is used to benefit persons of low and moderate income. Specify the years covered that include this Annual Action Plan. 100.00%

The City's certification period includes program years 2021, 2022, and 2023. Outside of administration and fair housing, the City will allocate all funding for PY22 to LMI projects. The City commits to meet the 70% LMI benefit requirement of the federal CDBG program over the span of that three-year certification period.

1. Are you a Meridian resident? If so, how long? (0 point)

- Yes, less than one year: 0
- Yes, 1-5 years: 8
- Yes, more than 5 years: 27
- No, I do not reside in Meridian: 2
- I provide services to Meridian residents: 1
2. CDBG programs are designed for those who are 80% or below the area median income (AMI) as defined below.

Household Size - 80% AMI
1 person - $47,150
2 people - $59,900
3 people - $60,650
4 people - $67,650
5 people - $72,750
6 people - $78,150
7 people - $83,550
8 people - $88,950

Based on the number of people in your household and the combined annual income of those who are 18+, are you above or below 80% AMI?

- Above 80% AMI: 21
- Below 80% AMI: 16
3. The following goals were identified in the Con Plan.

**Public Facilities and Infrastructure Improvements:** Publicly-owned facilities and infrastructure such as streets, playgrounds, underground utilities, and buildings owned by non-profits open to the general public. Examples include:

- ADA Improvements
- Senior Centers
- Homeless and Domestic Violence Facilities
- Neighborhood Facilities
- Health Facilities

**Public Services:** Provided by local non-profit partners using CDBG funds. Examples include:

- Child care
- Substance use services
- Services for seniors
- Emergency Rental Assistance

**Housing:** Affordable and safe housing helps to provide financial stability, reduces the chances of a person becoming homeless, and promotes housing sustainability. Examples include:

- Homeownership Assistance
- Homeowner Repairs
- Acquisition, demolition, or soft costs to construct multifamily housing (CDBG cannot be used for construction of new units)

Do you agree that these goals address the actual needs for the City of Meridian?
4. If you do not believe these goals address the actual need, why not? What is missing? 

(0 point)

APRIL 5, 2022 PUBLIC HEARING NOTICE

CITY OF MERIDIAN
NOTICE OF PUBLIC HEARING AND
PUBLIC COMMENT PERIOD
Regarding Meridian’s
Community Development Block
Grant (CDBG) Program

The City of Meridian has been designated as an Entitlement Community by the U.S. Department of Housing and Urban Development (HUD). This designation allows the City to receive annual federal funds from HUD’s Community Development Block Grant (CDBG) Program. In order to receive these funds, the City must submit a Consolidated Plan every five (5) years that outlines the goals for the five year timeframe. Additionally, the City must submit an Action Plan every year that identifies the projects the City will undertake to reach these goals in the current year.

ALL CITIZENS ARE INVITED to attend a hearing regarding the Consolidated Plan and Action Plan on Tuesday, April 5, 2022, at 6:00 PM, in person, at Meridian City Hall, 33 E. Broadway Ave., Suite 308, Meridian, ID 83642.

Bettina Jantzen, being duly sworn, deposits and says: That she is the Principal Clerk of the Idaho Statesman, a newspaper published and printed at Boise, Ada County, State of Idaho, and having a general circulation therein, and which said newspaper has been continuously and uninterruptedly published in said County during a period of twelve consecutive months prior to the first publication of the notice, a copy of which is attached hereto; that said notice was published in The Idaho Statesman, in conformity with Section 60-108, Idaho Code, as amended, to:

No. of insertions: 1
Beginning issue of: 03/20/2022
Ending issue of: 03/20/2022

LEGAL NOTICE

CITY OF MERIDIAN
NOTICE OF PUBLIC HEARING AND PUBLIC COMMENT PERIOD
Regarding Meridian’s Community Development Block Grant (CDBG) Program

The City of Meridian has been designated an Entitlement Community by the U.S. Department of Housing and Urban Development (HUD). This designation allows the City to receive funds annually from HUD’s Community Development Block Grant (CDBG) Program.

The City anticipates that it will receive an allocation of $574,468 on October 1, 2022. In order to receive these funds, the City must submit an Annual Action Plan to HUD identifying the projects and goals the City will undertake to improve accessibility, enhance housing opportunities, and provide social services to low and moderate-income residents during the next program year.

In addition, HUD requires the city to create and submit a Five-Year Consolidated Plan that outlines Meridian’s strategic goals to improve accessibility, enhance housing opportunities, and provide social services to low and moderate-income residents in the upcoming five years. As part of the Consolidated Planning process, the City also plans to amend the Citizen Participation Plan to streamline and clarify the process used to seek public participation in CDBG activities.

ALL CITIZENS ARE INVITED to attend a hearing regarding the Consolidated Plan, Citizen Participation Plan, and Action Plan on Tuesday, July 20, 2022, at 6:00 PM in person at Meridian City Hall or virtually at https://documentassembly.org/live. Special accommodations for persons with disabilities, residents of assisted housing, and Meridian businesses and property owners. Meridian City Hall is a handicapped-accessible facility. Individuals requiring accommodation of physical, sight, or hearing impairments or sign language interpretation please contact the City Clerk at (208) 886-4333. All citizens may review the draft Consolidated Plan, Action Plan, and Citizen Participation Plan and provide testimony. Copies of the documents are available on the City’s CDBG website located at http://www.meridianidaho.gov/cdbg.

A PUBLIC COMMENT PERIOD OPENED JUNE 21, 2022 AND WILL CONTINUE THROUGH JULY 20, 2022. During this period, oral and written comments about the 2022 Annual Action Plan, Consolidated Plan, and Citizen Participation Plan will be accepted. All comments should be addressed to Crystal Campbell, City of Meridian, Community Development Department, 30 E. Broadway Ave., Ste. 102, Meridian, ID 83642; (208) 886-4365, or ccampbell@meridianidaho.org.

June 24, 2022
City of Meridian Citizen Participation Plan

The City of Meridian is an entitlement community for the Community Development Block Grant (CDBG) program administered by the U.S. Department of Housing and Urban Development (HUD). As a recipient of these funds, the City is required to have a strategy for citizen participation.

This document outlines the City's process and plans for soliciting and receiving citizen input during the lifecycle of Meridian's CDBG Program. Included in this is the Consolidated Plan (Con Plan), Action Plan, Consolidated Annual Performance and Evaluation Report (CAPER), Analysis of Impediments to Fair Housing Choice (AI), or amendments to any of these documents. This plan will be effective upon approval.

The City of Meridian recognizes the importance of public participation in understanding current housing and community development needs and barriers and prioritizing resources to address those needs. The Citizen Participation Plan is intended to encourage citizens of all ages, genders, economic levels, races, ethnicities, cultures, and special needs equal access to become involved in the CDBG planning process each year. This Citizen Participation Plan was written per Sections 91.100 and 91.105 of HUD's Consolidated Plan regulations.

Any complaints related to the Con Plan, Action Plan, CAPER, AI, amendments, or the CDBG program, in general, should be directed to Meridian's CDBG Program Administrator. Staff will respond within five (5) business days.

Translations and Reasonable Accommodations

The Citizen Participation Plan, Con Plan, Action Plan, and AI will be made available in formats accessible to persons with disabilities and in languages other than English upon request. All materials, announcements, and notices of the hearing will include information about how persons with disabilities and non-English speaking persons may request accommodations to review the proposed plan and provide written or oral comments. Upon request, or in the case of public hearings where a significant number of non-English speaking residents can reasonably be expected to participate, the City will provide both written interpretation(s) of the proposed consolidated or action plan one (1) week before the public hearing or within 48 hours of a request; and/or oral interpretation at the public hearing.
Consultation with Organizations and City Agencies

When preparing the Con Plan, Action Plans, and the AI, the City will actively consult with public and private agencies that provide housing, health, and social services to ensure that the interests and needs of all groups are being adequately identified. These may include the regional Continuum of Care, private businesses/employers, residential developers, nonprofit organizations, philanthropic organizations, and community-based and faith-based organizations, including those that provide services to special needs populations. This consultation will occur through interviews conducted with such organizations, stakeholder meetings, and incorporation of data and reports produced by such organizations into the Con Plan, Action Plans, and AI, where applicable.

Glossary of Relevant Terms

**Action Plan.** The yearly portion of the Consolidated Plan identifies the specific activities and projects to be undertaken by the City with CDBG funds during that program year.

**Analysis of Impediments to Fair Housing Choice (AI).** This document reviews housing challenges and fair housing issues in the City and broader region. It results in goals and action steps to address and mitigate barriers.

**Community Development Block Grant (CDBG).** Established under Title 1 of the Housing and Community Development Act of 1974 as amended, Public Law 93-383, and the funding received under such programs, assists communities in addressing housing and community development needs, primarily for low- and moderate-income residents.

**Consolidated Annual Performance and Evaluation Report (CAPER).** The CAPER reports the City's completion of projects and activities as outlined within the Action and Consolidated Plans and the expenditure of CDBG and related block grant funds, as received by the City.

**Consolidated Plan.** A five-year plan of a City's housing and community development needs, resources, priorities, and proposed activities to be undertaken for the CDBG programs.

**Relevant Areas and Programs.** The City of Meridian's 2022-2026 Consolidated Plan covers the geographic area within the city limits of Meridian. CDBG funds must benefit low- and moderate-income residents and/or neighborhoods within Meridian.
Public Participation and Comment
Consolidated Plan and Annual Action Plans

The City will conduct at least two public hearings at different stages of the annual planning process to obtain citizens’ views on housing and community development needs, program performance, funding priorities, and to respond to questions. At least one of these hearings will be held before the proposed plan is published for comment.

The City may elect to collect citizen input through alternative public involvement techniques (e.g. focus groups, surveys, and social media) with the intent of developing a shared vision for investment in communities and neighborhoods.

Upon request, the City will offer technical assistance to groups that represent low- and moderate-income persons, in developing funding proposals under any of the goals covered by the Consolidated Plan. The level and type of assistance will be determined annually by the City depending on need, as evidenced in past applications and expressed by residents, stakeholders, and past grantees. The assistance need not include the provision of funds to the groups receiving technical assistance.

The citizen input techniques will be designed to encourage participation by low- and moderate-income residents, residents living in neighborhoods with revitalization needs, residents benefitting from public housing assistance, and residents with special needs. The Ada County Housing Authority (ACHA) will be notified about Consolidated Plan activities related to developments and resident communities to allow this information to be available at public hearings required for its plan.

Before the adoption of the Con Plan and Action Plans, the City will make available to interested parties the draft Plan for a comment period of no less than 30 days and will conduct a public hearing during or at the end of the 30-day comment period.

The 30-day comment period and the public hearing for the Consolidated Plan and Action Plans will be noticed in the City of Meridian’s newspaper of record and by posting the notice on the City’s website and social media sites. The public notice shall be published at least two weeks in advance of the public hearing and shall include information regarding the subject of the hearing, the date, time, and location of the public hearing, and a notice of opportunity to provide written or oral comment. Public hearings will follow the format set forth by the City for regular Council meetings and may include alternative formats such as a virtual platform.
In the event of an emergency, HUD may grant a waiver to the number of days required for a public comment period to ensure funding can get into the community as quickly as possible. Under these circumstances, Action Plans, substantial amendments, and the Citizen Participation Plan will only require a five (5) day public comment period. The legal notice for at least one local newspaper will be published no less than five (5) days before the end of the public comment period.

The draft Con Plan will contain the amount of assistance the City expects to receive through the HUD CDBG grants and the strategic goals that will guide funding over the five planning periods. The Action Plans will detail the projects to which the City may allocate funds for that particular program year.

Electronic copies of the draft plans will be available on the City’s website and circulated to residents and stakeholders who have expressed interest in receiving the document via email. Hardcopies will be available at City offices upon request.

The Council will consider any comments or views of individuals or groups received in writing or orally during the Plan process and at the public hearing to be held during, or immediately following, the 30-day public comment period. The Council shall, at a regular or special public meeting, review the proposed Plan and the summaries regarding the incorporation of citizen comments or views provided, and vote on a resolution to adopt the final Consolidated Plan or Action Plan.

Comments received on the draft plans will be summarized in the final plan submitted to HUD. Copies of letters and emails received may be appended to the plans if requested and permitted by commenters. All comments received during the planning process and public comment period will be accepted and a summary attached to each plan.

Analysis of Impediments to Fair Housing Choice
The citizen participation process for the AI will include alternative public involvement techniques (e.g. focus groups, surveys, and social media) with a focus on reaching residents who are most vulnerable to fair housing challenges and are historically underrepresented in community engagement processes. The AI will be available for public review during a 30-day comment period. Electronic copies of the draft AI will be available on the City’s website and circulated to residents and stakeholders who have expressed interest in receiving the document. Hard copies will be available for review at City offices upon request.
CAPER

A public notice of the CAPER availability with the date, time, and process for public comment will be published in the City of Meridian’s newspaper of record at least 15 days in advance of the end of the public comment period. The City will accept all comments received during the public comment period and provide a summary of these comments with the CAPER.

Substantial Amendments

Public comments or a change in circumstances may warrant an amendment to the Con Plan and/or Action Plan. Minor changes require notice to HUD while major changes require a substantial amendment. The following criteria define adjustments that require a substantial amendment:

- A change in the expected federal allocation of the block grant of 20 percent or more.
- A change in the City’s allocation plan that would redirect more than 20 percent of annual funding to a different project goal.
- Carrying out a project using CDBG funds or program income not previously described in the Con Plan or Action Plan.

In the event of a substantial amendment, the City will publish a notice of the recommended changes and the date, time, and location of the public hearing in the City of Meridian’s newspaper of record at least two weeks in advance of the public hearing. The City will provide a 30-day public comment period with a public hearing during or at the end of the 30-day comment period. The Council shall, at a regular or special public meeting, review the proposed substantial amendment and the summaries regarding the incorporation of citizen comments or views provided, and vote on a resolution to adopt the substantial amendment. Following the Council’s passage of the resolution adopting the substantial amendment, the City will notify HUD of the amendment and submit a copy of each substantial amendment to HUD as it occurs.

City Council will consider any comments on the substantially amended Plan from individuals or groups. Comments must be received in writing or orally at public hearings. Virtual meetings and oral comments from the public are allowable if the City chooses to utilize this platform. A summary of the written and public hearing comments on the substantial amendments will be included in the final Plan.
Public access to records

The City will provide all interested parties with access to information and records related to the City’s Con Plan, Action Plans, CAPER, and the City’s use of funds under all programs covered by the Con Plan during the preceding five years.

Use of available waivers from HUD

The City of Meridian, when provided the authority from the Housing and Urban Development Department, may utilize any flexibilities or statutory waivers provided by HUD as they relate to the Community Development Block Grant Program. Waivers are typically provided in the event of a disaster and/or emergency declaration, though waivers may be available at other HUD-specified times.

A declared disaster or emergency may include, but is not limited to the following:

1) Man-Made Disasters
2) Natural Disasters
3) Terrorism
4) Infectious Disease or Pandemic
5) National Emergency

If waivers or other authorities are available from HUD to assist in expediting available additional resources and/or any plan modifications, the City may take full advantage of offered exceptions to standard Citizen Participation requirements outlined in other sections of this plan. Reasonable notice and opportunity for public response or comment will be considered as the minimum outlined in any provided waivers.
Resolution

Will be added when complete.

CITY OF MERIDIAN

RESOLUTION NO. 22-2339

BY THE CITY COUNCIL:
BERNT, BORTON, CAVENER, HOAGLUN, PERREault, AND STRADER

A RESOLUTION APPROVING SUBMISSION AND ADOPTION OF THE COMMUNITY DEVELOPMENT BLOCK GRANT FIVE-YEAR CONSOLIDATED PLAN (2022-2026), WITH ITS INCLUDED PROGRAM YEAR 2022 ACTION PLAN AND ANALYSIS OF IMPEDIMENTS TO FAIR HOUSING CHOICE, TO THE UNITED STATES DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT; AUTHORIZING THE MAYOR AND CITY CLERK TO EXECUTE AND ATTEST THE SAME ON BEHALF OF THE CITY OF MERIDIAN; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, it is necessary that a five-year strategic plan be submitted to the United States Department of Housing and Urban Development ("HUD") in order to receive Community Development Block Grant ("CDBG") funding for the Program Years 2022-2026; and

WHEREAS, it is necessary that an Analysis of Impediments to Fair Housing Choice be submitted to the United States Department of Housing and Urban Development ("HUD") in order to receive Community Development Block Grant ("CDBG") funding for the Program Years 2022-2026; and

WHEREAS, it is necessary that an annual action plan be submitted to the United States Department of Housing and Urban Development ("HUD") in order to receive Community Development Block Grant ("CDBG") funding for the Program Year 2022; and

WHEREAS, the City held public hearings on the 2022-2026 Consolidated Plan, Analysis of Impediments to Fair Housing Choice, and Program Year 2022 Action Plan on April 5, 2022, July 28, 2022, and August 9, 2022, and held a public comment period on the draft application materials from June 24, 2022 to August 9, 2022;

NOW, THEREFORE, BE IT RESOLVED BY THE MAYOR AND CITY COUNCIL OF THE CITY OF MERIDIAN, IDAHO:

Section 1. That the 2022-2026 Consolidated Plan, Analysis of Impediments to Fair Housing Choice, and Program Year 2022 Action Plan, and its certification documents, copies of which are attached hereto as ATTACHMENT C and incorporated herein by reference, be, and the same hereby are, adopted as to both form and content.

Section 2. That the Community Development Program Coordinator be, and hereby is, authorized to submit such 2022-2026 Consolidated Plan, Analysis of Impediments to Fair Housing Choice, and Program Year 2022 Action Plan to HUD.

Section 3. That the Mayor and the City Clerk be, and they hereby are, authorized to respectively execute and attest the certifying documents for the 2022-2026 Consolidated Plan, Analysis of Impediments to Fair Housing Choice, and Program Year 2022 Action Plan for and on behalf of the City of Meridian.

Section 4. That this Resolution shall be in full force and effect immediately upon its adoption and approval.

RESOLUTION ADOPTING CDBG DOCUMENTS – Page 1 OF 2
ADOPTED by the City Council of City of Meridian, Idaho this 9th day of August, 2022.

APPROVED by the Council President of the City of Meridian, Idaho, this 9th day of August, 2022.

APPROVED:

Brad Hoaglin, Council President

ATTEST:

By: Chris Johnson, City Clerk
